(hereinafter referred to as "IBASE").

Disclaimer

IBASE reserves the right to make changes and improvements to the products described in this document without prior notice. Every effort has been made to ensure the information in the document is correct; however, IBASE does not guarantee this document is error-free. IBASE assumes no liability for incidental or consequential damages arising from misapplication or inability to use the product or the information contained herein, nor for any infringements of rights of third parties, which may result from its use.

Trademarks

All the trademarks, registrations and brands mentioned herein are used for identification purposes only and may be trademarks and/or registered trademarks of their respective owners.

Compliance

CE

In a domestic environment, this product may cause radio interference in which case users may be required to take adequate measures.

FC

This product has been tested and found to comply with the limits for a Class B device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with manufacturer's instructions, may cause harmful interference to radio communications.

WEEE

This product must not be disposed of as normal household waste, in accordance with the EU directive of for waste electrical and electronic equipment (WEEE - 2012/19/EU). Instead, it should be disposed of by returning it to a municipal recycling collection point. Check local regulations for disposal of electronic products.

Green IBASE

This product is compliant with the current RoHS restrictions and prohibits use of the following substances in concentrations exceeding 0.1% by weight (1000 ppm) except for cadmium, limited to 0.01% by weight (100 ppm).

- Lead (Pb)
- Mercury (Hg)
- Cadmium (Cd)
- Hexavalent chromium (Cr6+)
- Polybrominated biphenyls (PBB)
- Polybrominated diphenyl ether (PBDE)

Important Safety Information

Carefully read the precautions before using the device.

Environmental conditions:

- Lay the device horizontally on a stable and solid surface in case the device may fall, causing serious damage.
- Leave plenty of space around the device and do not block the openings for ventilation. NEVER DROP OR INSERT ANY OBJECTS OF ANY KIND INTO THE VENTILATION OPENINGS.
- Use this product in environments with ambient temperatures between 0°C and 45°C.
- DO NOT LEAVE THIS DEVICE IN AN ENVIRONMENT WHERE THE STORAGE TEMPERATURE MAY IS BELOW -20° C OR ABOVE 80° C. This could damage the device. The device must be used in a controlled environment.

Care for IBASE products:

- Before cleaning the device, turn it off and unplug all cables such as power in case a small amount of electrical current may still flow.
- Use neutral cleaning agents or diluted alcohol to clean the device chassis with a cloth. Then wipe the chassis with a dry cloth.
- Vacuum the dust with a computer vacuum cleaner to prevent the air vent or slots from being clogged.

Attention during use:

- Do not place heavy objects on the top of the device.
- Operate this device from the type of power indicated on the marking label. If you are not sure of the type of power available, consult the distributor or local power company.
- Do not walk on the power cord or allow anything to rest on it.
- If you use an extension cord, make sure that the total ampere rating of the product plugged into the extension cord does not exceed its limits.

Avoid Disassembly

Do not disassemble, repair or make any modification to the device. Doing so could generate hazards and cause damage to the device, even bodily injury or property damage, and will void any warranty.

There is danger of explosion if internal lithium-ion battery is replaced by an incorrect type. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions.

Warranty Policy

• IBASE standard products:

24-month (2-year) warranty from the date of shipment. If the date of shipment cannot be ascertained, the product serial numbers can be used to determine the approximate shipping date.

• 3rd-party parts:

12-month (1-year) warranty from delivery for the 3rd-party parts that are not manufactured by IBASE, such as CPU, CPU cooler, memory, storage devices, power adapter, panel and touchscreen.

* PRODUCTS, HOWEVER, THAT FAIL DUE TO MISUSE, ACCIDENT, IMPROPER INSTALLATION OR UNAUTHORIZED REPAIR SHALL BE TREATED AS OUT OF WARRANTY AND CUSTOMERS SHALL BE BILLED FOR REPAIR AND SHIPPING CHARGES.

Technical Support & Services

- 1. Visit the IBASE website at <u>www.ibase.com.tw</u> to find the latest information about the product.
- 2. If you need any further assistance from the distributor or sales representative, prepare the following information:
 - Product model name
 - Product serial number
 - Detailed description of the problem
 - The error messages in text or in screenshots if there is any
 - The arrangement of the peripherals
 - Software in use (such as OS and application software, including the version numbers)
- If repair service is required, you can download the RMA form at <u>http://www.ibase.com.tw/english/Supports/RMAService/</u>. Fill out the form and contact the distributor or sales representative.

Chapter 1 General Information

The information provided in this chapter includes:

- Features
- Packing List
- Specifications
- Product View
- Dimensions

1.1 Introduction

The SI-111-N is a palm-sized fanless 4K digital signage player system based on the Intel® Atom® x6211E and Celeron® N6210 processors. Equipped with an HDMI 2.0b port that supports 3840 x 2160 @60Hz resolution, the industrial-grade system enables businesses to easily connect to a 4K display and create immersive visual experiences that attract attention and effectively promote their products or services.

IBASE values sustainable development and ESG practices. The SI-111-N incorporates various energy-saving features, including IBASE's proprietary iSMART green technology that enables power on/off scheduling with power resume capabilities, and the Observer utility that remotely monitors system voltages and temperature to ensure the system is operating efficiently while minimizing energy consumption. The SI-111-N's extensive I/O connectivity offers a rich array of expansion options, reliable data handling, and wireless operation, which includes 1x 2.5GbE LAN, 1x COM (RS-232) port, 1x M.2 M-Key (2280) and 1x M.2 E-Key (2230) sockets.

1.2 Features

- Intel® Atom® X6000/ Pentium® / Celeron® Processors
- iSMART intelligent energy-saving & Observer remote monitoring technologies
- 2x DDR4-3200 SO-DIMM, Dual channel
- 1x HDMI 2.0b
- 3x USB 3.1
- 1x 2.5GbE LAN port
- 1x COM (RS-232)
- 1x M.2 M-Key (2280) for storage
- 1x M.2 E-Key (2230) for Wi-Fi, Bluetooth or capture card options
- TPM 2.0 and watchdog timer
- Industrial-grade robust, fanless and compact design

1.3 Packing List

The product package should include the items listed below. If any of the items below is missing, contact the distributor or the dealer from whom you purchased the product.

- SI-111-N Digital Signage Player
- Power Adaptor
- Power Cord

1.4 SI-111-N Specifications

Product	SI-111-N			
Mainboard				
Mainboard	MBD111			
CPU	Intel® Atom® x6211E (1.3~3.0GHz) Intel® Celeron® N6210 (1.2~2.6GHz)			
CPU Socket	FCBGA1493			
Chipset	SoC Integrated			
Operating System	Win10 IoT Enterprise (64-bit) Linux Ubuntu (64-bit)			
Certification	CE, FCC class-B, UKCA, cULus, LVD			
Memory	2x DDR4-3200 SO-DIMM, Max. 32GB (support IBECC)			
Graphics	11th Gen Intel® SoC integrated 18EUs graphics device			
LAN Controller	1x Intel® I226IT 2.5GbE LAN for Atom® x6000 series 1x Intel® I226V 2.5GbE LAN for Celeron®			
Expansion Slots	1x M.2 M-Key (2280) for storage 1x M.2 E-Key (2230) for Wi-Fi, Bluetooth or capture card options			
I/O Interface	1x HDMI 2.0b 3x USB 3.1 1x RJ45 for 2.5GbE LAN 1x RJ45 for RS232 serial port 2x Audio connectors for Line-in / Line-out 1x Power button 1x Lockable power connector 1x Power / HDD LED			
Watchdog Timer	256 segments, 0, 1, 2255 (sec/ min)			
Power	+12V DC			
Chassis	Aluminum + SGCC			
Chassis Color	Black & White			
Storage	1x M.2 M-Key (2280)			

Power Supply	60W power adaptor
Mounting	Standard system bracket
Dimensions	181mm(W) x 123mm(D) x 21.5mm(H)
Certificate	CE, FCC class B, UL, CCC
	Environment
Operating Temperature	-10°C ~ 50°C (14°F~122°F) for SI-111-N -20°C ~ 70°C (-4°F~158°F) for SI-111-N11E
Storage Temperature	-40°C~80°C (-40°F~176°F)
Relative Humidity	10%~90% (non-condensing)
Vibration	SSD: 5 grms / 5~500Hz / random operation
	Models

Chapter 2 Hardware Installation & Motherboard Information

The information provided in this chapter includes:

- Removing the brackets and system cover
- Installation of memory modules and M.2 cards
- Switches and connectors information

2.1 Installation / Replacement

2.1.1 Removing the Brackets and Cover

The SI-111-N is provided with the two brackets installed as shown in the picture below.

To access the internal components, turn the unit upside down and remove the two brackets by removing the four (4) screws as shown below.

Unscrew the six (6) screws shown in the picture below to remove the bottom cover.

2.1.2 Installing Memory Modules and M.2 Cards

After removing the bottom cover, you are now able to access the J9 DDR4 memory slot as shown below. To install and remove a memory module, follow the steps below.

- 1. Align the key of the memory module with that on the memory slot and insert the module slantwise.
- 2. Gently push the module in an upright position until the clips of the slot close to hold the module in place when the module touches the bottom of the slot.
- 3. To remove the module, press the ejector tabs outwards with your fingertips.
- 4. The second memory slot, J3, can be found on the other side (top) of the board. Repeat the previous steps to install/replace a memory module.

After removing the bottom cover, you are now able to access the J10 M.2 E-Key Connector and J11 M.2 M-Key Connector as shown below.

- 1. To install a card, locate the M.2 card slot. Align the key of the M.2 card to the M.2 interface, and insert the card slantwise.
- 2. Push the M.2 card down, and fix it onto the standoff with a screw.

Chapter 3 Driver Installation

The information provided in this chapter includes:

- Intel[®] Chipset Software Installation Utility
- VGA Driver
- HD Audio Driver
- Intel[®] Management Engine Drivers Installation
- LAN Driver

3.1 Introduction

This section describes the installation procedures of the software drivers. The software drivers are also available at the IBASE website <u>www.ibase.com.tw</u>.

3.2 Intel[®] Chipset Software Installation Utility

The Intel[®] Chipset drivers should be installed first before the software drivers to install INF files for Plug & Play function for Intel chipset components.

1. Run the driver disk. Click **Intel** on the left pane and then **Intel(R) Elkhartlake Chipset Drivers** on the right pane.

Note: After installing the Windows operating system, install the Intel[®] Chipset Software Installation Utility first before proceeding with the drivers installation.

2. Click Intel(R) Chipset Software Installation Utility.

- 3. When the *Welcome* screen to the Intel[®] Chipset Device Software appears, click **Next**.
- 4. Accept the software license agreement and proceed with the installation process.
- 5. On the *Readme File Information* screen, click **Install**.
- 6. After the installation, press Finish to complete the setup process.

Intel(R) Chipset Device Software Completion	(intel)
You have successfully installed the following product:	
Press Finish to complete the setup process.	
<u>View Log Files</u>	Finish

3.3 VGA Driver Installation

1. Run the driver disk. Click **Intel** on the left pane and then **Intel(R) Elkhartlake Chipset Drivers** on the right pane.

2. Click Intel(R) Elkhartlake Graphics Driver.

3

3. On the intel Graphics Driver Installer screen, click Begin installation.

5. Click Start.

7. When Install wizard has completed the installation, click Finish.

Chapter 4 BIOS Setup

This chapter describes the different settings available in the AMI BIOS. The topics covered in this chapter are as follows:

- Main Settings
- Advanced Settings
- Chipset Settings
- Security Settings
- Boot Settings
- Save & Exit

4.1 Introduction

The BIOS (Basic Input/Output System) installed in the ROM of the system supports Intel® processors. The BIOS provides critical low-level support for standard devices such as disk drives, serial ports and parallel ports. It also provides password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

4.2 BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Press the key immediately allows you to enter the Setup utility. If you are a little bit late pressing the key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup.

If you still need to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again.

The following message will appear on the screen:

Press to Enter Setup

In general, press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help, and <Esc> to quit.

When you enter the BIOS Setup utility, the *Main Menu* screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

Warning: It is strongly recommended that you avoid making any changes to the chipset defaults.

These defaults have been carefully chosen by both AMI and the system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could make the system unstable and crash in some cases.

4.3 Main Settings

4.5 Chipset Settings

BIOS Setting	Description
System Agent (SA) Configuration	System Agent (SA) parameters
PCH-IO Configuration	PCH parameters

4.5.1 System Agent (SA) Configuration

Chipset	Aptio Setup — AMI
System Agent (SA) Configuration	
VT-d	Supported
▶ Graphics Configuration VT-d	[Enabled]

BIOS Setting	Description
Graphics Configuration	Configures the graphics settings.
VT-d	Checks if VT-d function on MCH is supported.

4.5.1.1. Graphics Configuration

Chipset	Aptio Set
Graphics Configuration	
Primary Display Internal Graphics GTT Size Aperture Size	(Auto) (Auto) (DHO) (256MB)

BIOS Setting	Description
Primary Display	Select which of IGFX/PEG/PCI Graphics device should be primary display or select SG for Hybrid Gfx. Options: Auto, IGFX, PEG, PCI
Internal Graphics	Keep IGFX enabled based on the setup options. Options: Auto, Disabled, Enabled
GTT Size	Sets the GTT size as 2 MB, 4 MB, or 8 MB.
	Sets the aperture size as 128 MB, 256 MB, 512 MB, 1024 MB or 2048 MB.
Aperture Size	Note: Above 4GB MMIO BIOS assignment is automatically enabled when selecting 2048 MB aperture. To use this feature, disable CSM support.

4.5.2 PCH-IO Configuration

Chipset	Aptio Setup
PCH-IO Configuration	
 SATA Configuration PinCntrl Driver GPI0 Sch 	eme (Enabled)

BIOS Setting	Description	
SATA Configuration	SATA Devices Options Settings	
PinCntrl Driver GPIO Scheme	Enable/Disable PinCntrl Driver GPIO Scheme	

4.5.2.1. SATA Configuration:

Chipset	
SATA Configuration	
SATA Controller(s)	(Enabled)
SATA Mode Selection	(AHCI)
Serial ATA Port 0	Phison SSMP128 (128.0
Software Preserve	SUPPORTED
Port 0	[Enabled]
Hot Plug	[Disabled]
Configured as eSATA	Hot Plug supported
Serial ATA Port 1	Empty
Software Preserve	Unknown
Port 1	[Enabled]
Hot Plug	[Disabled]
Configured as eSATA	Hot Plug supported

BIOS Setting	Description
SATA Controller(s)	Enables / Disables the SATA device.
SATA Mode Selection	Determines how SATA controller(s) operate.
Serial ATA Ports	Enables / Disables serial ports.
SATA Ports Hot Plug	Enables / Disables SATA Ports HotPlug.

4.6 Security Settings

Aptio Setup – AMI Main Advanced Chipset <mark>Security</mark> Boot Save & Exit			
Password Description		Secure Boot configuration	
If ONLY the Administrator's pas then this only limits access to only asked for when entering Ge If ONLY the User's password is is a power on password and must boot or enter Setup. Main Advanced Chipset Security Boot Save & Exit Save Options Save Changes and Exit Discard Changes and Exit Save Changes and Reset Discard Changes and Reset Save Changes Discard Changes Discard Changes Default Options Restore Defaults Save as User Defaults Boot Overnide Windows Boot Manager (P0: Phison SSMP128GKB5C2-S11) Launch EFI Shell from filesystem device	Exit system setup after saving the changes. ++: Select Screen fl: Select Item Enter: Select +/-: Change Opt. F1: General Help F2: Previous Values F3: Octimized Defaults
	F4: Save & Exit ESC: Exit

BIOS Setting	Description	
Save Changes and Exit	Exits system setup after saving the changes.	
Discard Changes and Exit	Exits system setup without saving any changes.	
Save Changes and Reset	Resets the system after saving the changes.	
Discard Changes and Reset	Resets system setup without saving any changes.	
Save Changes	Saves changes done so far to any of the setup options.	
Discard Changes	Discards changes done so far to any of the setup options.	
Restore Defaults	Restores / Loads defaults values for all the setup options.	
Save as User Defaults	Saves the changes done so far as User Defaults.	
Restore User Defaults	Restores the user defaults to all the setup options.	

Appendix

This section provides the mapping addresses of peripheral devices and the sample code of watchdog timer configuration.

- I/O Port Address Map
- Interrupt Request Lines (IRQ)

A. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description		
0x0000F090-0x0000F097	Standard SATA AHCI Controller		
0x0000F080-0x0000F083	Standard SATA AHCI Controller		
0x0000F060-0x0000F07F	Standard SATA AHCI Controller		
0x00000A00-0x00000A1F	Motherboard resources		
0x00000A20-0x00000A2F	Motherboard resources		
0x00000A30-0x00000A3F	Motherboard resources		
0x00000A40-0x00000A4F	Motherboard resources		
0x00000A50-0x00000A5F	Motherboard resources		
0x00000A60-0x00000A6F	Motherboard resources		
0x0000002E-0x0000002F	Motherboard resources		
0x0000004E-0x0000004F	Motherboard resources		
0x0000061-0x00000061	Motherboard resources		
0x0000063-0x0000063	Motherboard resources		
0x00000065-0x00000065	Motherboard resources		
0x0000067-0x0000067	Motherboard resources		
0x00000070-0x00000070	Motherboard resources		
0x00000070-0x00000070	System CMOS/real time clock		
0x0000080-0x0000080	Motherboard resources		
0x00000092-0x00000092	Motherboard resources		
0x000000B2-0x000000B3	Motherboard resources		
0x00000680-0x0000069F	Motherboard resources		
0x0000FFFF-0x0000FFFF	Motherboard resources		
0x0000FFFF-0x0000FFFF	Motherboard resources		
0x0000FFFF-0x0000FFFF	Motherboard resources		
0x00001800-0x000018FE	Motherboard resources		
0x0000164E-0x0000164F	Motherboard resources		
0x0000062-0x0000062	Microsoft ACPI-Compliant Embedded Controller		

Address	Device Description		
0x0000066-0x00000066	Microsoft ACPI-Compliant Embedded Controller		
0x0000E000-0x0000EFFF	Mobile 6th/7th Generation Intel(R) Processor Family I/O PCI Express Root Port #1 - 9D10		
0x0000F000-0x0000F03F	Intel(R) Iris(R) Plus Graphics 650		
0x00000020-0x00000021	Programmable interrupt controller		
0x00000024-0x00000025	Programmable interrupt controller		
0x0000028-0x00000029	Programmable interrupt controller		
0x0000002C-0x0000002D	Programmable interrupt controller		
0x0000030-0x00000031	Programmable interrupt controller		
0x00000034-0x00000035	Programmable interrupt controller		
0x0000038-0x00000039	Programmable interrupt controller		
0x0000003C-0x0000003D	Programmable interrupt controller		
0x000000A0-0x000000A1	Programmable interrupt controller		
0x000000A4-0x000000A5	Programmable interrupt controller		
0x000000A8-0x000000A9	Programmable interrupt controller		
0x000000AC-0x000000AD	Programmable interrupt controller		
0x000000B0-0x000000B1	Programmable interrupt controller		
0x000000B4-0x000000B5	Programmable interrupt controller		
0x000000B8-0x000000B9	Programmable interrupt controller		
0x000000BC-0x000000BD	Programmable interrupt controller		
0x000004D0-0x000004D1	Programmable interrupt controller		
0x0000000-0x00000CF7	PCI Express Root Complex		
0x00000D00-0x0000FFFF	PCI Express Root Complex		
0x00000040-0x00000043	System timer		
0x00000050-0x00000053	System timer		
0x00001854-0x00001857	Motherboard resources		
0x0000FF00-0x0000FFFE	Motherboard resources		
0x0000F040-0x0000F05F	Mobile 6th/7th Generation Intel(R) Processor Family I/O SMBUS - 9D23		

B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function		
IRQ 0	System timer		
IRQ 8	System CMOS/real time clock		
IRQ 14	Motherboard resources		
IRQ 55~204	Microsoft ACPI-Compliant System		
IRQ 256~511	Microsoft ACPI-Compliant System		
IRQ 4294967294	Standard SATA AHCI Controller		
IRQ 4294967290	Intel(R) Ethernet Connection (4) I219-V		
IRQ 4294967289	Intel(R) Management Engine Interface		
IRQ 4294967288	Intel(R) Dual Band Wireless-AC 8265		
IRQ 4294967291	Intel(R) Iris(R) Plus Graphics 650		
IRQ 4294967287	Intel(R) Smart Sound Technology (Intel(R) SST) Audio Controller		
IRQ 4294967292	Intel(R) USB 3.0 eXtensible Host Controller - 1.0 (Microsoft)		
IRQ 4294967293	Realtek PCIE CardReader		

C. Watchdog Timer

The Watchdog Timer (WDT) is used to generate a variety of output signals after a user programmable count. The WDT is suitable for the use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven. Under normal circumstance, you will need to restart the WDT at regular intervals before the timer counts to zero.
