Safety Information

Your SI-58 is designed and tested to meet the latest standards of safety for information technology equipment. However, to ensure your safety, it is important that you read the following safety instructions.

Setting up your system

- Read and follow all instructions in the documentation before you operate your system.
- Do not use this product near water.
- Set up the system on a stable surface. Do not secure the system on any unstable plane.
- Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.
- Slots and openings on the chassis are for ventilation. Do not block or cover these
 openings. Make sure you leave plenty of space around the system for ventilation.
 Never insert objects of any kind into the ventilation openings.
- This system should be operated from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.
- Use this product in environments with ambient temperatures between 0°C and 45°C.
- If you use an extension cord, make sure that the total ampere rating of the devices plugged into the extension cord does not exceed its ampere rating.
- DO NOT LEAVE THIS EQUIPMENT IN AN ENVIRONMENT WHERE
 THESTORAGE TEMPERATURE MAY GO BELOW -20° C (-4° F) OR ABOVE
 80° C (176° F). THIS COULD DAMAGE THE EQUIPMENT. THE EQUIPMENT
 SHOULD BE IN A CONTROLLED ENVIRONMENT.

Care during use

- Do not walk on the power cord or allow anything to rest on it.
- Do not spill water or any other liquids on your system.
- When the system is turned off, a small amount of electrical current still flows.
 Always unplug all power, and network cables from the power outlets before cleaning the system.
- If you encounter the following technical problems with the product, unplug the power cord and contact a qualified service technician or your retailer.
 - > The power cord or plug is damaged.
 - Liquid has been spilled into the system.
 - The system does not function properly even if you follow the operating instructions.
 - The system was dropped or the cabinet is damaged.

Lithium-Ion Battery Warning

CAUTION: Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions.

NO DISASSEMBLY

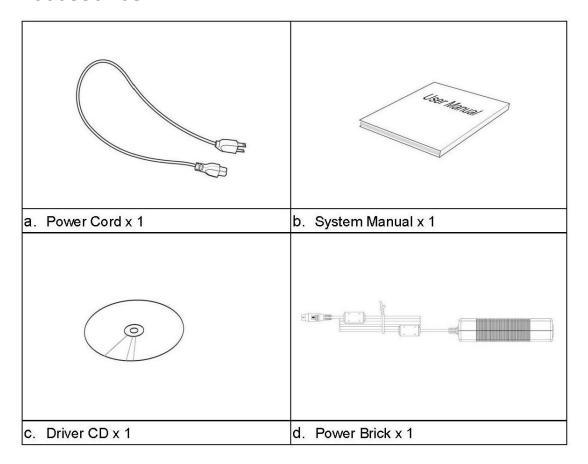

The warranty does not apply to the products that have been disassembled by users

WARNING HAZARDOUS MOVING PARTS KEEP FINGERS AND OTHER BODY PARTS AWAY

Accessories

Components

I/O View

Refer to the diagram below to identify the components on this side of the system.

Power Bottom

The power switch allows powering ON and OFF the system.

HDD

The hard disk LED blinks when data is being written into or read from the hard disk

HDD

The power LED illuminated when system been power on.

HDMI 1/2/3/4/5/6

The HDMI (High Definition Multimedia Interface) (connector 6 exclusive) interface to transmitting uncompressed digital data come from E6760 (discrete graphic chip).

LAN 1/ LAN2

The eight-pin RJ-45 LAN port supports a standard Ethernet cable for connection to a local network.

COM 1/ COM 2

Communication or serial port is compatible with RJ 45 interface without RI (ring indicator) signal.

USB

The USB (Universal Serial Bus) port is compatible with USB devices such as keyboards, mouse devices, cameras, and hard disk drives. USB allows many devices to run simultaneously on a single computer, with some peripheral acting as additional plug-in sites or hubs.

AUDIO

The stereo audio jack (3.5mm) is used to connect the system's audio out signal to amplified speakers or headphones.

DC-IN 12 V

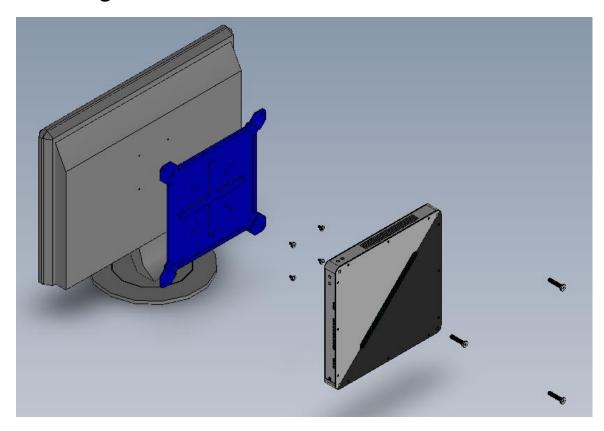

The supplied power adapter converts AC power to DC power for use with this jack. Power supplied through this jack supplies power to the system. To prevent damage to the system, always use the supplied power adapter.

Specification

| System Mainboard | IB958-58 | |
|-----------------------|---|--|
| Construction | SGCC 1.0t | |
| Chassis Color | Black / White | |
| Storage | 2.5" 160GB SATA HDD x 1 | |
| Mounting | Wall mount | |
| Power Supply | 150W DC adapter | |
| Operating Temperature | 0°C ~ 45°C (32°F ~ 113°F) | |
| Storage Temperature | -20°C ~ 80°C | |
| Relative Humidity | 5~90% @45°C (non-condensing) | |
| Vibration | HDD: 0.25 Grms/5~500Hz random operation | |
| Shock | HDD: 15 Grms peak acceleration (11 msec duration) | |
| RoHS | Available | |

[·]This specification is subject to change without prior notice.

Mounting SI-58 to the Wall

You can install SI-58 on plastic (LCD monitor), wood, drywall surface over studs, or a solid concrete or metal plane directly. Ensure the installer uses at least four M3 length 6mm screws to secure the system on wall. Six M3 length 6mm screws are recommended to secure the system on wall.

Fasteners are not included with the unit, and must be supplied by the installer. The types of fasteners required are dependent on the type of wall construction. Choose fasteners that are rated either "Medium Duty" or "Heavy Duty." To assure proper fastener selection and installation, follow the fastener manufacturer's recommendations.

Wall mounting requirements

Note: Before mounting the system on wall, ensure that you are following all applicable building and electric codes.

When mounting, ensure that you have enough room for power and signal cable routing. And have good ventilation for power adapter. The method of mounting must be able to support weight of the SI-58 plus the suspend weight of all the cables to be attached to the system. Use the following methods for mounting your system:

Mounting to hollow walls

- Method 1: Wood surface A minimum wood thickness 38mm (1.5in.) by 25.4 cm (10in.) of high, construction grade wood is recommended.
 Note: This method provides the most reliable attachment of the unit with little risk that the unit will come loose or require ongoing maintenance.
- Method 2: Drywall walls Drywall over wood studs is acceptable.

Mounting to a solid concrete or brick wall - Mounts on a flat smooth surface.

Selecting the location

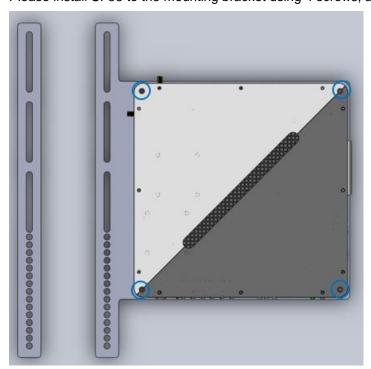

Plan the mounting location thoroughly. Locations such as walkway areas, hallways, and crowded areas are not recommended. Mount the unit to a flat, sturdy, structurally sound column or wall surface.

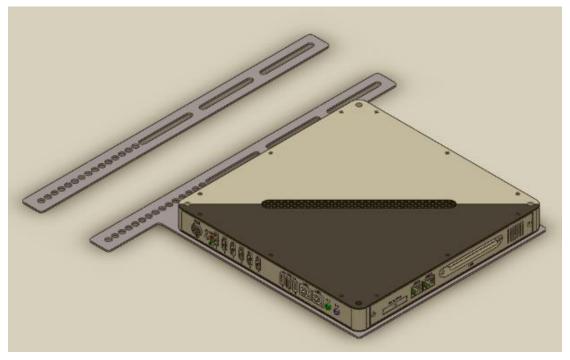

The best mounting surface is a standard countertop, cabinet, table, or other structure that is minimally the width and length of the unit. This recommendation reduces the risk that someone may accidentally walk into and damage the device. Local laws governing the safety of individuals might require this type of consideration.

SI-58 Mounting Bracket Solution

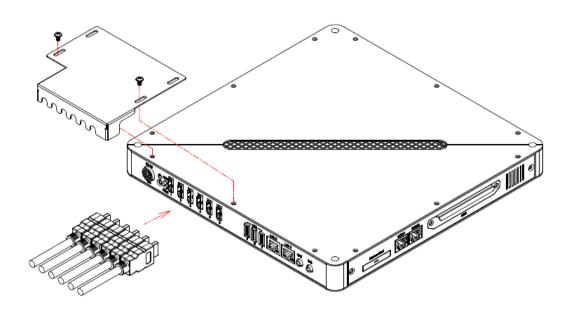

SI-58 mounting bracket (IBASE) part number: SC2SI58----0A1100P

Please install SI-58 to the mounting bracket using 4 screws, as shown in the picture.

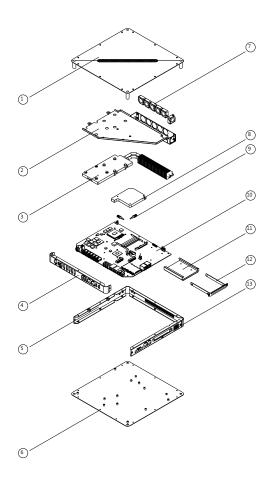

SI-58 Optional HDMI Bracket Kit Solution

Step 1. Make sure the HDMI cables are connected to the corresponding port.

Step 2. Put the HDMI bracket and tighten with the 2 exclusive screws as shown.

Exploded View of the SI-58 assembly

Installation

Installing CPU

The SI-58 (IB958 board) supports rPGA988B socket for Intel® Sandy Bridge Dual Core mobile processors.

The processor socket comes with a screw to secure the processor. As shown in the left picture below, loosen the screw first before inserting the processor. Place the processor into the socket by making sure the notch on the corner of the CPU corresponds with the notch on the inside of the socket. Once the processor has slide into the socket, fasten the screw. Refer to the figures below.

Installing the memory

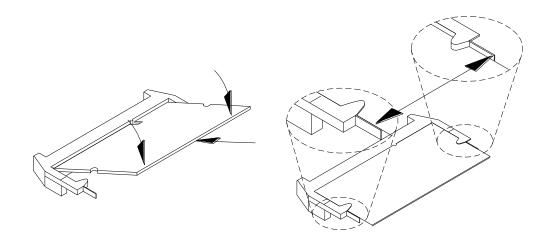

The IB958 board supports two DDR3 memory socket for a maximum total memory of 8GB in DDR3 SO-DIMM memory type.

Installing and Removing Memory Modules

To install the DDR3 modules, locate the memory slot on the board and perform the following steps:

 Hold the DDR3 module so that the key of the DDR3 module aligns with that on the memory slot. Insert the module into the socket at a slight angle (approximately 30 degrees). Note that the socket and module are both keyed, which means that the module can be installed only in one direction.

- 2. To seat the memory module into the socket, apply firm and even pressure to each end of the module until you feel it slip down into the socket.
- 3. With the module properly seated in the socket, rotate the module downward. Continue pressing downward until the clips at each end lock into position.
- 4. To remove the DDR3 module, press the clips with both hands.

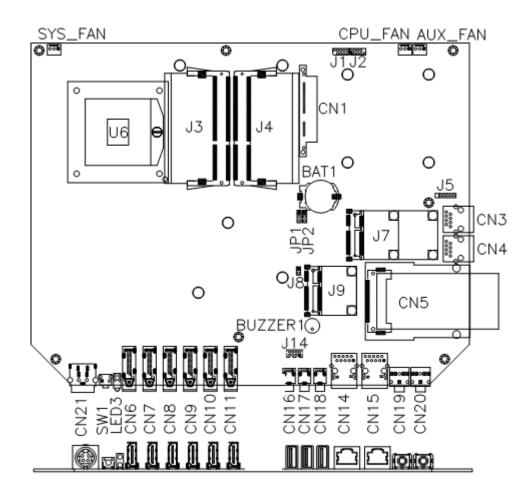

Setting Jumper

Jumpers are used on IB958 to select various settings and features according to your needs and applications. Contact your supplier if you have doubts about the best configuration for your needs. The following lists the connectors on IB958 and their respective functions.

| Jumper Locations on IB958 | Page 15 |
|--|---------|
| JP1: Clear CMOS Contents | Page 15 |
| JP2: Clear ME Contents | Page 16 |

BIOS Setup

BIOS Introduction

The BIOS (Basic Input/Output System) installed in your computer system's ROM supports Intel processors. The BIOS provides critical low-level support for a standard device such as disk drives, serial ports and parallel ports. It also password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Pressing the key immediately allows you to enter the Setup utility. If you are a little bit late pressing the key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup. If you still wish to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again. The following message will appear on the screen:

In general, you press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help and <Esc> to quit.

When you enter the Setup utility, the Main Menu screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

Main BIOS Setup

This setup allows you to record some basic hardware configurations in your computer system and set the system clock.

| | | F4: Save & Exi | Lt |
| | | ESC: Exit | |

Note:

If the system cannot boot after making and saving system changes with Setup, the AMI BIOS supports an override to the CMOS settings that resets your system to its default.

Warning:

It is strongly recommended that you avoid making any changes to the chipset defaults. These defaults have been carefully chosen by both AMI and your system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could cause the system to become unstable and crash in some cases.

Hyper-threading

Enabled for Windows XP and Linux (OS optimized for Hyper-Threading Technology) and Disabled for other OS (OS not optimized for Hyper-Threading Technology). When Disabled, only one thread per enabled core is enabled.

Active Processor Cores

Number of cores to enable in each processor package.

Limit CPUID Maximum

Disabled for Windows XP.

Execute Disable Bit

XD can prevent certain classes of malicious buffer overflow attacks when combined with a supporting OS (Windows Server 2003 SP1, Windows XP SP2, SuSE Linux 9.2, RedHat Enterprise 3 Update 3.)

Hardware Prefetcher

To turn on/off the MLC streamer prefetcher.

Adjacent Cache Line Prefetch

To turn on/off prefetching of adjacent cache lines.

Intel Virtualization Technology

When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology

Local x2APIC

Enable Local x2APIC. Some OSes do not support this.

Shutdown Temperature Configuration

The default setting is Disabled.

| Intel AMT SPI Protected | Disabled | | ESC: Exit |
| AMT CIRA Timeout | 0 | | |
| Watchdog | Disabled | | |
| OS Timer | 0 | | |
| BIOS Timer | 0 | | |
| | | | |

Intel AMT

Enable/Disable Intel® Active Management Technology BIOS Extension. Note: iAMT H/W is always enabled. This option just controls the BIOS extension execution. If enabled, this requires additional firmware in the SPI device.

Intel AMT Setup Prompt

OEMFLag Bit 0:

Enable/Disable Intel AMT Setup Prompt to wait for hot-key to enter setup.

BIOS Hotkey Pressed

OEMFLag Bit 1:

Enable/Disable BIOS hotkey press.

MeBx Selection Screen

OEMFLag Bit 2:

Enable/Disable MEBx selection screen.

Verbose Mebx Output

OEMFLag Bit 3:

Enable/Disable Verbose Mebx Output.

Hide Un-Configure ME Confirmation

OEMFLag Bit 6:

Hide Un-Configure ME without password Confirmation Prompt.

MeBx Debug Message Output

OEMFLag Bit 14:

Enable MEBx debug message output.

Un-Configure ME

OEMFLag Bit 15:

Un-Configure ME without password.

Intel AMT Password Write Enabled

Enable/Disable Intel AMT Password Write. Password is writeable when set Enable.

Amt Wait Timer

Set timer to wait before sending ASF_GET_BOOT_OPTIONS.

ASF

Enable/Disable Alert Specification Format.

Activate Remote Assistance Process

Trigger CIRA boot.

USB Configuration

USB Configuration Parameters.

Aptio Setup Utility

| Main Advanced Ch | nipset Boot | Security | Save & Exit |
|------------------------------|-------------|----------|-----------------------|
| USB Configuration | | | |
| | | | |
| USB Devices: | | | |
| 2 Hubs | | | |
| | | | |
| Legacy USB Support | Enabled | - | → ←Select Screen |
| XHCI Hand-off | Enabled | | ↑ |
| EHCI Hand-off | Enabled | 1 | Enter: Select |
| | | | +- Change Field |
| USB hardware delays and time | outo: | 1 | F1: General Help |
| | | 1 | F2: Previous Values |
| USB transfer time-out | 20 sec | 1 | F3: Optimized Default |
| Device reset time-out | 20 sec | | F4: Save ESC: Exit |
| Device power-up delay | Auto | | |

Legacy USB Support

Enables Legacy USB support.

AUTO option disables legacy support if no USB devices are connected.

DISABLE option will keep USB devices available only for EFI applications.

XHCI Hand-off

This is a workaround for OSes without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.

EHCI Hand-off

This is a workaround for OSes without EHCl hand-off support. The EHCl ownership change should be claimed by EHCl driver.

USB transfer time-out

The time-out value for Control, Bulk, and Interrupt transfers.

Device reset time-out

USB mass storage device Start Unit command time-out.

Device power-up delay

Maximum time the device will take before it properly reports itself to the Host Controller. 'Auto' uses default value: for a Root port it is 100 ms, for a hub port the delay is taken from Hub Descriptor.

Super IO Configuration

System Super IO Chip Parameters.

Aptio Setup Utility

Reset the system after saving the changes.

Discard Changes and Reset

Reset system setup without saving any changes.

Save Changes

Save Changes done so far to any of the setup options.

Discard Changes

Discard Changes done so far to any of the setup options.

Restore Defaults

Restore/Load Defaults values for all the setup options.

Save as User Defaults

Save the changes done so far as User Defaults.

Restore User Defaults

Restore the User Defaults to all the setup options.

Boot Override

Pressing ENTER causes the system to enter the OS.

Launch EFI Shell from filesystem device

Attempts to Launch EFI Shell application (Shellx64.efi) from one of the available filesystem devices.

Drivers Installation

This section describes the installation procedures for software and drivers. The software and drivers are included with the motherboard. If you find the items missing, please contact the vendor where you made the purchase.

IMPORTANT NOTE:

After installing your Windows operating system, you must install first the Intel Chipset Software Installation Utility before proceeding with the drivers installation.

Intel Chipset Software Installation Utility

The Intel Chipset Drivers should be installed first before the software drivers to enable Plug & Play INF support for Intel chipset components. Follow the instructions below to complete the installation.

1. Insert the CD that comes with the board. Click SI-58/IB958-58 Drivers.

2. Click Intel(R) Chipset Software Installation Utility.

3. When the Welcome screen to the Intel® Chipset Device Software appears, click **Next** to continue.

4. Click **Yes** to accept the software license agreement and proceed with the installation process.

5. On the Readme File Information screen, click *Next* to continue the installation.

6. The Setup process is now complete. Click *Finish* to restart the computer and for changes to take effect.

VGA Drivers Installation

To install the VGA drivers, follow the steps below.

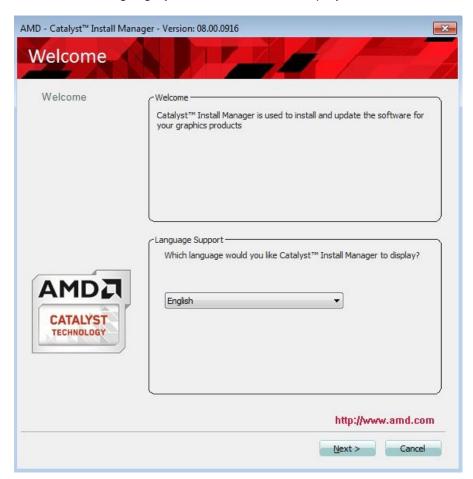

1. Insert the CD that comes with the board. Click SI-58/IB958-58 Drivers.

2. Click AMD Radeon E6760 Graphics Driver.

- 3. When the Welcome screen appears, click *Next* to continue.
- 4. Select the language you would like to be displayed and click Next.

5. Click *Install* to continue the installation process..

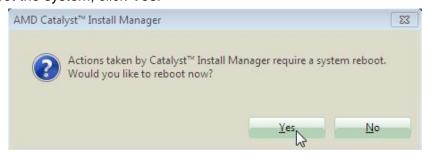

6. Select Express and the installation location and click Next.

7. Click Accept to accept the End User License Agreement.

8. To reboot the system, click Yes.

9. Setup complete. Click *Finish* to restart the computer and for changes to take effect.

Realtek HD Audio Driver Installation

Follow the steps below to install the Realtek HD Audio Drivers.

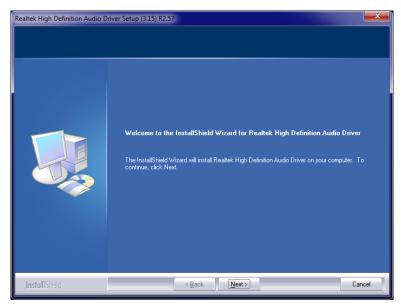

1. Insert the CD that comes with the board. Click SI-58/IB958-58 Drivers.

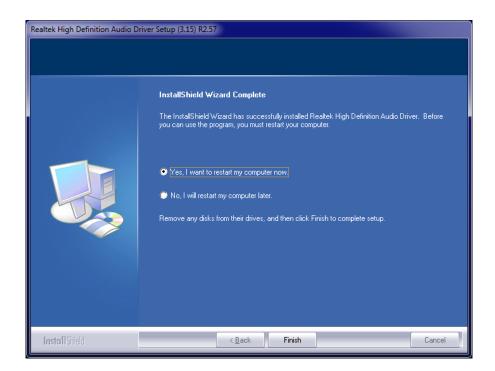

2. Click Realtek High Definition Audio Driver.

3. On the Welcome to the InstallShield Wizard screen, click *Next* to proceed with and complete the installation process.

4. The InstallShield Wizard Complete. Click *Finish* to restart the computer and for changes to take effect.

LAN Drivers Installation

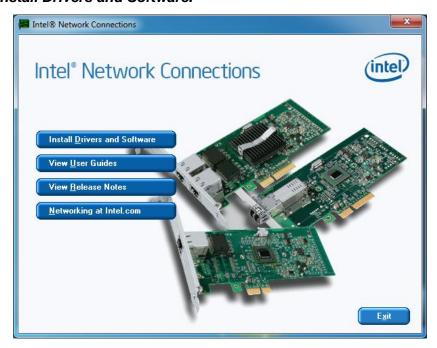

1. Insert the CD that comes with the board. Click SI-58/IB958-58 Drivers.

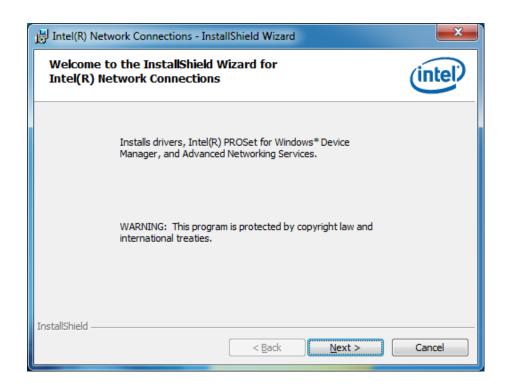

2. Click Intel(R) PRO LAN Network Driver.

3. Click Install Drivers and Software.

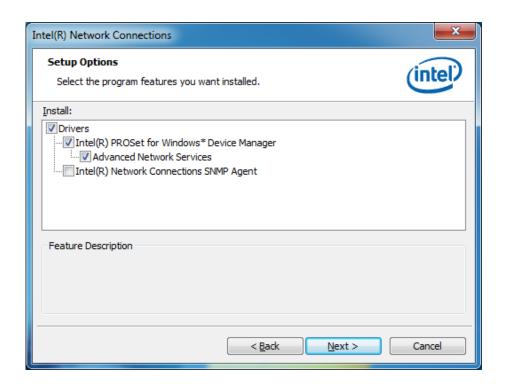

4. When the Welcome screen appears, click Next.

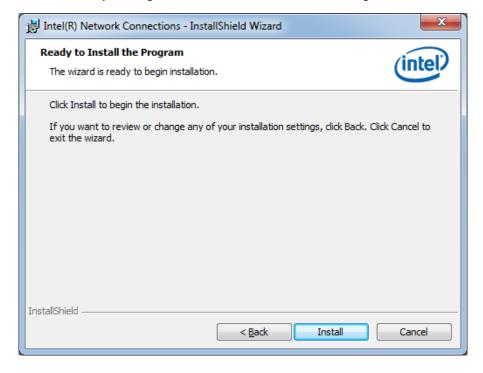

5. Click *Next* to to agree with the license agreement.

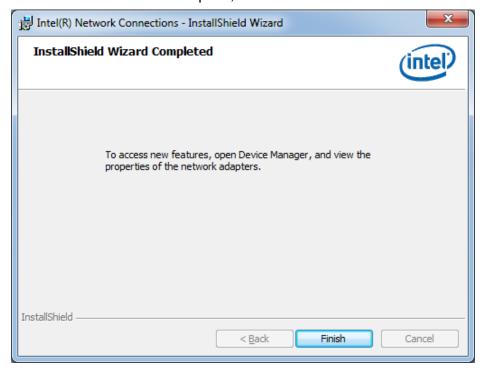

6. Click the checkbox for **Drivers** in the Setup Options screen to select it and click **Next** to continue.

7. The wizard is ready to begin installation. Click *Install* to begin the installation.

8. When InstallShield Wizard is complete, click *Finish*.

Intel® Management Engine Interface

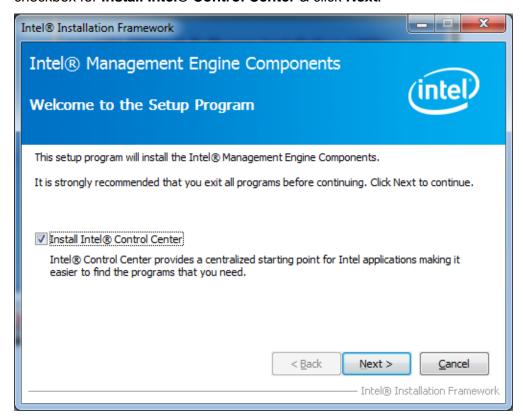

The following application requires Microsoft .NET Framework 3.5 or later: Intel® Management Engine Components. Please install the latest version of Microsoft .NET Framework from Microsoft Download Center to run this application correctly.

Follow the steps below to install the Intel Management Engine.

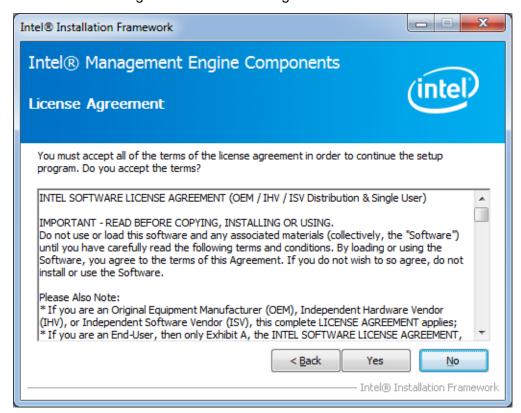

1. Insert the CD that comes with the board. Click *SI-58/IB958-58 Drivers* and then *Intel(R) AMT 8.0 Drivers*.

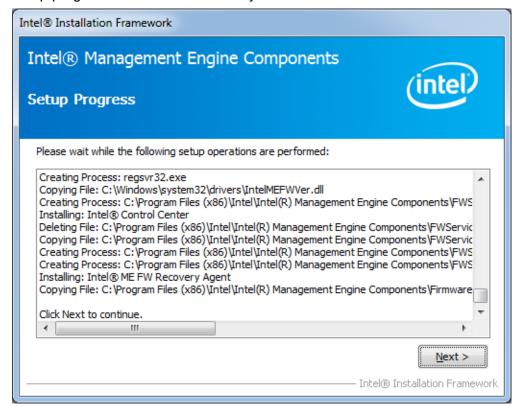

2. When the Welcome screen for Intel® Management Engine Components, click the checkbox for Install Intel® Control Center & click *Next*.

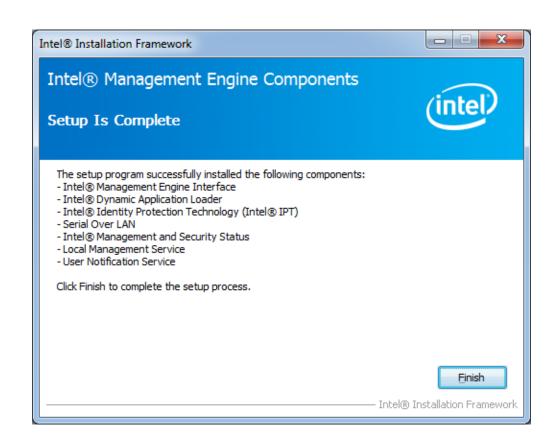

3. Click Yes to to agree with the license agreement.

4. When the Setup Progress screen appears, click **Next**. Then, click **Finish** when the setup progress has been successfully installed.

Intel® USB 3.0 Drivers

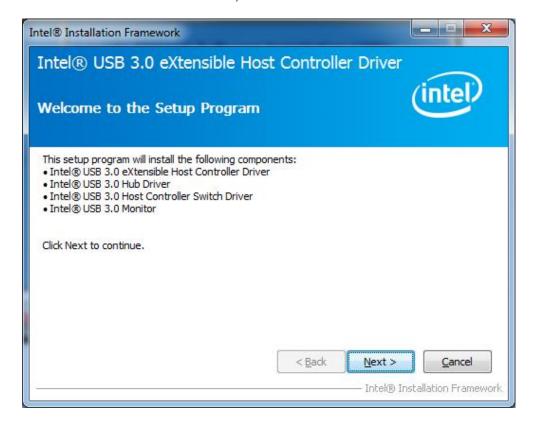

1. Insert the CD that comes with the board. Click SI-58/IB958-58 Drivers.

2. Click Intel(R) USB 3.0 Drivers.

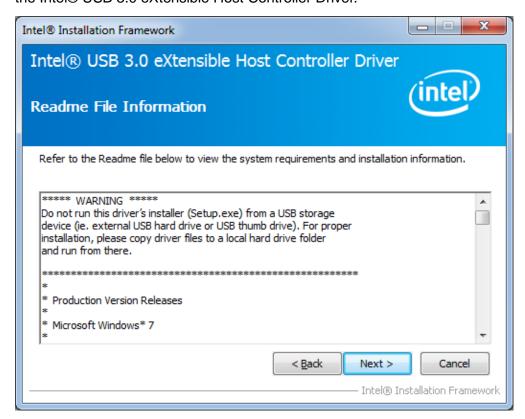

3. When the Welcome screen to the InstallShield Wizard for Intel® USB 3.0 eXtensible Host Controller Driver, click *Next*.

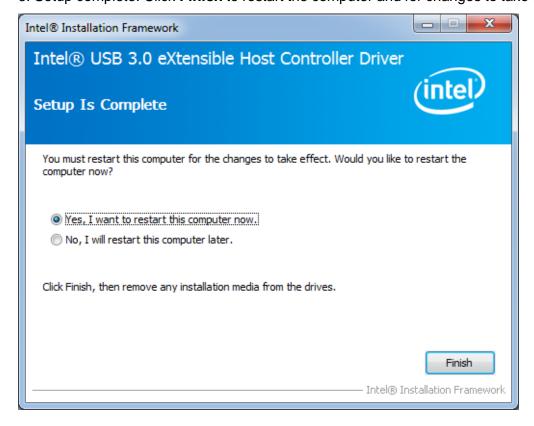

4. Click **Yes** to to agree with the license agreement and continue the installation.

5. On the Readme File Information screen, click *Next* to continue the installation of the Intel® USB 3.0 eXtensible Host Controller Driver.

6. Setup complete. Click *Finish* to restart the computer and for changes to take effect.

Appendix

A. AMD Eyefinity Multiple Display

1. What is AMD Eyefinity Technology?

AMD Eyefinity Technology provides advanced multiple monitor technology delivering an incredibly immersive graphic and computing experience with innovative display capabilities, supporting massive desktop workspaces and super-high resolution signage applications.

An AMD Eyefinity system" means a computer system employing AMD Eyefinity technology and an "AMD Eyefinity resolution" means a resolution achievable using AMD Eyefinity technology.

2. Software versions for SI-58

| SI-58 series | MB Version: (IB958-58 V-1.1) |
|--------------|------------------------------|
| VGA driver | 8.982.17 |

3. Settings

Supported operating systems:

Windows 7 (32-bit & 64-bit)

• Driver Installation:

AMD Eyefinity technology with SI-58 enables a single GPU to support up to 6 independent display outputs simultaneously. Before using the AMD Eyefinity functions on SI-58, you must install both AMD VGA driver and Microsoft .NET Framework 4.0.

AMD Catalyst Driver is now available on the AMD Embedded Developer website: https://wwwd.amd.com/amd/devsite.nsf/edg/e6760.htm. The driver supports up to 6 displays with various AMD Eyefinity SLS grid configurations. Refer to the following table for the supported AMD Eyefinity modes.

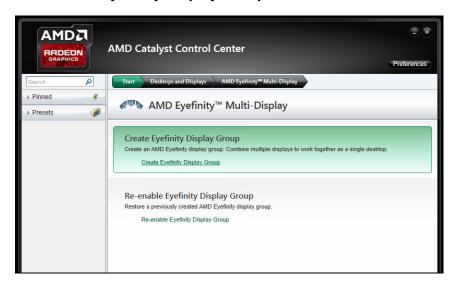

| Number of Displays (pipelines) | Grid Configuration | Supported |
|--------------------------------|--------------------|-----------|
| 6 | 6 x 1 Landscape | No |
| 6 | 6 x 1 Portrait | No |
| 6 | 1 x 6 Landscape | No |
| 6 | 1 x 6 Portrait | No |
| 5 | 5 x 1 Landscape | Yes |
| 5 | 5 x 1 Portrait | Yes |
| 5 | 1 x 5 Landscape | Yes |
| 5 | 1 x 5 Portrait | Yes |
| 4 | 4 x 1 Landscape | Yes |
| 4 | 4 x 1 Portrait | No |
| 4 | 1 x 4 Landscape | No |
| 4 | 1 x 4 Portrait | Yes |
| 6 | 2 x 3 Landscape | No |
| 6 | 2 x 3 Portrait | Yes |
| 6 | 3 x 2 Landscape | Yes |
| 6 | 3 x 2 Portrait | No |
| 4 | 2 x 2 Landscape | Yes |
| 4 | 2 x 2 Portrait | Yes |
| 3 | 3 x 1 Landscape | Yes |
| 3 | 3 x 1 Portrait | Yes |
| 3 | 1 x 3 Landscape | Yes |
| 3 | 1 x 3 Portrait | Yes |
| 2 | 2 x 1 Landscape | Yes |
| 2 | 2 x 1 Portrait | Yes |
| 2 | 1 x 2 Landscape | Yes |
| 2 | 1 x 2 Portrait | Yes |

4. AMD Eyefinity Configuration

Step 1: Click *AMD Eyefinity Multi-Display* for Video wall display configuration setting.

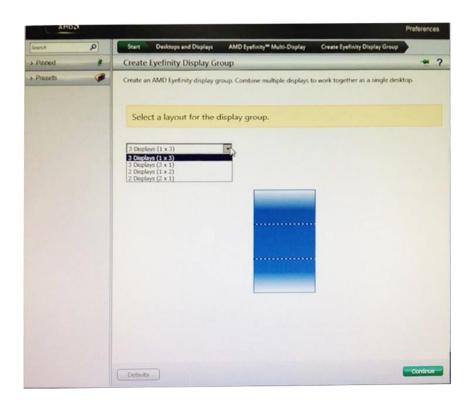

Step 2: Click Create Eyefinity Display Group.

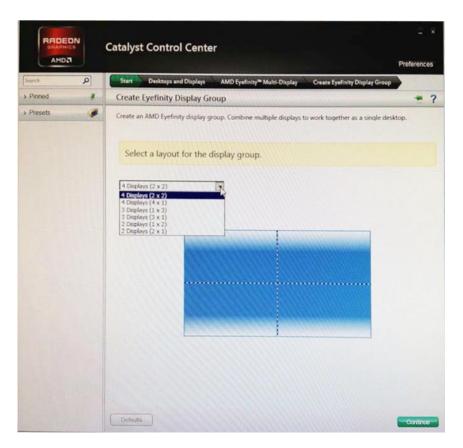

Step 3: Select a layout for the display group from the dropdown list and click *Continued*.

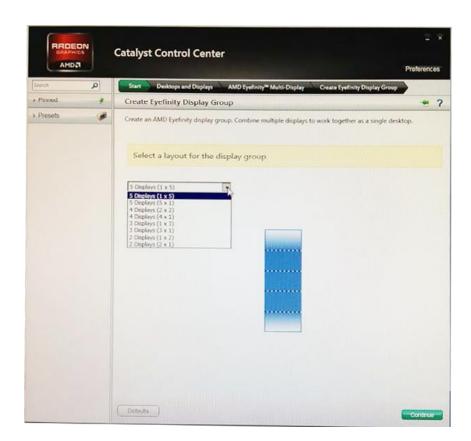

3 displays:

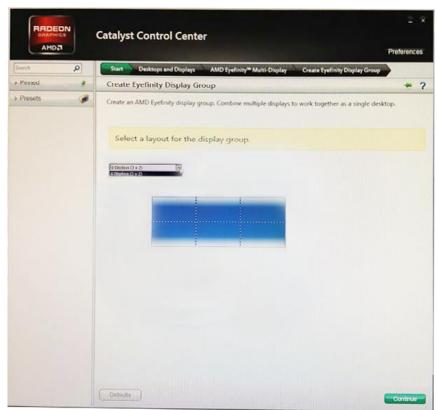

4 displays:

5 displays:

6 displays:

The display layout selected in the wizard reflects the actual physical setup.

For 2 displays output:

• 2 x 1 Landscape Display Group

• 2 x 1 Portrait Display Group

• 1 x 2 Landscape Display Group

• 1 x 2 Portrait Display Group

For 3 displays output:

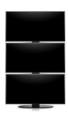

3 x 1 Landscape Display Group

• 3 x 1 Portrait Display Group

• 1 x 3 Landscape Display Group

• 1 x 3 Portrait Display Group

For 4 displays output:

• 4 x 1 Landscape Display Group

• 1 x 4 Portrait Display Group

• 2 x 2 Landscape Display Group

• 2 x 2 Portrait Display Group

For 5 displays output:

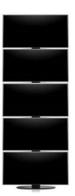

5 x 1 Landscape Display Group

5 x 1 Portrait Display Group

• 1 x 5 Landscape Display Group

• 1 x 5 Portrait Display Group

For 6 displays output:

• 3 x 2 Landscape Display Group

• 2 x 3 Portrait Display Group

B. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

| Address | Device Description |
|-------------|-----------------------------|
| 000h - 01Fh | DMA Controller #1 |
| 020h - 03Fh | Interrupt Controller #1 |
| 040h - 05Fh | Timer |
| 060h - 064h | Keyboard Controller |
| 070h - 07Fh | Real Time Clock, NMI |
| 080h - 09Fh | DMA Page Register |
| 0A0h - 0BFh | Interrupt Controller #2 |
| 0C0h - 0DFh | DMA Controller #2 |
| 0F0h | Clear Math Coprocessor Busy |
| | Signal |
| 0F1h | Reset Math Coprocessor |
| E000-E01F | Network Connection |
| F060-F07F | Network Connection |
| F080-F0D7 | SATA Storage Controller |
| 2F8h - 2FFh | Serial Port #2(COM2) |
| 3B0h- 3BBh | Graphics adapter Controller |
| 3F8h - 3FFh | Serial Port #1(COM1) |
| 3D0h - 3DFh | CGA adapter |
