(hereinafter referred to as "IBASE").

Disclaimer

IBASE reserves the right to make changes and improvements to the products described in this document without prior notice. Every effort has been made to ensure the information in the document is correct; however, IBASE does not guarantee this document is error-free. IBASE assumes no liability for incidental or consequential damages arising from misapplication or inability to use the product or the information contained herein, nor for any infringements of rights of third parties, which may result from its use.

Trademarks

All the trademarks, registrations and brands mentioned herein are used for identification purposes only and may be trademarks and/or registered trademarks of their respective owners.

Compliance

In a domestic environment, this product may cause radio interference in which case users may be required to take adequate measures.

This product has been tested and found to comply with the limits for a Class B device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with manufacturer's instructions, may cause harmful interference to radio communications.

WEEE

This product must not be disposed of as normal household waste, in accordance with the EU directive of for waste electrical and electronic equipment (WEEE - 2012/19/EU). Instead, it should be disposed of by returning it to a municipal recycling collection point. Check local regulations for disposal of electronic products.

Green IBASE

This product is compliant with the current RoHS restrictions and prohibits use of the following substances in concentrations exceeding 0.1% by weight (1000 ppm) except for cadmium, limited to 0.01% by weight (100 ppm).

- Lead (Pb)
- Mercury (Hg)
- Cadmium (Cd)
- Hexavalent chromium (Cr6+)
- Polybrominated biphenyls (PBB)
- Polybrominated diphenyl ether (PBDE)

Important Safety Information

Carefully read the precautions before using the device.

Environmental conditions:

- Lay the device horizontally on a stable and solid surface in case the device may fall, causing serious damage.
- Leave plenty of space around the device and do not block the openings for ventilation. NEVER DROP OR INSERT ANY OBJECTS OF ANY KIND INTO THE VENTILATION OPENINGS.
- Use this product in environments with ambient temperatures between 0°C and 45°C.
- DO NOT LEAVE THIS DEVICE IN AN ENVIRONMENT WHERE THE STORAGE TEMPERATURE MAY BE BELOW -20° C OR ABOVE 80° C. This could damage the device. The device must be used in a controlled environment.

Care for your IBASE products:

- Before cleaning the device, turn it off and unplug all cables such as power in case a small amount of electrical current may still flow.
- Use neutral cleaning agents or diluted alcohol to clean the device chassis with a cloth. Then wipe the chassis with a dry cloth.
- Vacuum the dust with a computer vacuum cleaner to prevent the air vent or slots from being clogged.

WARNING

Attention during use:

- Do not use this product near water.
- Do not spill water or any other liquids on your device.
- Do not place heavy objects on the top of the device.
- Operate this device from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your distributor or local power company.
- Do not walk on the power cord or allow anything to rest on it.
- If you use an extension cord, make sure that the total ampere rating of the product plugged into the extension cord does not exceed its limits.

Avoid Disassembly

Do not disassemble, repair or make any modification to the device. Doing so could generate hazards and cause damage to the device, even bodily injury or property damage, and will void any warranty.

CAUTION

There is danger of explosion if internal lithium-ion battery is replaced by an incorrect type. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions.

Warranty Policy

- **IBASE standard products:**

24-month (2-year) warranty from the date of shipment. If the date of shipment cannot be ascertained, the product serial numbers can be used to determine the approximate shipping date.

- **3rd-party parts:**

12-month (1-year) warranty from delivery for the 3rd-party parts that are not manufactured by IBASE, such as CPU, CPU cooler, memory, storage devices, power adapter, panel and touchscreen.

* PRODUCTS, HOWEVER, THAT FAIL DUE TO MISUSE, ACCIDENT, IMPROPER INSTALLATION OR UNAUTHORIZED REPAIR SHALL BE TREATED AS OUT OF WARRANTY AND CUSTOMERS SHALL BE BILLED FOR REPAIR AND SHIPPING CHARGES.

Technical Support & Services

1. Visit the IBASE website at www.ibase.com.tw to find the latest information about the product.
2. If you need any further assistance from your distributor or sales representative, prepare the following information of your product and elaborate upon the problem.
 - Product model name
 - Product serial number
 - Detailed description of the problem
 - The error messages in text or in screenshots if there is any
 - The arrangement of the peripherals
 - Software in use (such as OS and application software, including the version numbers)
3. If repair service is required, you can download the RMA form at <http://www.ibase.com.tw/english/Supports/RMAService/>. Fill out the form and contact your distributor or sales representative.

General Information

The information provided in this chapter includes:

- Features
- Packing List
- Accessories
- Specifications
- Product View
- Dimensions

1.1 Introduction

The SI-624-AI is a power-packed industrial AI computer with NVIDIA Ampere MXM GPU that is designed to meet the demands of high-speed multiple tasks for artificial neural network applications. Powered by the 12th/13th Gen Intel® Core™ CPU, this cutting-edge system delivers image processing capabilities that enable real-time analysis of visual data, enhancing automation, quality control, and overall production efficiency for AIoT applications in smart factory, retail, transportation or medical fields. It is suitable for use as a digital signage control system in mission-critical control rooms in transportation networks, smart retail, healthcare, or medical fields where remote AI data analysis capabilities are required.

The compact SI-624-AI features four DP++ outputs for simultaneous high-resolution displays in multi-monitor configurations and reliably delivers high-quality live video or AI analytics content with 4x 4K or 2x 8k display outputs, enabling institutions to connect and communicate with their audiences. It is equipped with iSMART intelligent energy-saving and Observer remote monitoring technologies to reduce energy consumption and minimize downtime.

1.2 Features

- iSMART intelligent energy-saving & Observer remote monitoring technologies
- 12th/13th Gen Intel® Desktop Core™ i7/i5/i3 / Pentium® / Celeron® QC/DC processors
- 4x DDR4-3200 UDIMM, Max.128GB
- NVIDIA Ampere Architecture MXM GPU cards (Type A/B, up to 115W)
- 4x DP++ output
- 1x M.2 B-Key (3052) for 5G or LTE options
- 1x M.2 E-Key (2230) & 2x M.2 M-Key (2280) for Wi-Fi, Bluetooth, capture or storage options
- Supports OOB function via I210 LAN port (optional)
- Supports TPM 2.0

1.3 Packing List

Your product package should include the items listed below. If any of the items below is missing, contact the distributor or the dealer from whom you purchased the product.

- SI-624-AI
- Power Adaptor
- Power Cord
- Cable Bracket

1.4 Specifications

Model Name	SI-624-AI
Mainboard	MBD624
Operating System	Windows 10 & Linux
CPU	12th/13th Gen Intel® RPL-PS Core™ processors
CPU Socket	LGA1700
Chipset	Q670E/R680E PCH
Memory	4x DDR4-3200 SO DIMM, Max. 128GB
Graphics	12th/13th Gen Intel® Core™ i9/i7/i5/i3 processors integrated
LAN	2x Gigabit LAN
Expansion Slots	<ul style="list-style-type: none">• 1x M.2 E-Key (2230)• 1x M.2 B-Key (3052)• 1x M.2 (M-Key, type:2280, supports NVMe with PCI-E(x4) Gen.4 signal only)• 1x M.2 (M-Key, type:2280 , supports PCIe Gen.3 & SATA)• 1x UIM/SIM card slot• 1x MXM 3.1 Type-B
I/O Interface	<ul style="list-style-type: none">• 1x HDMI 1.4 for console• 4x DisplayPort• 4x USB 3.0• 2x RJ45 for Gigabit LAN• COM1 & COM2: RS-232/422/485 (jumper-less selection)• 1x Audio connector for Line-in/out/MIC• 1x Power / HDD LED• 1x Power button• 1x Power jack connector

Storage	2x M.2 NVMe SSD drive bay
Auto Control and Monitoring	Watchdog Timer: 256 segments, 0, 1, 2...255 (sec/min)
Power Requirement	+19V DC
Construction	SGCC
Weight	3.8kg (8.38lbs)
Chassis Color	Black and white
Power Supply	270W power adaptor
Mounting	Standard system bracket
Dimensions	329.2mm(W) x 210mm(D) x73.1mm(H) 129.6"(W) x 82.6"(D) x 28.7"(H)
Environment	
Temperature	<ul style="list-style-type: none"> • Operating: 0°C~ 45°C (32°F~113°F) • Storage: -20°C ~ 80°C (-4°F~176°F)
Relative Humidity	5 ~ 90% at 45 °C (non-condensing)
Vibration Protection	SSD: random operation 5 grms, 5~500 Hz
Others	
Certification	CE, FCC class-B, UL & CCC
Operating System	Windows 10 / Linux

All specifications are subject to change without prior notice.

Chapter 2

Hardware Installation & Motherboard Information

The information provided in this chapter includes:

- Installation of memory and M.2 cards
- Information and locations of connectors

2.1 Installation / Replacement

To access the parts on the motherboard for the purpose of removal, installation or replacement of components such as memory modules or M.2 cards, remove the two screws and slide the device cover backwards to remove it.

2.1.1 Memory

To install the modules, locate the memory slot on the motherboard and perform the following steps:

1. Press the ejector tab of the memory slot down and outwards with your fingertips.

2. Hold the memory module and align the key of the module with that on the memory slot.
3. Gently push the module down in an upright position until it touches the bottom of the slot, at which point the ejector tabs will close to hold the module in place..

To remove the module, press the ejector tabs outwards with your fingertips to eject the module.

2.1.2 M.2 Cards

To remove and install the mini PCIe or M.2 card, remove the device cover as mentioned in the previous section and locate that card socket for removal or installation.

1. Locate the M.2 slot inside the device.
2. Align the key of the M.2 card to the interface, and insert the card slantwise.
3. Push the M.2 card down and fix it with an M3 screw.

Remarks: The M.2 card connectors in the system are:

- J7: M.2 2280 M-Key Socket
- J15: M.2 2230 E-key Socket
- J17: M.2 3053 B-Key Socket
- J22: M.2 2280 M-Key Socket

2.1.3 WiFi / 3G / 4G Antenna Installation

Thread the WiFi/3G/4G antenna extension cable through an antenna hole of the front I/O cover and fasten the antenna as shown below. Then apply adhesive to the edge of the hex nut behind the front I/O cover to prevent the extension cable from falling if the cable becomes loose.

1. Thread the washer and then fasten the hex nut.

2. Apply adhesive to the specified area on the hex nut

Info: The diameter of the nut is around 6.35 mm (0.25"-36UNC).

2.1.4 Mounting Installation

Requirements

Before mounting the system, ensure that you have enough room for the power adaptor and signal cable routing, and have good ventilation for the power adaptor.

Wall Mounting Installation

1. Turn your device upside down. Attach the wall-mount kit (2 brackets) to the device and secure with the supplied screws.

2. Prepare 4 screws (M3) to install the device on the wall.

You can also install the wall mount kit onto the side of the device as shown.

2.2 Setting the Jumpers

Set up and configure your SI-613 by using jumpers for various settings and features according to your needs and applications. Contact your supplier if you have doubts about the best configuration for your use.

Jumpers are short-length conductors consisting of several metal pins with a non-conductive base mounted on the circuit board. Jumper caps are used to have the functions and features enabled or disabled. If a jumper has 3 pins, you can connect either PIN1 to PIN2 or PIN2 to PIN3 by shorting.

Refer to the illustration below to set jumpers.

Pin closed	Oblique view	Illustration
Open		
1-2		
2-3		

When two pins of a jumper are encased in a jumper cap, this jumper is **closed**, i.e. turned **On**.

When a jumper cap is removed from two jumper pins, this jumper is **open**, i.e. turned **Off**.

2.3 Jumper & Connector Locations on Motherboard

Motherboard: MBD624

Chapter 3

Driver Installation

The information provided in this chapter includes:

- Intel® Chipset Software Installation Utility
- HD Audio Driver Installation
- LAN Driver Installation
- Intel® Management Engine Component Drivers Installation
- NVIDIA® GeForce® MXM Driver Installation

3.1 Introduction

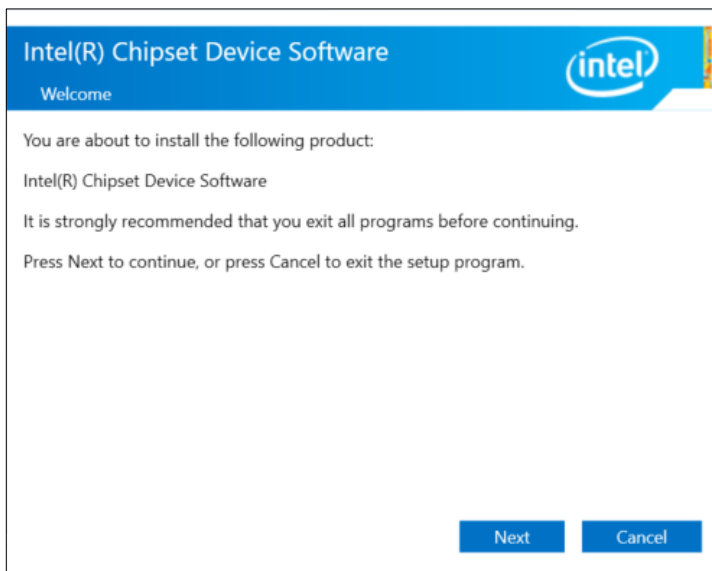

This section describes the installation procedures for software drivers. The software drivers are available on IBASE website www.ibase.com.tw. Register as a member of our website to download all the necessary drivers and extract for installation.

Note: After installing your Windows operating system, you must install the Intel® Chipset Software Installation Utility first before proceeding with the drivers installation.

3.2 Intel® Chipset Software Installation Utility

The Intel® Chipset drivers should be installed first before the software drivers to install INF files for Plug & Play function for the chipset components. Follow the instructions below to complete the installation.

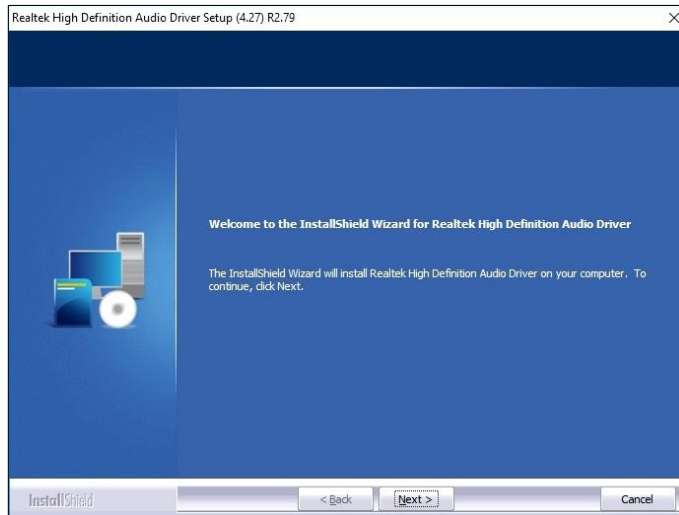

1. Run the **Setup.exe** file.
2. When the *Welcome* screen to the Intel® Chipset Device Software appears, click **Next** to continue.

3. Accept the license agreement and proceed with the installation process.
4. When the driver is completely installed, restart the computer for changes to take effect.

3.3 HD Audio Driver Installation

1. Run the **Setup.exe** file.
2. On the *Welcome* screen of the InstallShield Wizard, click **Next**.

3. When the driver is completely installed, restart the computer for changes to take effect.

3.4 LAN Driver Installation

1. Run the **Setup.exe** file.
2. On the *Welcome* screen of the InstallShield Wizard, click **Next**.

3. Accept the license agreement and click **Next** to continue.

On the *Setup Options* screen, tick the checkbox to select the desired driver(s) and click **Next** for installation. When the driver is completely installed, restart the computer for changes to take effect.

3.5 Intel® Management Engine Components Drivers Installation

1. Run the **Setup.exe** file.
2. When the *Welcome* screen appears, click **Next**.

3. Accept the license agreement and click **Next** for installation.
4. The driver has been completely installed. Restart the computer for changes to take effect.

3.6 NVIDIA® GeForce® MXM Driver Installation

1. Download the driver from NVIDIA's website or IBASE's website.
2. Accept the software license agreement and start installation.
3. Click **Close** to finish the installation.

Chapter 4

BIOS Setup

This chapter describes the different settings available in the AMI BIOS that comes with the board. The topics covered in this chapter are as follows:

- Main Settings
- Advanced Settings
- Chipset Settings
- Security Settings
- Boot Settings
- Save & Exit

4.1 Introduction

The BIOS (Basic Input/Output System) installed in the ROM of your computer system supports Intel® processors. The BIOS provides critical low-level support for standard devices such as disk drives, serial ports and parallel ports. It also provides password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

4.2 BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Press the key immediately allows you to enter the Setup utility. If you are a little bit late pressing the key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup.

If you still need to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again.

The following message will appear on the screen:

```
Press <DEL> to Enter Setup
```

In general, press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help, and <Esc> to quit.

When you enter the BIOS Setup utility, the Main Menu screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

Warning: Making changes to the chipset defaults is strongly discouraged. These defaults, set by AMI and your system manufacturer, are optimized for maximum performance and reliability. Altering these settings could potentially make the system unstable and lead to crashes.

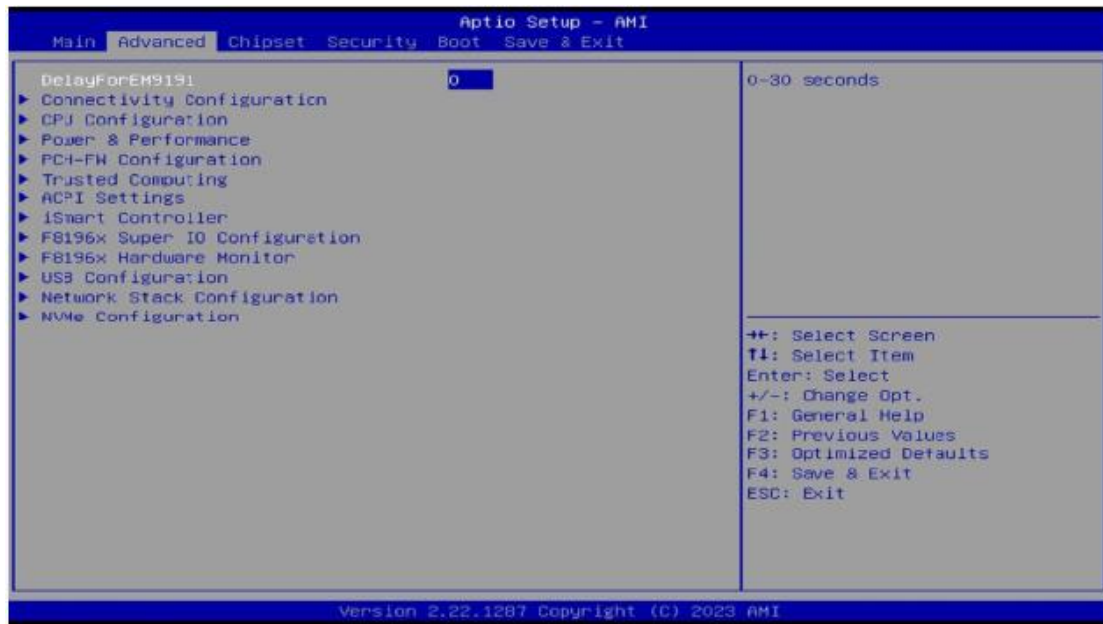

4.3 Main Settings

BIOS Setting	Description
System Date	Sets the date. Use the <Tab> key to switch between the date elements.
System Time	Set the time. Use the <Tab> key to switch between the time elements.

4.4 Advanced Settings

This section allows you to configure, improve your system and allows you to set up some system features according to your preference.

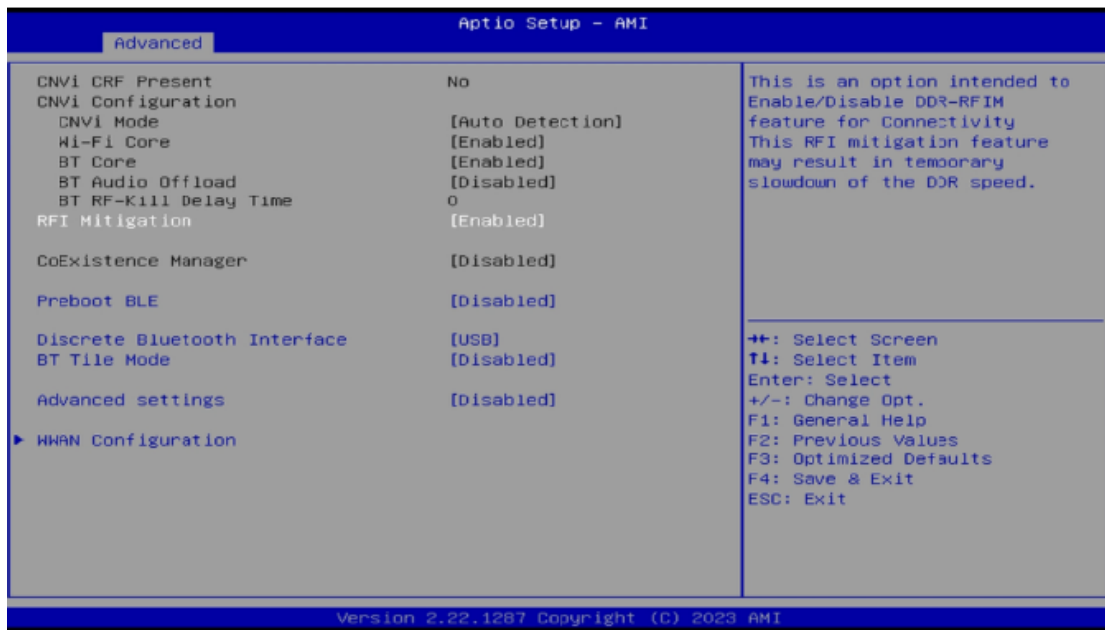

4.4.1 ACPI Settings

BIOS Setting	Description
Enable Hibernation	Enables or Disables System ability to hibernate (OS/S4 Sleep State). This option may not be effective with some OS.
ACPI Sleep State	Select the highest ACPI sleep state the system will enter when the SUSPEND button is pressed.

4.4.2 Connectivity Configuration

BIOS Setting	Description
RFI Mitigation	This is an option intended to enable/disable DDR-RFIM feature for connectivity. This RFI mitigation feature may result in temporary slowdown of the DDR speed.
Preboot BLE	This will be used to enable Preboot Bluetooth function
Discrete Bluetooth Interface	Seriallo UART0 needs to be enabled to select BT interface.
BT Tile Mode	Enable/Disable Tile
Advanced settings	Configure ACPI objects for wireless devices.
WWAN Configuration	Configure WWAN related options
WWAN Device	Select the M.2 WWAN device options to enable 4G – 7360/7560 (Intel), 4G – MB0 (MediaTek) Modems

4.4.3 CPU Configuration

BIOS Setting	Description
Intel (VMX) Virtualization Technology	When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology.
Active Performance Cores	Number of P-cores to enable in each processor package. Note: Number of cores and E-cores are looked at together. When both are [0,0], Pcode will enable all cores.
Hyper-Threading	Enable or Disable Hyper-Threading Technology

4.4.4 F8196x Hardware Monitor

BIOS Setting	Description
CPU Smart Fan Control	Disable or set fan control for CPU_FAN1 at 50°C, 60°C, 70°C or 80°C.
Temperatures / Voltages	These fields are the parameters of the hardware monitoring function feature of the motherboard. The values are read-only values as monitored by the system and show the PC health status.

4.4.6 iSmart Controller

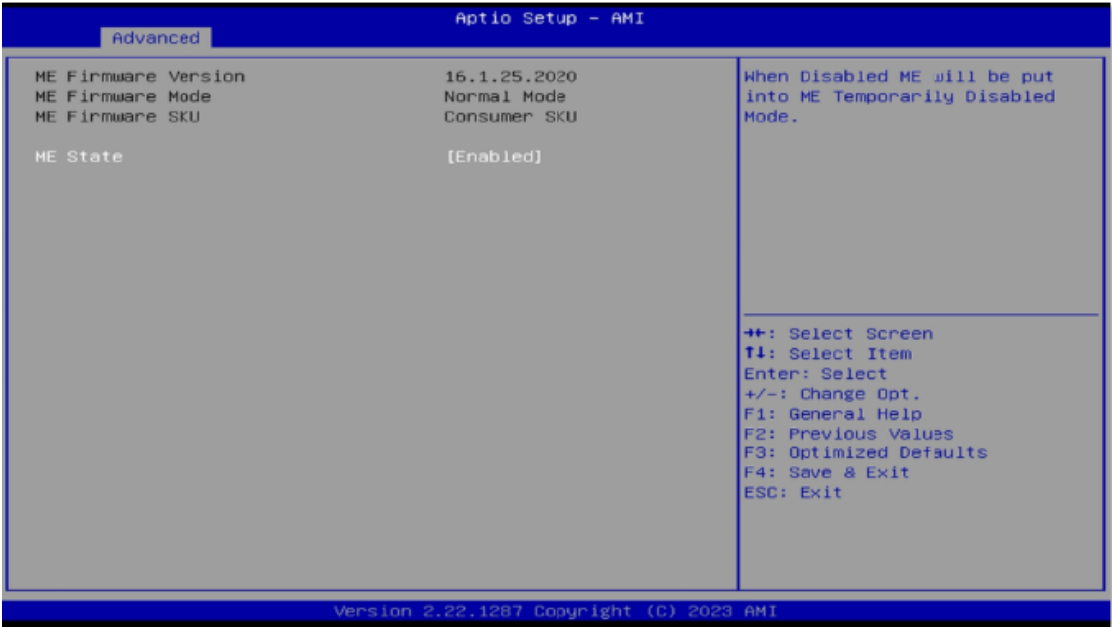

BIOS Setting	Description
Power-On after Power failure	Enables / Disables the system to be turned on automatically after a power failure.
PWR Resume Delay	Enables / Disables Power on resume delay
Temperature Guardian	Default: Disable
Schedule Slot 1 / 2	<p>Sets up the hour / minute for system power-on.</p> <p>Important: If you would like to set up a schedule between adjacent days, configure two schedule slots.</p> <p>For example, if setting up a schedule from Wednesday 5 p.m. to Thursday 2 a.m., configure two schedule slots. But if setting up a schedule from 3 p.m to 5 p.m. on Wednesday, configure only a schedule slot.</p>

4.4.7 Network Stack Configuration

BIOS Setting	Description
Network Stack	Enables / Disables UEFI Network Stack.

4.4.8 PCH-FW Configuration

4.4.9 Power & Performance

CPU - Power Management Control Intel(R) SpeedStep(tm) [Enabled] Intel(R) Speed Shift Technology [Enabled] Turbo Mode [Enabled]	Allows more than two frequency ranges to be supported.
CPU - Power Management Control Intel(R) SpeedStep(tm) [Enabled] Intel(R) Speed Shift Technology [Enabled] Turbo Mode [Enabled]	Enable/Disable Intel(R) Speed Shift Technology support. Enabling will expose the CPPC v2 interface to allow for hardware controlled P-states.
CPU - Power Management Control Intel(R) SpeedStep(tm) [Enabled] Intel(R) Speed Shift Technology [Enabled] Turbo Mode [Enabled]	Enable/Disable processor Turbo Mode (requires EMTTM enabled too). AUTO means enabled.

BIOS Setting	Description
CPU – Power Management Control	CPU power management control options.
Intel(R) Speed Shift Technology Turbo Mode	Allows more than two frequency ranges to be supported.
Intel (R) Speed Shift Technology	Enable/Disable Intel(R) Speed Shift Technology support. Enabling will expose the CPPC v2 interface to allow for hardware controlled P-states.
Turbo Mode	Enable/Disable processor Turbo Mode (requires EMTTM enabled too). AUTO means enabled.

4.4.10 Trusted Computing

BIOS Setting	Description
Security Device Support	Enables / Disables BIOS support for security device. OS will not show security device. TCG EFI protocol and INT1A interface will not be available.
SHA256 PCR Bank	Enables / Disables SHA256 PCR Bank.
Pending operation	Schedule an operation for the security device. Note: Your computer will reboot during restart in order to change state of security device.
Platform Hierarchy	Enables / Disables platform hierarchy.
Storage Hierarchy	Enables / Disables storage hierarchy.
Endorsement Hierarchy	Enables / Disables endorsement hierarchy.
Physical Presence Spec Version	Select to tell O.S. to support PPI Spec Version 1.2 or 1.3. Note some HCK tests might not support 1.3.
Device Select	TPM 1.2 will restrict support to TPM 1.2 devices. TPM 2.0 will restrict support to TPM 2.0 devices. Auto will support both with the default set to TPM 2.0 devices if not found, TPM 1.2 devices will be enumerated.

4.4.11 USB Configuration

BIOS Setting	Description
Legacy USB Support	<ul style="list-style-type: none"> Enable: Enables Legacy USB Support. Auto: Disables legacy support if no USB devices are connected. Disable: Keeps USB devices available only for EFI applications.
XHCI Hand-off	This is a workaround for OSES without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.
USB Mass Storage Driver Support	Enables / Disables the support for USB mass storage driver.
USB Transfer time-out	The time-out value for Control, Bulk, and Interrupt transfers.
Device reset time-out	Seconds of delaying execution of start unit command to USB mass storage device.
Device power-up delay	The maximum time the device will take before it properly reports itself to the Host Controller. "Auto" uses default value for a Root port it is 100ms. But for a Hub port, the delay is taken from Hub descriptor.

4.4.12 Network Stack Configuration

4.5 Chipset Settings

4.5.1 System Agent (SA) Configuration

Aptio Setup - AMI	
Main Advanced Chipset Security Boot Save & Exit	
▶ System Agent (SA) Configuration ▶ PCH-IO Configuration	System Agent (SA) Parameters

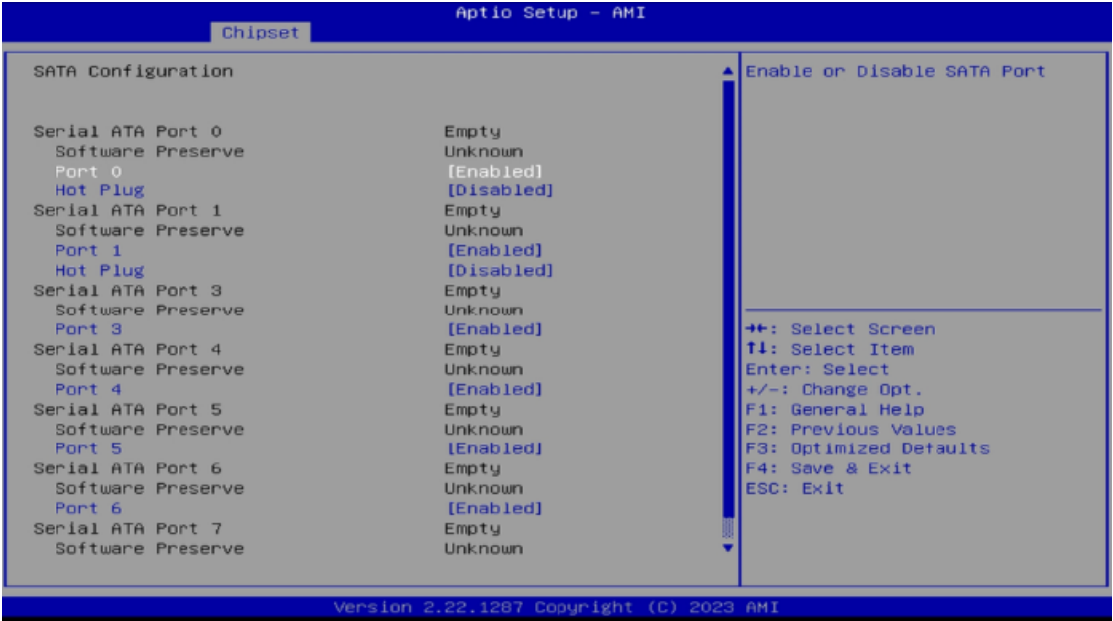

4.5.1.1. Graphics Configuration:

System Agent (SA) Configuration VT-d Supported ▶ Graphics Configuration ▶ VMD setup menu VT-d [Enabled] Control Iommu Pre-boot Behavior [Disable IOMMU]	Graphics Configuration
System Agent (SA) Configuration VT-d Supported ▶ Graphics Configuration ▶ VMD setup menu VT-d [Enabled] Control Iommu Pre-boot Behavior [Disable IOMMU]	VMD Configuration settings
System Agent (SA) Configuration VT-d Supported ▶ Graphics Configuration ▶ VMD setup menu VT-d [Enabled] Control Iommu Pre-boot Behavior [Disable IOMMU]	VT-d capability
System Agent (SA) Configuration VT-d Supported ▶ Graphics Configuration ▶ VMD setup menu VT-d [Enabled] Control Iommu Pre-boot Behavior [Disable IOMMU]	Enable IOMMU in Pre-boot environment (If DMAR table is installed in DXE and If VTD_INFO_PPI is installed in PEI.)

4.5.2 PCH-IO Configuration

Aptio Setup - AMI	
Main Advanced Chipset Security Boot Save & Exit	
▶ System Agent (SA) Configuration ▶ PCH-IO Configuration	PCH Parameters
PCH-IO Configuration ▶ SATA Configuration ▶ USB Configuration	SATA Device Options Settings

4.5.2.1 SATA Configuration:

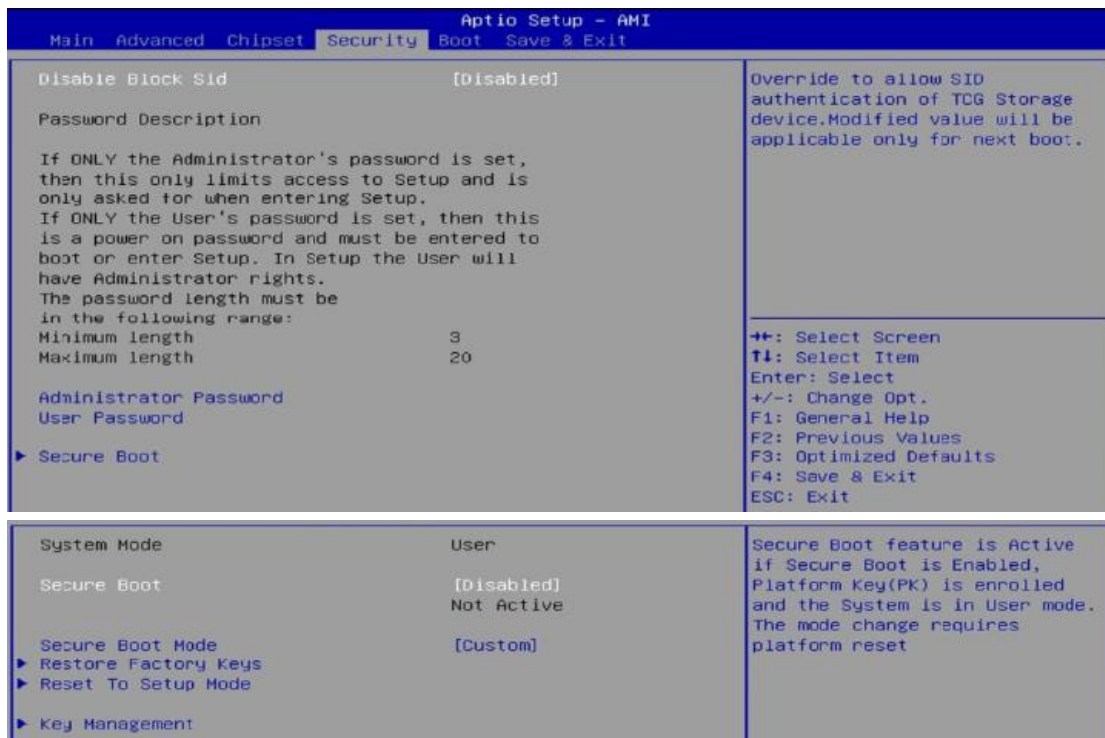

BIOS Setting	Description
SATA Configuration	SATA device options and settings
Serial ATA Port	Enables / Disables Serial Port
Hot Plug	Designates the port as Hot Pluggable.

4.5.2.2 USB Configuration:

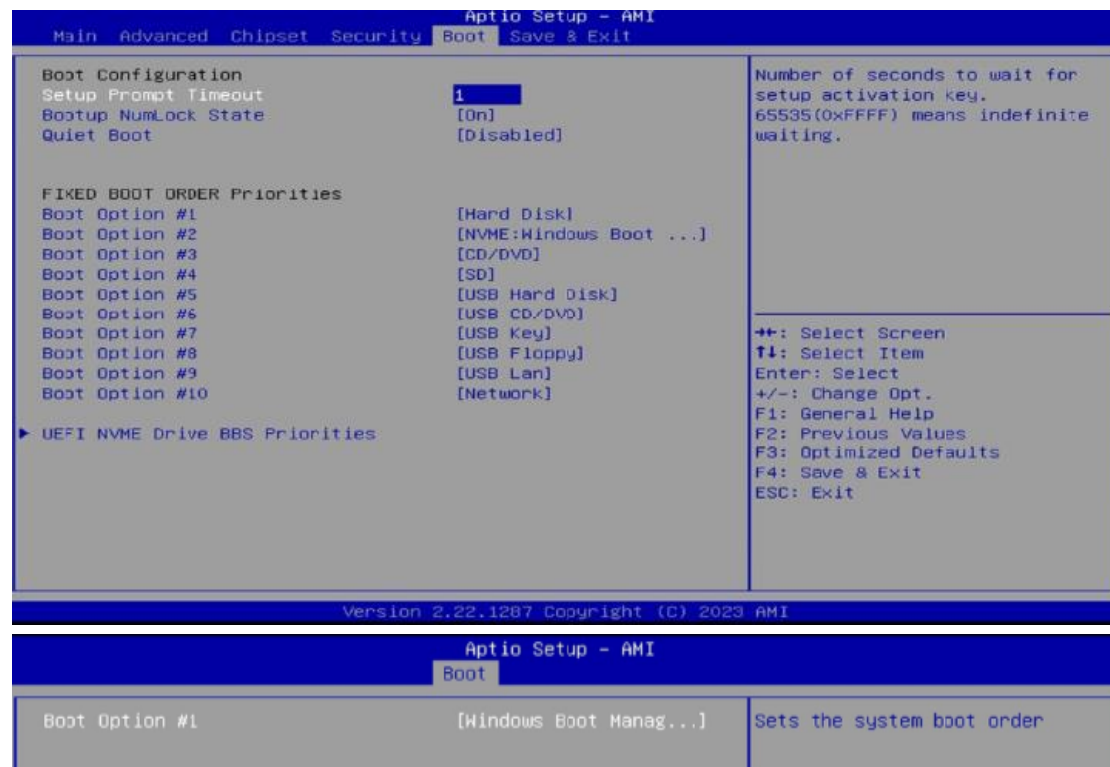

4.6 Security Settings

BIOS Setting	Description
Setup Administrator Password	Sets an administrator password for the setup utility.
User Password	Sets a user password.
Secure Boot	Secure Boot feature is Active if Secure Boot is enabled. Platform Key(PK) is enrolled and the system is in user mode. The mode change requires platform reset.
Secure Boot Mode	Secure Boot mode options: Standard or Custom. In Custom mode, Secure Boot Policy variables can be configured by a physically present user without full authentication.
Restore Factory Keys	Force system to User Mode. Install factory default Secure Boot key databases.
Reset To Setup Mode	Delete all Secure Boot key databases from NVRAM.
Key Management	Enables expert users to modify Secure Boot Policy variables without variable authentication.

4.7 Boot Settings

BIOS Setting	Description
Setup Prompt Timeout	Number of seconds to wait for setup activation key. 65535 (0xFFFF) means indefinite waiting.
Bootup NumLock State	Selects the keyboard NumLock state.
Quiet Boot	Enables / Disables Quiet Boot option.
FIXED BOOT ORDER Priorities	Sets the system boot order.
UEFI NVME Drive BBS Priorities	Specifies the Boot Device Priority sequence from available UEFI NVME Drives.
Boot Option #1	Sets the system boot order

4.8 Save & Exit Settings

BIOS Setting	Description
Save Changes and Exit	Exits system setup after saving the changes.
Discard Changes and Exit	Exits system setup without saving any changes.
Save Changes and Reset	Resets the system after saving the changes.
Discard Changes and Reset	Resets system setup without saving any changes.
Save Changes	Saves changes done so far to any of the setup options.
Discard Changes	Discards changes done so far to any of the setup options.
Restore Defaults	Restores / Loads defaults values for all the setup options.
Save as User Defaults	Saves the changes done so far as User Defaults.
Restore User Defaults	Restores the user defaults to all the setup options.
Launch EFI Shell from filesystem device	Attempts to launch EFI shell application (Shell.efi) from one of the available filesystem devices.

Appendix

This section provides the mapping addresses of peripheral devices and the sample code of watchdog timer configuration.

- I/O Port Address Map
- Interrupt Request Lines (IRQ)
- Watchdog Timer Configuration

A. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
0x00000A00-0x00000A0F	Motherboard resources
0x00000A10-0x00000A1F	Motherboard resources
0x00000A20-0x00000A2F	Motherboard resources
0x0000002E-0x0000002F	Motherboard resources
0x0000004E-0x0000004F	Motherboard resources
0x00000061-0x00000061	Motherboard resources
0x00000063-0x00000063	Motherboard resources
0x00000065-0x00000065	Motherboard resources
0x00000067-0x00000067	Motherboard resources
0x00000070-0x00000070	Motherboard resources
0x00000080-0x00000080	Motherboard resources
0x00000092-0x00000092	Motherboard resources
0x000000B2-0x000000B3	Motherboard resources
0x00000680-0x0000069F	Motherboard resources
0x0000164E-0x0000164F	Motherboard resources
0x00001854-0x00001857	Motherboard resources
0x00000020-0x00000021	Programmable interrupt controller
0x00000024-0x00000025	Programmable interrupt controller
0x00000028-0x00000029	Programmable interrupt controller
0x0000002C-0x0000002D	Programmable interrupt controller
0x00000030-0x00000031	Programmable interrupt controller
0x00000034-0x00000035	Programmable interrupt controller
0x00000038-0x00000039	Programmable interrupt controller
0x0000003C-0x0000003D	Programmable interrupt controller
0x000000A0-0x000000A1	Programmable interrupt controller
0x000000A4-0x000000A5	Programmable interrupt controller
0x000000A8-0x000000A9	Programmable interrupt controller
0x000000AC-0x000000AD	Programmable interrupt controller
0x000000B0-0x000000B1	Programmable interrupt controller

Address	Device Description
0x000000B4-0x000000B5	Programmable interrupt controller
0x000000B8-0x000000B9	Programmable interrupt controller
0x000000BC-0x000000BD	Programmable interrupt controller
0x000004D0-0x000004D1	Programmable interrupt controller
0x00005000-0x00005FFF	Intel(R) PEG10 - 460D
0x00005000-0x00005FFF	NVIDIA RTX A4500 Embedded GPU
0x000003F8-0x000003FF	Communications Port (COM1)
0x000002F8-0x000002FF	Communications Port (COM2)
0x000003E8-0x000003EF	Communications Port (COM3)
0x000002E8-0x000002EF	Communications Port (COM4)
0x000003E0-0x000003E7	Communications Port (COM5)
0x0000EFA0-0x0000EFBF	Intel(R) SMBus - 7AA3
0x00006050-0x00006057	Standard SATA AHCI Controller
0x00006040-0x00006043	Standard SATA AHCI Controller
0x00006020-0x0000603F	Standard SATA AHCI Controller
0x00000000-0x00000CF7	PCI Express Root Complex
0x00000D00-0x0000FFFF	PCI Express Root Complex
0x00004000-0x00004FFF	Intel(R) PCI Express Root Port #3 - 7ABA
0x00000040-0x00000043	System timer
0x00000050-0x00000053	System timer
0x00003000-0x00003FFF	Intel(R) PCI Express Root Port #8 - 7ABF
0x00002000-0x000020FE	Motherboard resources
0x000000B4-0x000000B5	Programmable interrupt controller
0x000000B8-0x000000B9	Programmable interrupt controller
0x000000BC-0x000000BD	Programmable interrupt controller
0x000004D0-0x000004D1	Programmable interrupt controller
0x00005000-0x00005FFF	Intel(R) PEG10 - 460D
0x00005000-0x00005FFF	NVIDIA RTX A4500 Embedded GPU
0x00000040-0x00000043	System timer
0x00000050-0x00000053	System timer
0x00003000-0x00003FFF	Intel(R) PCI Express Root Port #8 - 7ABF
0x00002000-0x000020FE	Motherboard resources

B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ 4294967274	Intel(R) USB 3.20 eXtensible Host Controller - 1.20 (Microsoft)
IRQ 4294967276~88	Standard NVM Express Controller
IRQ 4294967258	Intel(R) Management Engine Interface #1
IRQ 4294967292	Intel(R) PCI Express Root Port #4 - 7ABB
IRQ 4294967294	Intel(R) PEG10 - 460D
IRQ 4	Communications Port (COM1)
IRQ 3	Communications Port (COM2)
IRQ 7	Communications Port (COM3)
IRQ 6	Communications Port (COM4)
IRQ 10	Communications Port (COM5)
IRQ 4294967289	Standard SATA AHCI Controller
IRQ 4294967290	Intel(R) PCI Express Root Port #13 - 7AB4
IRQ 4294967275	NVIDIA RTX A4500 Embedded GPU
IRQ 17	High Definition Audio Controller
IRQ 17	High Definition Audio Controller
IRQ 4294967293	Intel(R) PCI Express Root Port #3 - 7ABA
IRQ 4294967259~65	Intel(R) Ethernet Controller I226-V
IRQ 55~511	Microsoft ACPI-Compliant System
IRQ 109	Trusted Platform Module 2.0
IRQ 0	System timer
IRQ 4294967291	Intel(R) PCI Express Root Port #8 - 7ABF
IRQ 4294967266~73	Intel(R) I210 Gigabit Network Connection

C. Watchdog Timer Configuration

The Watchdog Timer (WDT) is used to generate a variety of output signals after a user programmable count. The WDT is suitable for the use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven. Under normal circumstance, you will need to restart the WDT at regular intervals before the timer counts to zero.

Sample Code:

```
