## iSMART Technology

Intelligent Energy-Saving Technology

IBASE's proprietary technology allows users to schedule the power on/off time and by reducing the power consumption during standby or off mode, to achieve a lower carbon footprint of the system.

Helps the system to boot up even under extreme low temperature conditions.

Intelligently confines the power consumption of equipment in on/off mode state to be under or equal to 0.5W through the BIOS.

Allows the MCU to restart the system after a power failure.

Allows users to configure the system to auto start and shut down at a specific times.

## Observer Technology

Remote Monitoring Technology

A hardware remote monitoring utility used for monitoring voltages, temperature sensors and fan speeds remotely.
