No part of this publication may be reproduced, copied, stored in a retrieval system, translated into any language or transmitted in any form or by any means, electronic, mechanical, photocopying, or otherwise, without the prior written consent of IBASE Technology, Inc. (hereinafter referred to as "IBASE").

## **Disclaimer**

IBASE reserves the right to make changes and improvements to the products described in this document without prior notice. Every effort has been made to ensure the information in the document is correct; however, IBASE does not guarantee this document is error-free. IBASE assumes no liability for incidental or consequential damages arising from misapplication or inability to use the product or the information contained herein, nor for any infringements of rights of third parties, which may result from its use.

## **Trademarks**

All the trademarks, registrations and brands mentioned herein are used for identification purposes only and may be trademarks and/or registered trademarks of their respective owners.

## Compliance

This product may cause radio interference in which case users may be required to take adequate measures.

This product has been tested and found to comply with the limits for a Class B device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with manufacturer's instructions, may cause harmful interference to radio communications.

Operation is subject to the following two conditions:

- This product may not cause harmful interference
- This product must accept any interference received including interference that may cause undesired operation.

However, there is no guarantee that interference will not occur in an installation. If this equipment causes harmful interference to radio or television reception which can be determined by turning the equipment off and on, you may correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the distributor or an experienced radio/TV technician for help.

## WEEE

This product must not be disposed of as normal household waste, in accordance with the EU directive of for waste electrical and electronic equipment (WEEE - 2012/19/EU). Instead, it should be disposed of by returning it to a municipal recycling collection point. Check local regulations for disposal of electronic products.

**Green iBASE**

This product complies with the current RoHS restrictions that prohibit the use of the following substances in concentrations exceeding 0.1% by weight (1000 ppm) except for cadmium, limited to 0.01% by weight (100 ppm).

- Lead (Pb)
- Mercury (Hg)
- Cadmium (Cd)
- Hexavalent chromium (Cr6+)
- Polybrominated biphenyls (PBB)
- Polybrominated diphenyl ether (PBDE)

## Important Safety Information

Carefully read the precautions before using the device.

### Environmental conditions:

- Put the device horizontally on a stable and solid surface during installation in case the device may fall, causing serious damage.
- Leave plenty of space around the device for ventilation.
- Use this product in environments with ambient temperatures between 0°C and 50°C.
- DO NOT LEAVE THIS DEVICE IN AN ENVIRONMENT WHERE THE STORAGE TEMPERATURE MAY BE BELOW -20° C OR ABOVE 70° C. To prevent from damages, the device must be used in a controlled environment.
- Keep the device away from humidity to avoid fog or condensation from accumulating on the inner surface of the panel.

### Care for your iBASE products:

- Before cleaning the device, turn it off and unplug all cables in case a small amount of electrical current may still flow.
- Use neutral cleaning agents or diluted alcohol to clean the device chassis with a cloth. Then wipe the chassis with a dry cloth.
- Use a computer vacuum cleaner to remove dust to prevent the air vent or slots from getting clogged.

## WARNING

### Attention during use:

- Do not use this product near water.
- Do not spill water or any other liquids on your device.
- Do not place heavy objects on the top of the device.
- Operate this device from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your distributor or local power company.
- Ensure to use the correct power supply voltage.
- Do not walk on the power cord or allow anything to rest on it.
- If you use an extension cord, make sure that the total ampere rating of the product plugged into the extension cord does not exceed its limits.

### Avoid Disassembly

Disassembly, modification, or any attempt at repair could generate hazards and cause damage to the device, even bodily injury or property damage, and will void any warranty on the product.

## CAUTION

Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions.

## Warranty Policy

- **IBASE standard products:**

24-month (2-year) warranty from the date of shipment. If the date of shipment cannot be ascertained, the product serial numbers can be used to determine the approximate shipping date.

- **3<sup>rd</sup>-party parts:**

12-month (1-year) warranty from delivery for the 3<sup>rd</sup>-party parts that are not manufactured by IBASE, such as CPU, CPU cooler, memory, storage devices, power adapter, panel and touch screen.

- \* Products, however, that fail due to misuse, accident, improper installation or unauthorized repair shall be treated as out of warranty and customers shall be billed for repair and shipping charges.

## Technical Support & Services

1. Visit the IBASE website at [www.ibase.com.tw](http://www.ibase.com.tw) to find the latest information about the product.
2. If you need any assistance from your distributor or sales representative concerning problems that you may have encountered, please prepare the following information:
  - Product model name
  - Product serial number
  - Detailed description of the problem
  - Error messages in text or in screenshots if there is any
  - The arrangement of the peripherals
  - Software used (such as OS and application software, including the version numbers)
3. For repair service, please download the RMA form from <http://www.ibase.com.tw/english/Supports/RMAService/>. Fill out the form and contact your distributor or sales representative.

# Chapter 1

## General Information

The information provided in this chapter includes:

- Features
- Packing List
- Specifications
- Overview
- Dimensions

## 1.1 Introduction

UPC-7210" is a 21.5" touch panel PCs based on the Intel® 7<sup>th</sup> Core i™ ultra low power processor. It features IP65 ingress protection for the front bezel and can be operated at ambient operating temperature ranging from 0°C to 50°C.

## 1.2 Features

- Intel® 7<sup>th</sup> Core i™ U series processor
- Projected capacitive touch screen
- Low power consumption
- IP65 front-bezel waterproof protection

## 1.3 Packing List

Your product package should include the items listed below. If any of the items below is missing, contact the distributor or the dealer from whom you have purchased the product.

- |                          |     |
|--------------------------|-----|
| • UPC-7210 system        | x 1 |
| • Power adapter          | x 1 |
| • Motherboard Driver DVD | x 1 |
| • Power core             | x 1 |

## 1.4 Specifications

## Chapter 2

# Hardware Configuration

The information provided in this chapter includes:

- Memory installation and membrane keypad extension
- Information and locations of connectors

**Avoid device disassembly:** Disassembly, modification, or any attempt at repair could generate hazards and cause damage to the device, injury, or property damage, and will void any warranty. If you need to make any changes to the device, be sure to unplug the power cord of the device and have qualified engineers or technicians do the disassembly or installation.

## 2.1 Rear Cover Disassembly

In case you need to remove the rear cover to install or replace a memory module or a mini-PCle card, unscrew the 16 screws as shown below to remove the rear cover. Take extra care to open the rear cover.

## 2.2 Memory Replacement

To replace or install memory modules, perform the following steps after removing the system rear cover.

1. Locate the memory slot and align the key of the memory module with that on the memory slot.
2. Insert the module slantwise and gently push the module straight down until the clips of the slot close to hold the module in place when the module touches the bottom of the slot.

To remove the module, press the clips outwards with both hands.

### 2.3 Mini-PCle Card Installation

To replace or install a mini-PCle card, perform the following steps after removing the rear cover.

1. Locate the mini-PCle, align the key of the card to the interface, and insert the card slantwise.

2. Push the card down and fix it with the supplied flat head screw.

### 2.4 SSD/HDD Replacement

1. For changing SSD/HDD, unscrew the following 2 screws to open-up the SSD/HDD tray.

2. Once open-up the storage cover, you will see the SSD/HDD device, Please gentle release the SATA cable at first

Then unscrew 4 screw as following:

(Be careful, don't let the screw drop into the system)

3. Then you are possible to take the SSD/HDD device with bracket up, please unscrew 4 screw at right and left side to change/install the new SSD/HDD.

Finally, please reverse procedures to fix the SSD/HDD device.

## 2.5 VESA Mounting Installation

You will need to prepare the VESA mount bracket in advance. Tighten 4 screws as shown below to attach the mounting brackets to the system.

## 2.6 Pin out for COM1

- COM1 RS232/422/485 Port**

COM 1 features jumperless selection for RS-232/422/485, which is configurable in BIOS.

Pin	Signal Name	Pin	Signal Name
1	DCD, Data carrier detect	6	DSR, Data set ready
2	RXD, Receive data	7	RTS, Request to send
3	TXD, Transmit data	8	CTS, Clear to send
4	DTR, Data terminal ready	9	RI, Ring indicator
5	Ground		

Pin	Signal Name		
	RS-232	RS-422	RS-485
1	DCD	TX-	DATA-
2	RX	TX+	DATA+
3	TX	RX+	NC
4	DTR	RX-	NC
5	Ground	Ground	Ground
6	DSR	NC	NC
7	RTS	NC	NC
8	CTS	NC	NC
9	RI	NC	NC

2.7 Setting the Jumpers

Configure the jumpers with the settings required to be able to use the features needed for your application. Contact your supplier if you have doubts about the best configuration for your use.

How to Set the Jumpers

Jumpers are short-length conductors consisting of several metal pins with a non-conductive base mounted on the circuit board. Jumper caps are used to have the functions and features enabled or disabled. If a jumper has 3 pins, you can connect either PIN1 to PIN2 or PIN2 to PIN3 by shorting with the jumper cap.

Refer to the illustration below to set the jumpers.

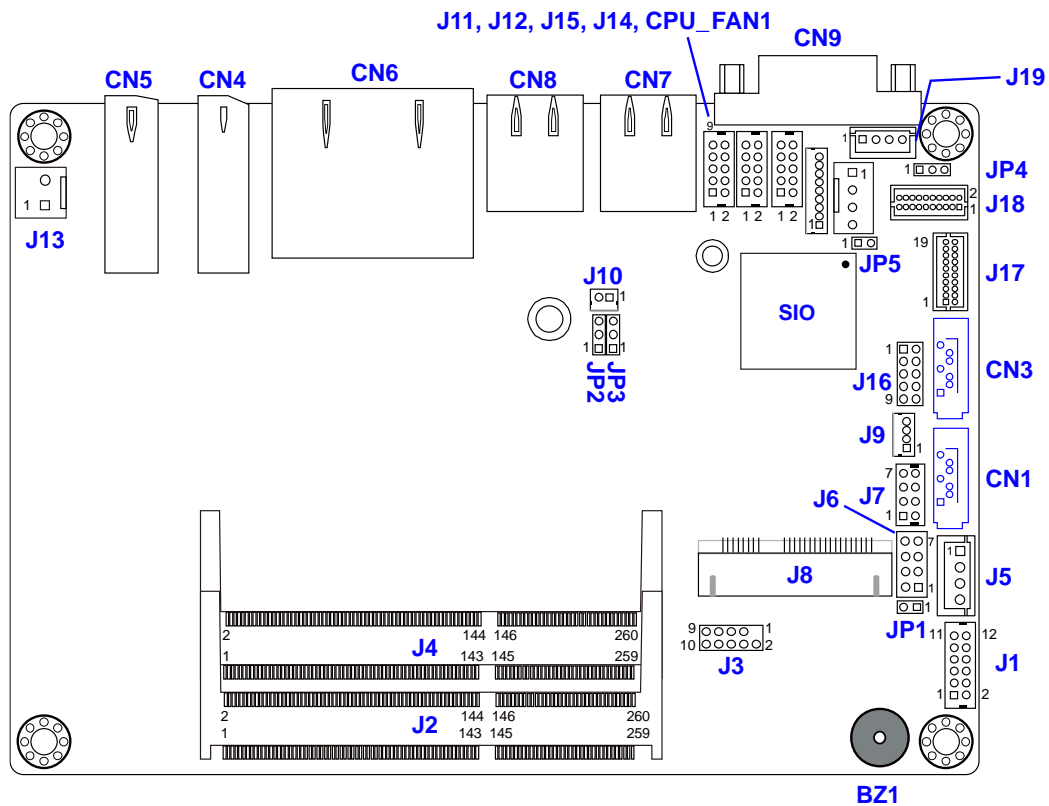

Pin closed	Oblique view	Illustration
Open		
1-2		
2-3		

When two pins of a jumper are encased in a jumper cap, this jumper is **closed**, i.e. turned **On**.

When a jumper cap is removed from two jumper pins, this jumper is **open**, i.e. turned **Off**.

## 2.8 Jumper & Connector Locations

Motherboard: IB917

Motherboard location

For motherboard setting, you must open the rear cover (Ref: section 2.1). We don't suggest you do this way because it may cause system **lose warranty** due to any unexpected actions.

## 2.9 Jumpers Quick Reference

Function	Jumper Name
CMOS Data Clearance	JP2
ME Register Clearance	JP3
LVDS Panel Power / Brightness Selections	JP4 (For power) / JP5 (For brightness)
Factory Use Only	JP1

### 2.9.1 CMOS Data Clearance (JP2)

Function	Pin closed	Illustration
Normal (default)	1-2	1
Clear CMOS	2-3	1

### 2.9.2 ME Register Clearance (JP3)

Function	Pin closed	Illustration
Normal (default)	1-2	
Clear ME	2-3	

### 2.9.3 LVDS Panel Power / Brightness Selections (JP4 / JP5)

Notice: you cannot change this setting with UPC-7210

Jumper	Function	Pin closed	Illustration
JP4	3.3V (default)	1-2	
	5V	2-3	
JP5	3.3V (default)	Open	
	5V	Close	

## 2.10 Connectors Quick Reference

Function	Connector Name
COM1 RS-232/422/485 Port	CN9
Audio Connector	J1
SATA HDD Power Connector	J5
Front Panel Setting Connector	J6
USB 2.0 Connector	J7
Battery Connector	J10
COM 2, COM3, COM4 RS-232 Ports	J15, J12, J11
DC Power Input Connector	J13
Digital I/O Connector	J16
LCD Backlight Connector	J19
LVDS Connectors	J17 (1 <sup>st</sup> channel), J18 (2 <sup>nd</sup> channel)
CPU Fan connector	CPU_FAN1
SATA III Port	CN1, CN3
HDMI 1.4 Port	CN4
Display Port	CN5
GbE LAN Ports	CN6
USB 3.0 Port	CN7, CN8
DDR4 SO-DIMM Slot	J2, J4
Mini-PCIe / mSATA Slot	J8
Factory Use Only	J3, J9, J14

## 2.10.1 COM1 RS-232/422/485 Port (CN9)

COM1 port is jumper-less and configurable in BIOS.

Pin	Assignment	Pin	Assignment
1	DCD, Data carrier detect	6	DSR, Data set ready
2	RXD, Receive data	7	RTS, Request to send
3	TXD, Transmit data	8	CTS, Clear to send
4	DTR, Data terminal ready	9	RI, Ring indicator
5	Ground		

Pin	Assignment		
	RS-232	RS-422	RS-485
1	DCD	TX-	DATA-
2	RX	TX+	DATA+
3	TX	RX+	NC
4	DTR	RX-	NC
5	Ground	Ground	Ground
6	DSR	NC	NC
7	RTS	NC	NC
8	CTS	NC	NC
9	RI	NC	NC

**2.10.2 Audio Connector (J1)**

Pin	Assignment	Pin	Assignment
1	Lineout_L	2	Lineout_R
3	JD_FRONT	4	Ground
5	LINEIN_L	6	Linein_R
7	JD_LINEIN	8	Ground
9	MIC_L	10	MIC-R
11	JD_MIC1	12	Ground

**2.10.3 SATA HDD Power Connector (J5)**

Pin	Assignment	Pin	Assignment
1	+5V	3	Ground
2	Ground	4	+12V

#### 2.10.4 Front Panel Connector (J6)

Pin	Assignment	Pin	Assignment
1	Ground	2	PWR_BTN
3	3.3V	4	HDD Active
5	Ground	6	Reset
7	+5V	8	Ground

J6 is utilized for system indicators to provide light indication of the computer activities and switches to change the computer status. It provides interfaces for the following functions.

- ATX Power ON Switch (Pins 1 and 2)**  
 The 2 pins makes an “ATX Power Supply On/Off Switch” for the system that connects to the power switch on the case. When pressed, the power switch will force the system to power on. When pressed again, it will power off the system.
- Hard Disk Drive LED Connector (Pins 3 and 4)**  
 This connector connects to the hard drive activity LED on control panel. This LED will flash when the HDD is being accessed.
- Reset Switch (Pins 5 and 6)**  
 The reset switch allows you to reset the system without turning the main power switch off and then on again. Orientation is not required when making a connection to this header.
- Power LED: Pins 7 and 8**  
 This connector connects to the system power LED on control panel. This LED will light when the system turns on.

**2.10.5 USB 2.0 Connector (J7)**

Pin	Assignment	Pin	Assignment
1	VCC	2	Ground
3	D0-	4	D1+
5	D0+	6	D1-
7	Ground	8	VCC

**2.10.6 Battery Connector (J10)**

Pin	Assignment
1	Battery+
2	Ground

### 2.10.7 COM2, COM3, COM4 RS-232 Ports (J15, J12, J11)

Pin	Assignment	Pin	Assignment
1	DCD, Data carrier detect	2	RXD, Receive data
3	TXD, Transmit data	4	DTR, Data terminal ready
5	Ground	6	DSR, Data set ready
7	RTS, Request to send	8	CTS, Clear to send
9	RI, Ring indicator	10	Not Used

### 2.10.8 DC Power Input Connector (J13)

Pin	Assignment
1	+9V ~ +24V
2	Ground

## 2.10.9 Digital I/O Connector (J16)

Pin	Assignment	Pin	Assignment
1	Ground	2	VCC
3	OUT3	4	OUT1
5	OUT2	6	OUT0
7	IN3	8	IN1
9	IN2	10	IN0

## 2.10.10 LCD Backlight Connector (J19)

Pin	Assignment	Pin	Assignment
1	+12V	3	Brightness Control
2	Backlight Enable	4	Ground

### 2.10.11 LVDS Connector (J17, J18)

Pin	Assignment	Pin	Assignment
1	TX0P	2	TX0N
3	Ground	4	Ground
5	TX1P	6	TX1N
7	Ground	8	Ground
9	TX2P	10	TX2N
11	Ground	12	Ground
13	CLKP	14	CLKN
15	Ground	16	Ground
17	TX3P	18	TX3N
19	Power	20	Power

### 4.2.13 CPU Fan Connector (CPU\_FAN1)

Pin	Assignment	Pin	Assignment
1	Ground	3	CPU Fan In
2	12V	4	CPU Fan Out

## Chapter 3

# Driver Installation

The information provided in this chapter includes:

- Intel® Chipset Software Installation Utility
- VGA Driver
- HD Audio Driver
- LAN Driver
- Intel® Management Engine Drivers Installation

### 3.1 Introduction

This section describes the installation procedures for software and drivers. The software and drivers are included with the motherboard. If you find anything missing, please contact the distributor where you made the purchase. The contents of this section include the following:

---

**Note:** After installing your Windows operating system, you must install the Intel® Chipset Software Installation Utility first before proceeding with the drivers installation.

---

### 3.2 Intel® Chipset Software Installation Utility

The Intel® Chipset drivers should be installed first before the software drivers to install INF files for Plug & Play function for Intel chipset components. Follow the instructions below to complete the installation.

1. Insert the disk enclosed in the package with the board. Click **Intel** on the left pane and then **Intel(R) Kabylake-U Chipset Drivers** on the right pane.

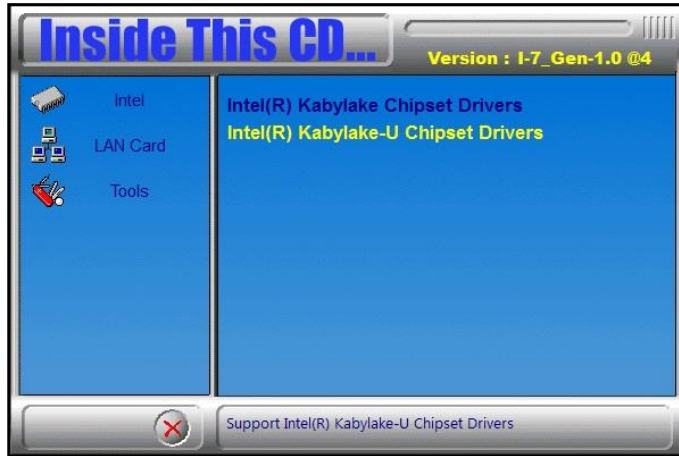

2. Click **Intel(R) Chipset Software Installation Utility**.

3. When the *Welcome* screen to the Intel® Chipset Device Software appears, click **Next** to continue.
4. Accept the software license agreement and proceed with the installation process.
5. On the *Readme File Information* screen, click **Install** for installation.
6. After the installation, restart the computer for changes to take effect.

### 3.3 Intel Graphics Driver Installation

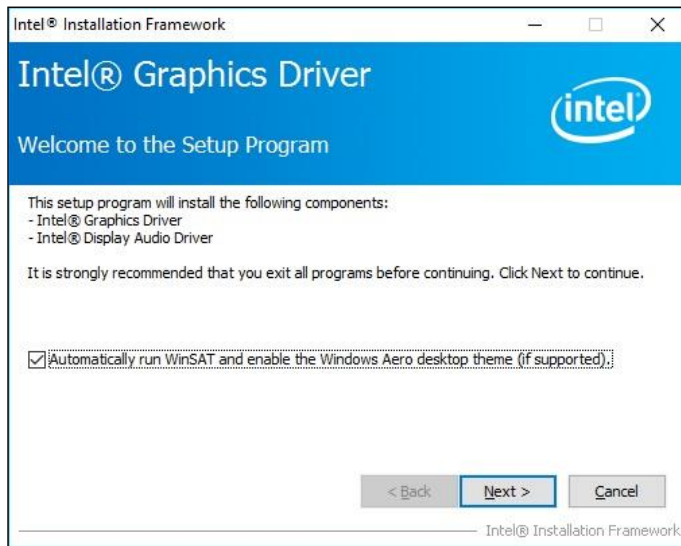

1. Insert the disk enclosed in the package with the board. Click **Intel** on the left pane and then **Intel(R) Kabylake-U Chipset Drivers** on the right pane.

2. Click **Intel(R) HD Graphics Driver**.

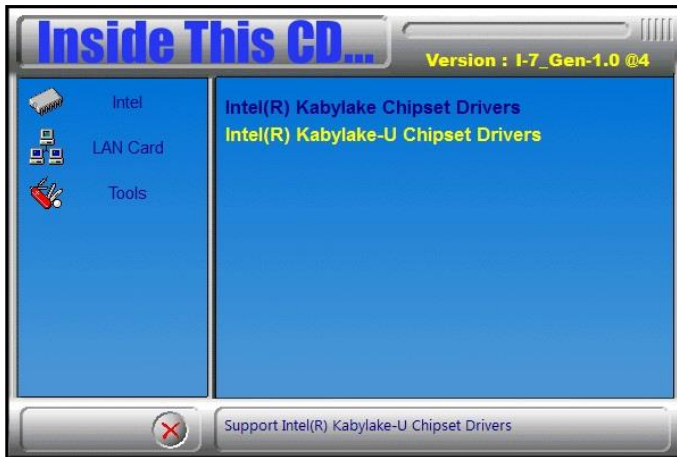

3. When the *Welcome* screen appears, click **Next** to continue.

4. Click **Yes** to accept the license agreement and click **Next** until the installation starts.
5. On the *Readme File Information* screen, click **Next** until the installation starts.
6. After the installation, restart the computer for changes to take effect.

### 3.4 HD Audio Driver Installation

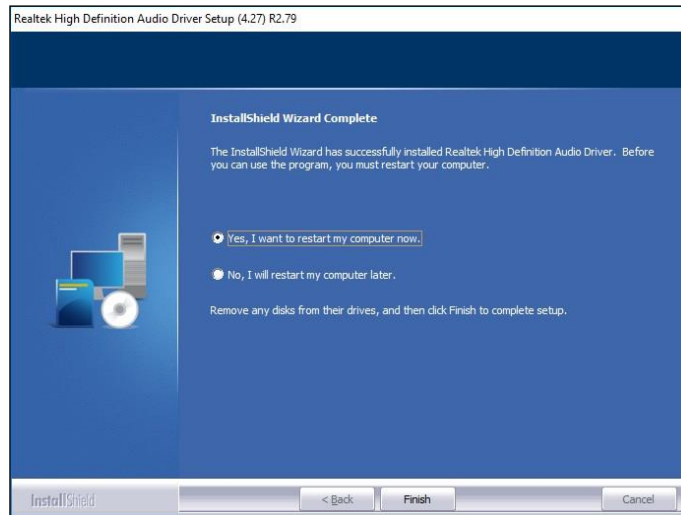

1. Insert the disk enclosed in the package with the board. Click **Intel** on the left pane and then **Intel(R) Kabylake-U Chipset Drivers** on the right pane.

2. Click **Realtek High Definition Audio Driver**.

3. On the *Welcome* screen of the InstallShield Wizard, click **Next**.

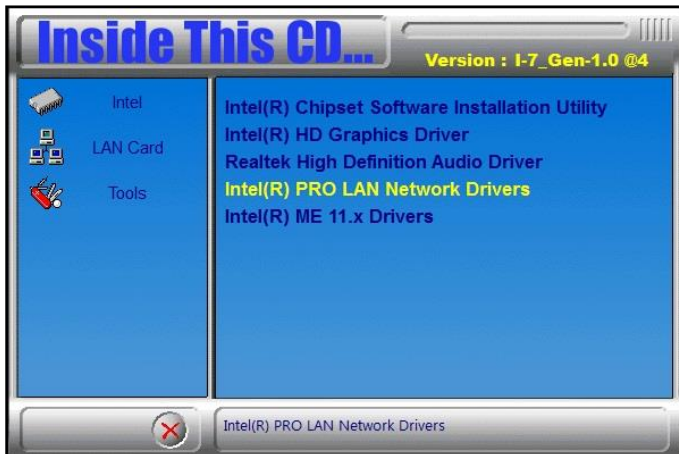

4. Click **Next** until the installation starts.
5. After the installation, restart the computer for changes to take effect.

### 3.5 LAN Driver Installation

1. Insert the disk enclosed in the package with the board. Click **Intel** on the left pane and then **Intel(R) Kabylake-U Chipset Drivers** on the right pane.

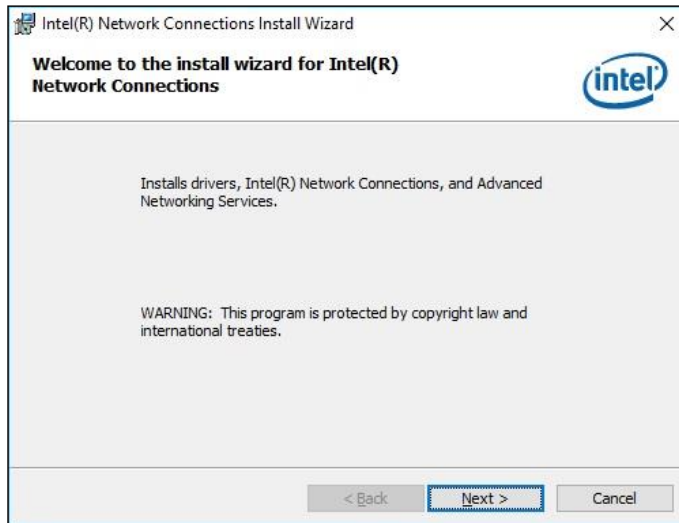

2. Click **Intel(R) PRO LAN Network Drivers..**

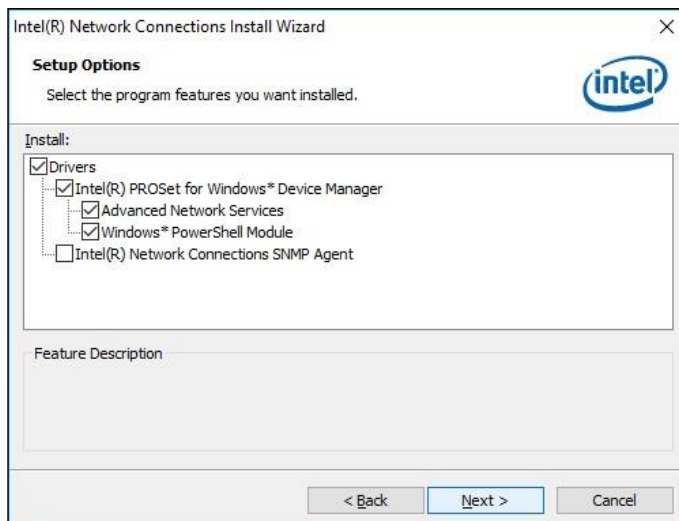

3. When the *Welcome* screen appears, click **Next**.

4. Accept the license agreement and click **Next**.
5. On the *Setup Options* screen, click the checkbox to select the desired driver(s) for installation. Then click **Next** to continue.

6. The wizard is ready for installation. Click **Install**.
7. After the installation, restart the computer for changes to take effect.

### 3.6 Intel® Management Engine Drivers Installation

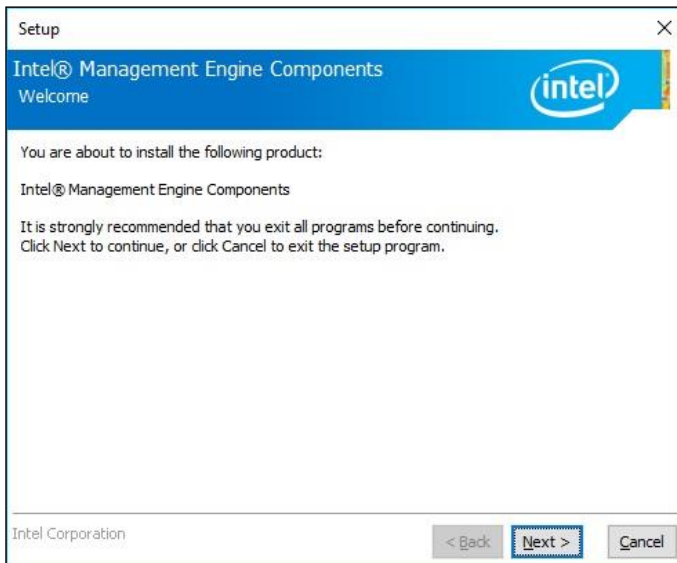

1. Insert the disk enclosed in the package with the board. Click **Intel** on the left pane and then **Intel(R) Kabylake-U Chipset Drivers** on the right pane.

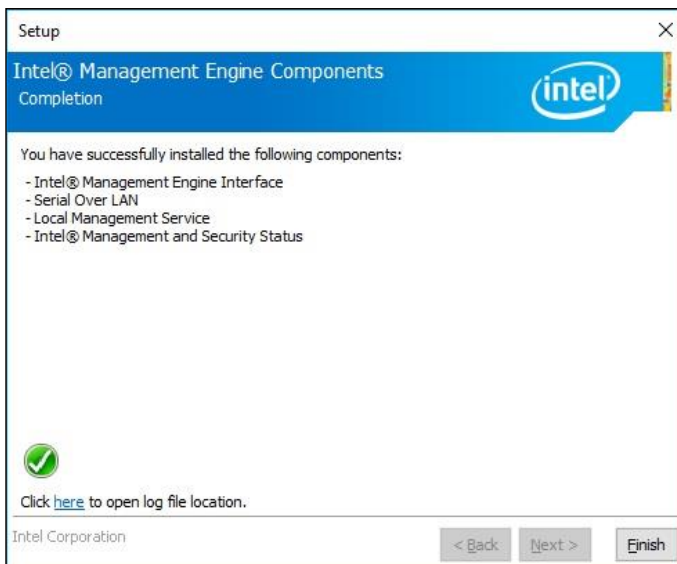

2. Click **Intel(R) ME 11.x Drivers**.

- When the *Welcome* screen appears, click **Next**.

- Accept the license agreement and click **Next** until the installation starts.
- After the installation, restart the computer for changes to take effect.

## Chapter 4

# BIOS Setup

This chapter describes the different settings available in the AMI BIOS that comes with the board. The topics covered in this chapter are as follows:

- Main Settings
- Advanced Settings
- Chipset Settings
- Security Settings
- Boot Settings
- Save & Exit

---

**Avoid changing the default settings:**

We strongly suggest you contact IBASE for technical support before you make any changes in BIOS. Please be noted that the device may malfunction if you change the BIOS settings improperly.

---

## 4.1 Introduction

The BIOS (Basic Input/Output System) installed in the ROM of your computer system supports Intel® processors. The BIOS provides critical low-level support for standard devices such as disk drives, serial ports and parallel ports. It also provides password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

## 4.2 BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Press the <Del> key immediately allows you to enter the Setup utility. If you are a little bit late pressing the <Del> key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup.

If you still need to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again.

The following message will appear on the screen:

```
Press <DEL> to Enter Setup
```

In general, press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help, and <Esc> to quit.

When you enter the BIOS Setup utility, the *Main Menu* screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

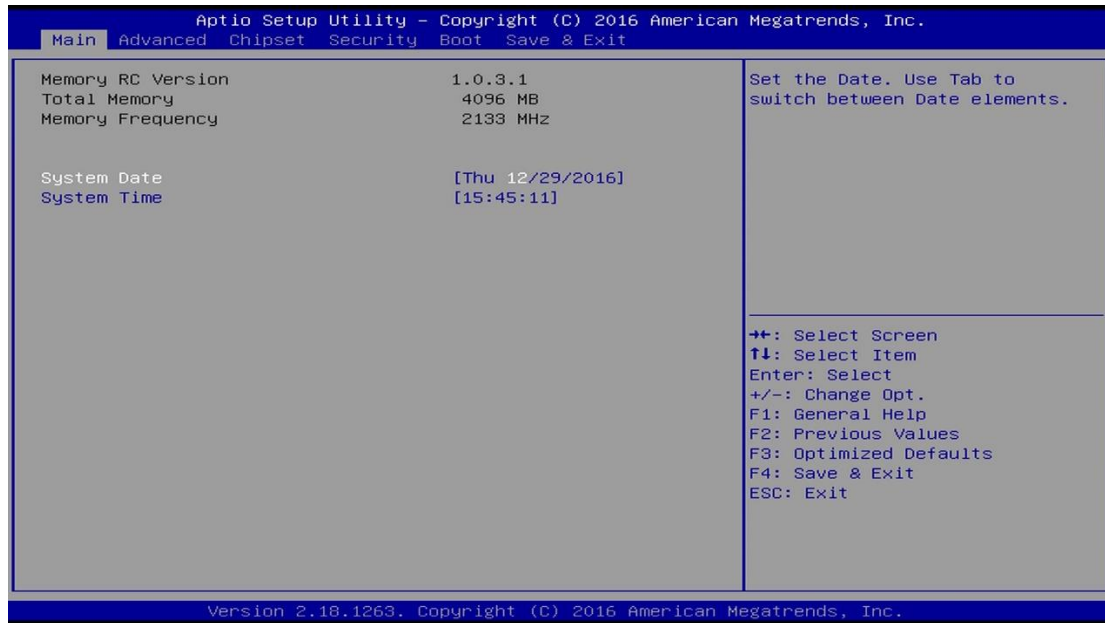

---

**Warning:** It is strongly recommended that you avoid making any changes to the chipset defaults.

These defaults have been carefully chosen by both AMI and your system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could make the system unstable and crash in some cases.

---

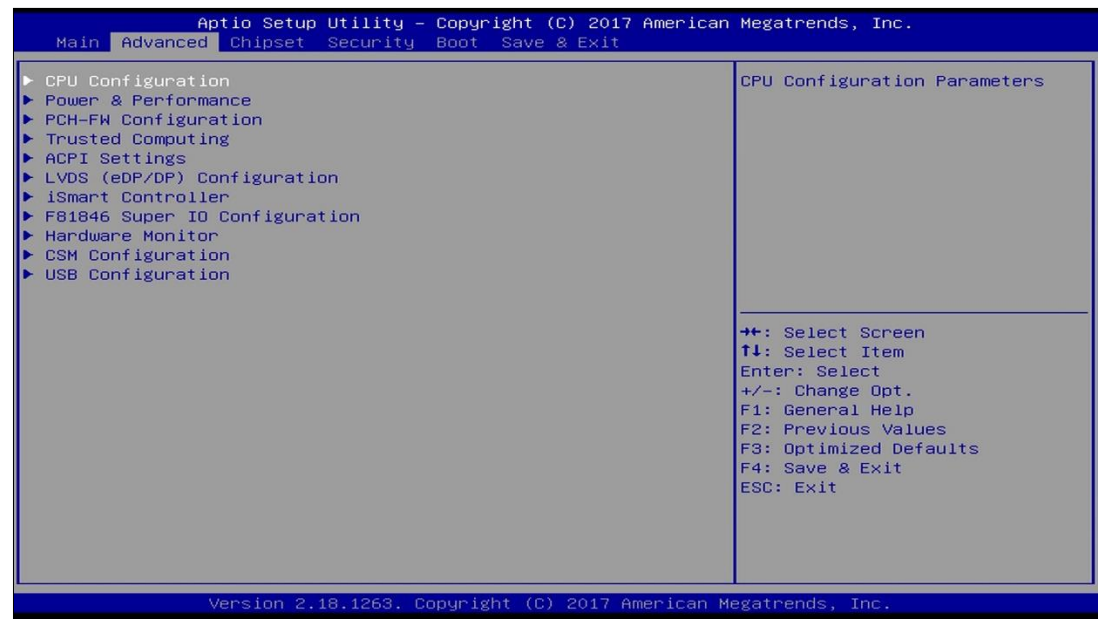

## 4.3 Main Settings

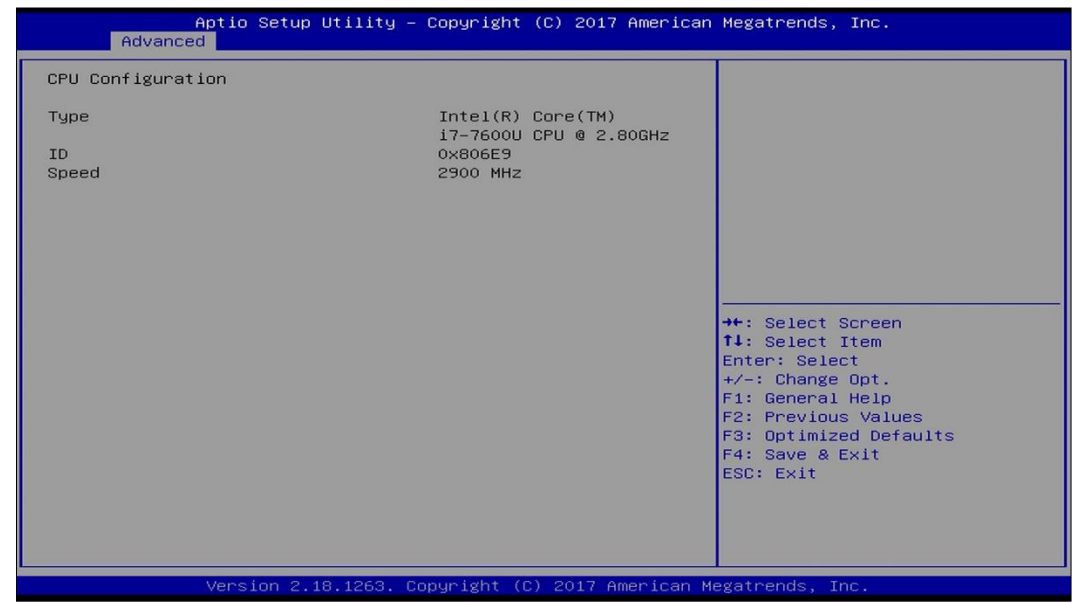

BIOS Setting	Description
System Date	Sets the date. Use the <Tab> key to switch between the data elements.
System Time	Set the time. Use the <Tab> key to switch between the data elements.

4.4 Advanced Settings

This section allows you to configure, improve your system and allows you to set up some system features according to your preference.

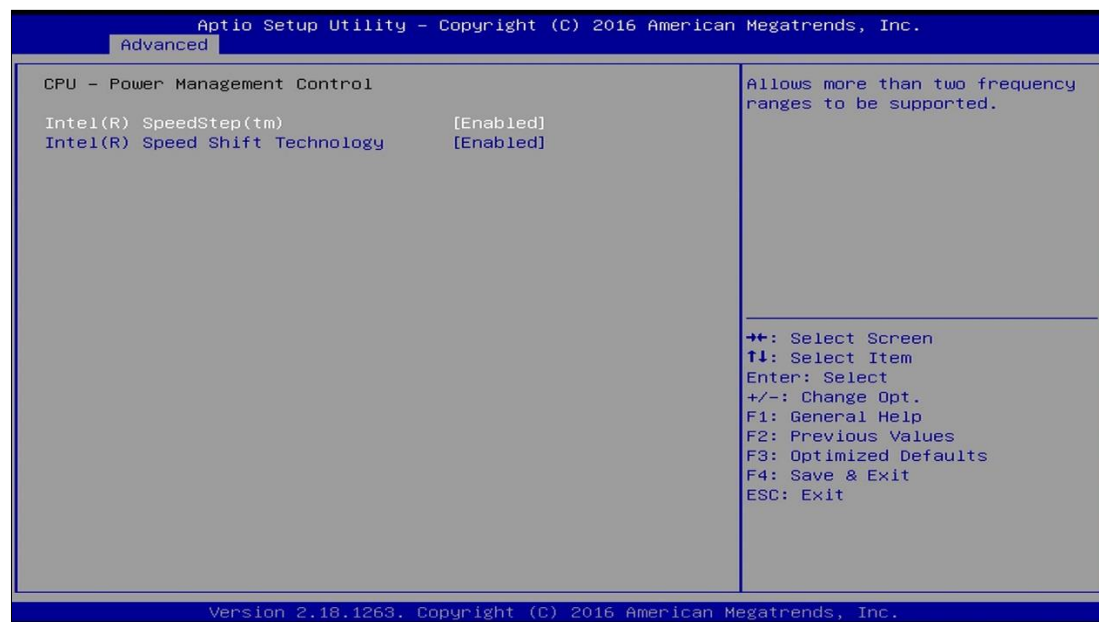

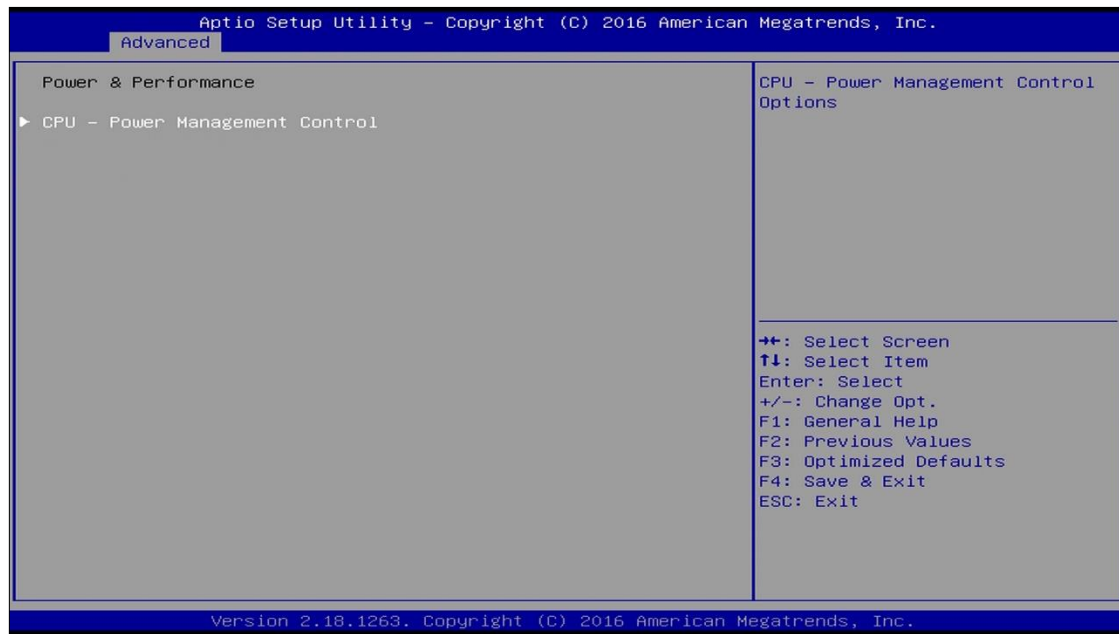

4.4.1 CPU Configuration

Displays the type, ID and speed of the CPU.

**Note:** The CPU information displayed varies upon your actual CPU type.

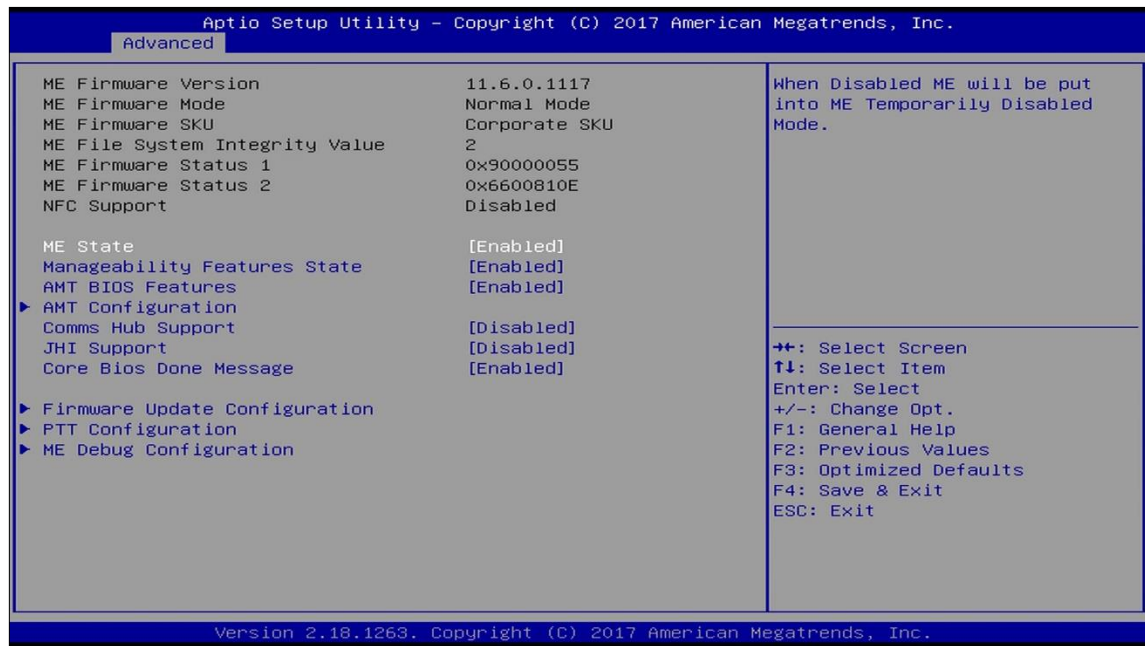

#### 4.4.2 Power & Performance

BIOS Setting	Description
Intel(R) SpeedStep(tm)	Allows more than two frequency ranges to be supported.
Intel(R) Speed Shift Technology	Enables / Disables Intel(R) Speed Shift Technology support. Enabling will expose the CPPC v2 interface to allow for hardware controlled P-states.

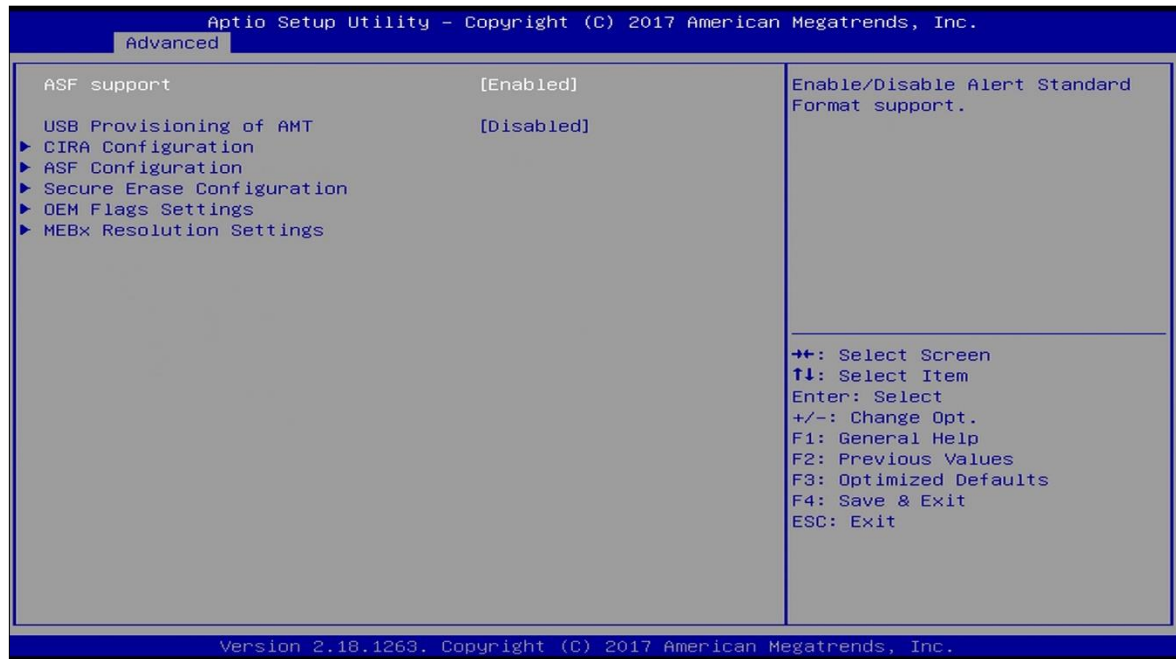

#### 4.4.3 PCH-FW Configuration

BIOS Setting	Description
ME State	When disabled ME will be put into ME Temporarily Disabled Mode.
Manageability Features State	Enables / Disables Intel(R) manageability features in FW. To disable support platform must be in an unprovisioned state first.
AMT BIOS Features	When disabled AMT BIOS features are no longer supported and user is no longer able to access MEBx Setup. <b>Note:</b> This option does not disable manageability features in FW.
AMT Configuration	Configures Intel(R) Active Management Technology Parameters.
Comms Hub Support	Enables / Disables support for Comms Hub.
JHI Support	Enables / Disables Intel(R) DAL Host Interface Service (JHI).
Core BIOS Done Message	Enables / Disables Core BIOS done message sent to ME.
Firmware Update Configuration	Configures Management Engine Technology parameters.
PTT Configuration	Configures PTT capability or state.

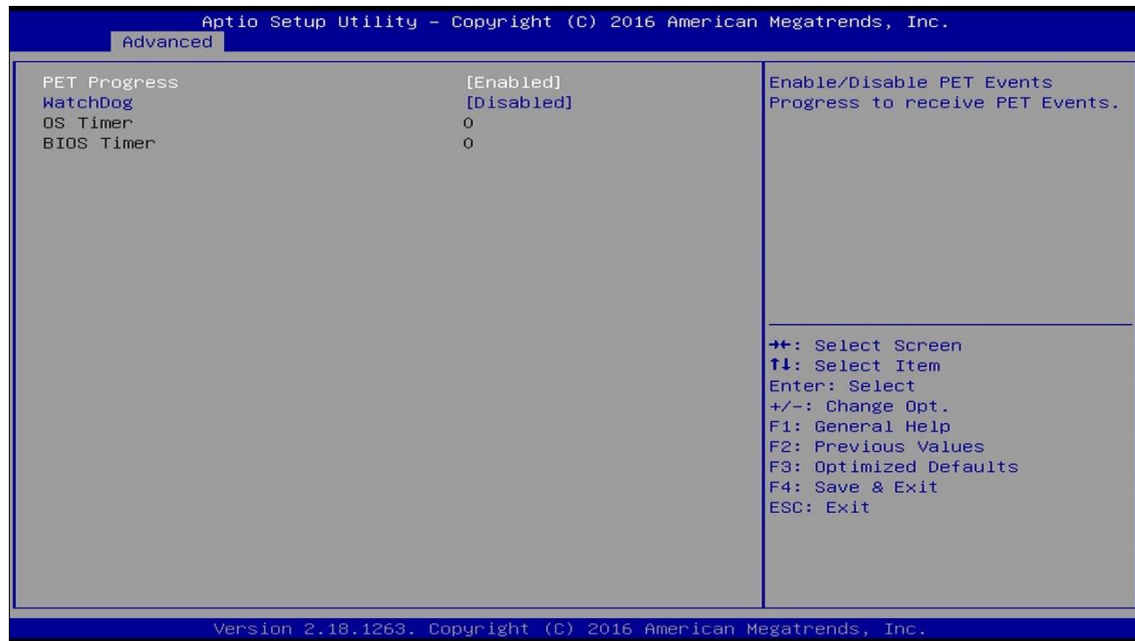

BIOS Setting	Description
ME Debug Configuration	Configures ME debug options. <b>Note:</b> This menu is provided for testing purposes. It is recommended to leave the options in their default states.

#### 4.4.3.1. AMT Configuration

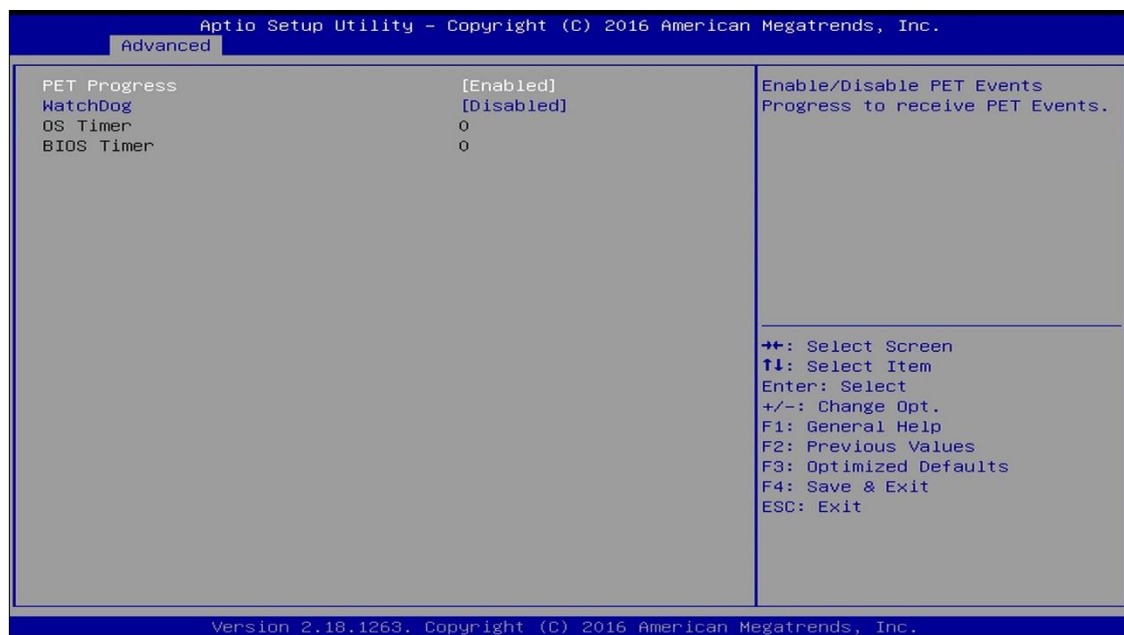

BIOS Setting	Description
ASF Support	Enables / Disables Alert Standard Format support.
USB Provisioning of AMT	Enables / Disables of AMT USB provisioning.
CIRA Configuration	Configures remote assistance process parameters.
ASF Configuration	Configures Alert Standard Format parameters.
Secure Erase Configuration	Secures erase configuration menu.
OEM Flags Settings	Configures OEM Flags.
MEBx Resolution Settings	Shows resolution settings for MEBx display modes.

## CIRA Configuration

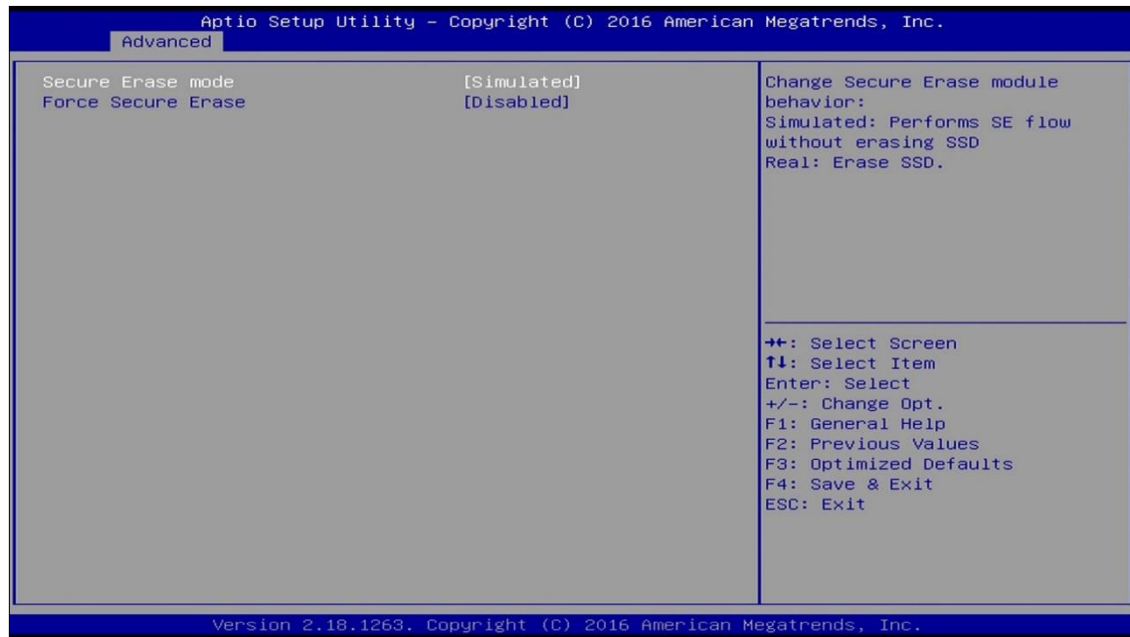

BIOS Setting	Description
Activate Remote Assistance Process	Trigger CIRA boot. <b>Note:</b> Network Access must be activated first from MEBx Setup.

## ASF Configuration

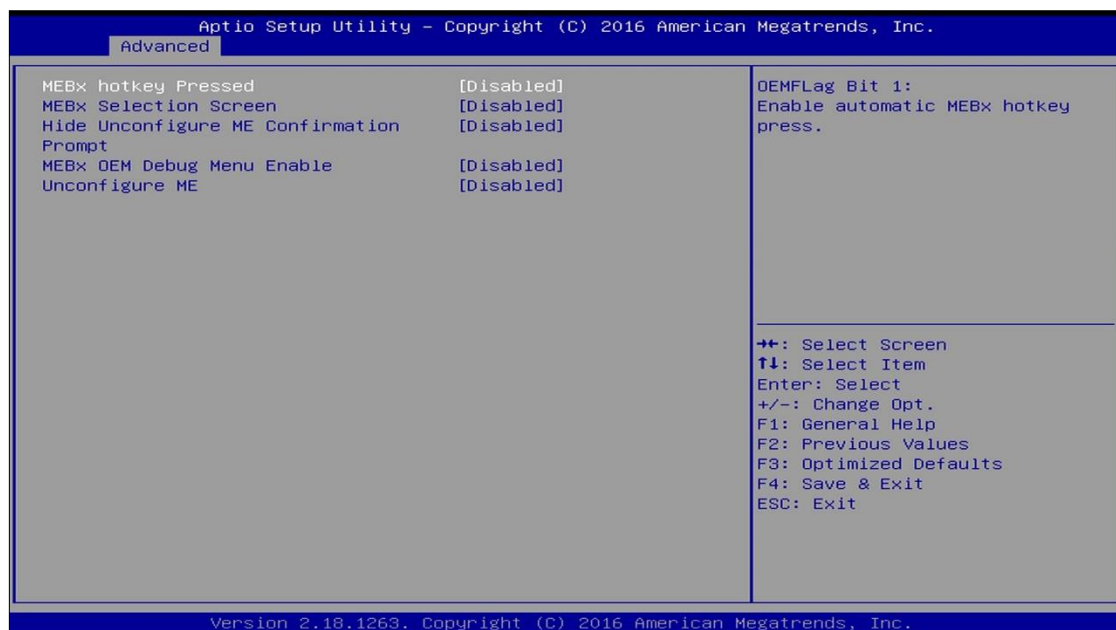

BIOS Setting	Description
PET Progress	Enables / Disables PET events progress to receive PET events.
WatchDog	Enables / Disables the watchdog timer.

## Secure Erase Configuration:

BIOS Setting	Description
Secure Erase Mode	Changes Secure Erase module behavior. <ul style="list-style-type: none"> <li>• <b>Simulated</b> performs SE flow without erasing SSD.</li> <li>• <b>Real</b> erases SSD.</li> </ul>
Force Secure Erase	Force Secure Erase on next boot.

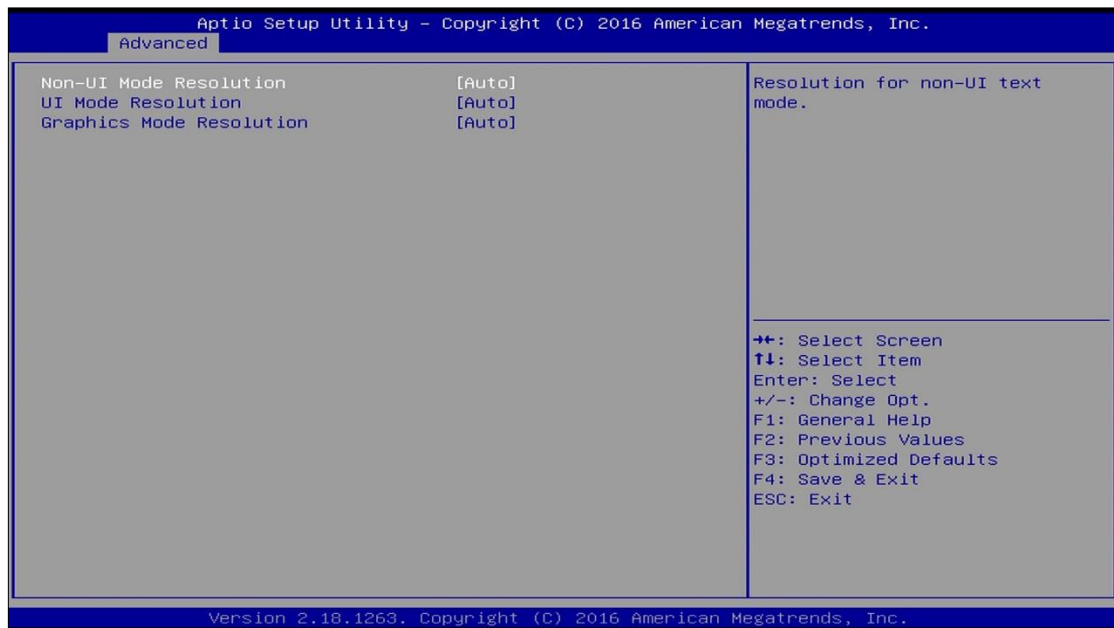

## OEM Flags Settings:

BIOS Setting	Description
MEBx hotkey Pressed	OEMFlag Bit 1: enables automatic MEBx hotkey press.

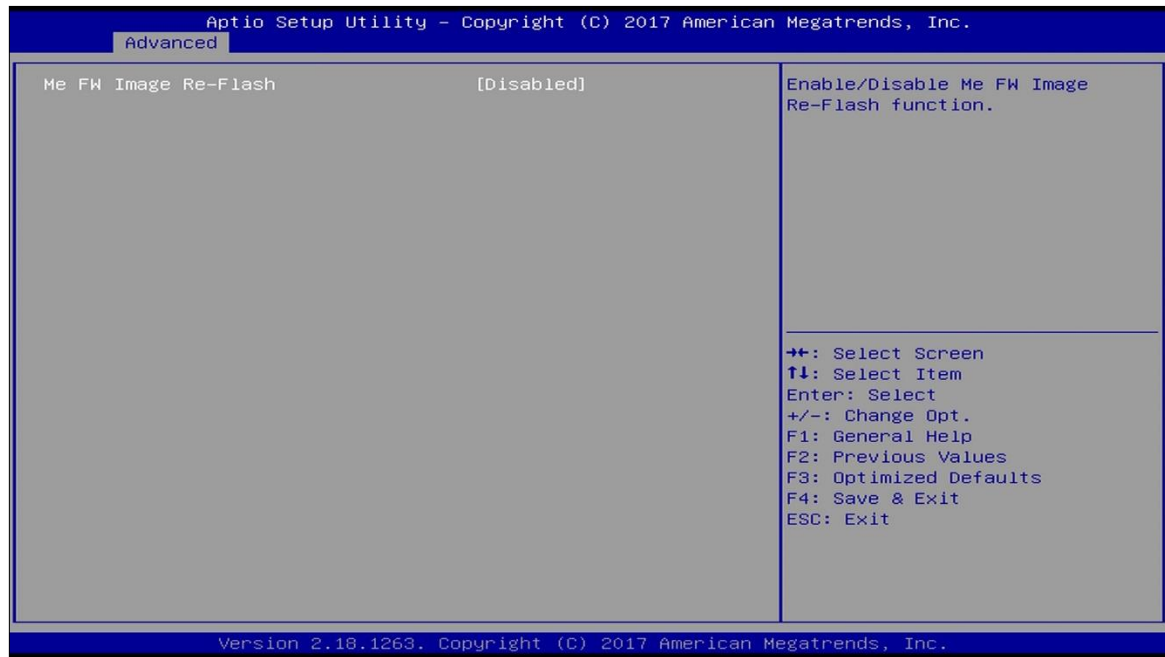

BIOS Setting	Description
OEMFlag Bit 1	Enables / Disables Automatic MEBx hotkey press.
MEBx Selection Screen	OEMFlag Bit 2: enables MEBx selection screen with 2 options. <ul style="list-style-type: none"> <li>Press <b>1</b> to enter ME configuration screens.</li> <li>Press <b>2</b> to initiate a remote connection.</li> </ul> <b>Note:</b> Network access must be activated from MEBx Setup for this screen to be displayed.
Hide Unconfigure ME Confirmation Prompt	OEMFlag Bit 6: hides the unconfigure ME confirmation prompt when attempting ME unconfiguration.
MEBx OEM Debug Menu Enable	OEMFlag Bit 14: enables OEM debug menu in MEBx.
Unconfigure ME	OEMFlag Bit 15: Unconfigures ME with resetting MEBx password to default.

#### MEBx Resolution Settings:

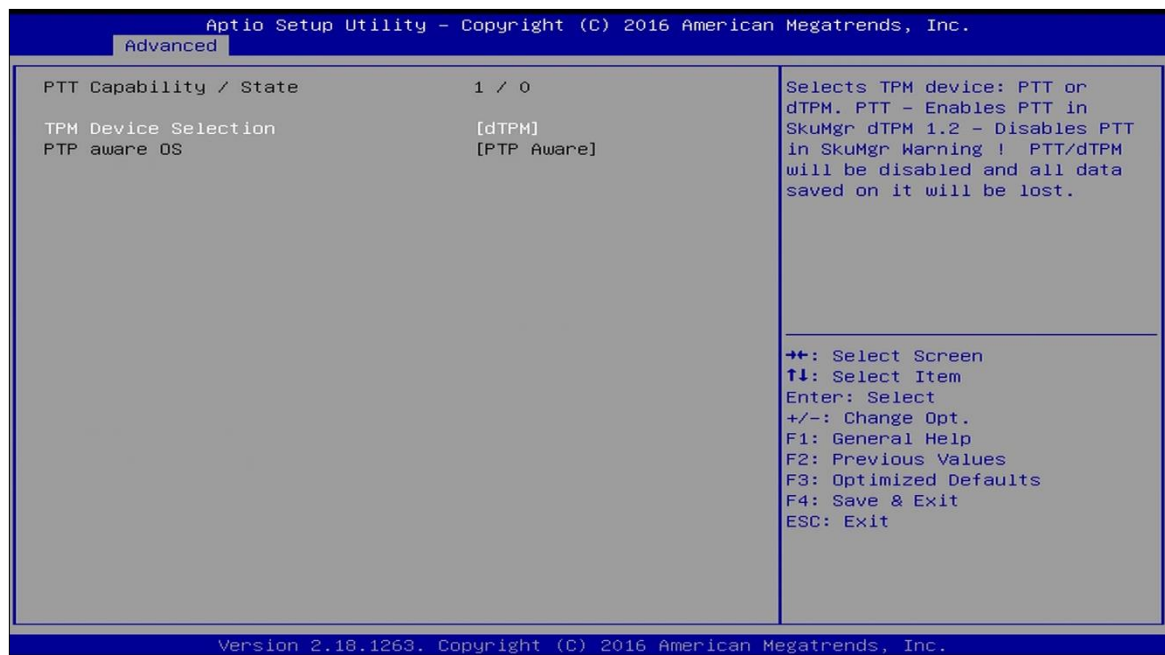

BIOS Setting	Description
Non-UI Mode Resloution	Sets resolution fro non-UI text mode.
UI Mode Resolution	Sets resolution for UI text mode.
Graphics Mode Resolution	Sets resolution for graphics mode.

#### 4.4.3.2. Firmware Update Configuration

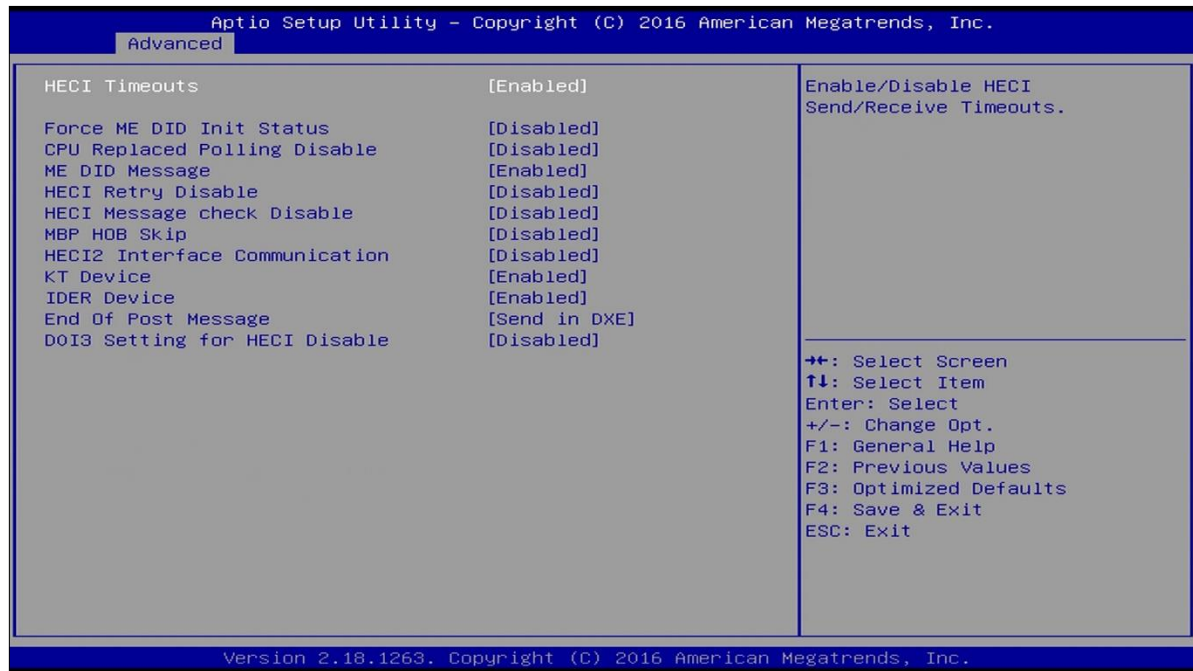

BIOS Setting	Description
ME FW Image RE-Flash	Enables / Disables ME FW Image Re-Flash function.

#### 4.4.3.3. PTT Configuration

BIOS Setting	Description
TPM Device Selection	<p>Selects TPM device: PTT or dTPM.</p> <ul style="list-style-type: none"> <li>• <b>PTT</b> enables PTT in SkuMgr.</li> <li>• <b>dTPM 1.2</b> disables PTT in SkuMgr warning. PTT/dTPM will be disabled and all data saved on it will be lost.</li> </ul>

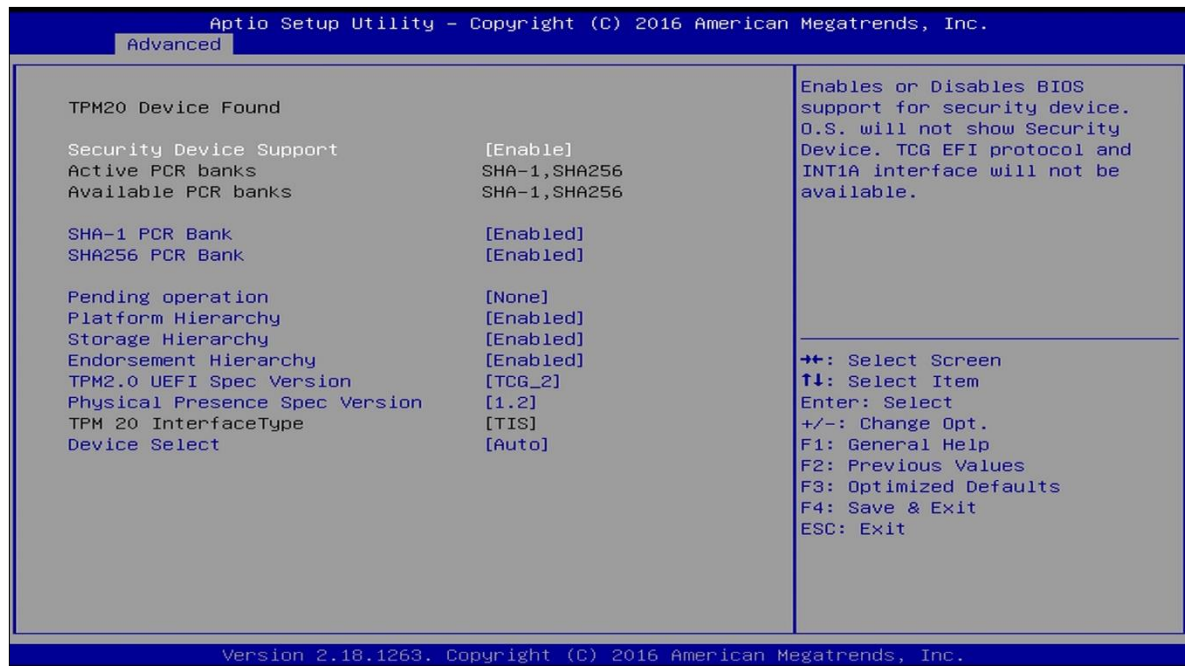

#### 4.4.3.4. ME Debug Configuration

BIOS Setting	Description
HECI Timeouts	Enables / Disables HECI sending/receiving timeouts.
Force ME DID Init Status	Forces the DID initialization status value.
CPU Replaced Polling Disable	Disables CPU replacement polling loop.
ME DID Message	Enables / Disables ME DID message (disable will prevent the DID message from being sent).
HECI Retry Disable	Setting this option disables retry mechanism for all HECI APIs.
HECI Message Check Disable	Disables message check for BIOS boot path when sending messages.
MBP HDB Skip	Enables / Disables skip of MBP HDB.
HECI2 Interface Communicationn	Adds / Removes HECI2 device from PCI space.
KT Device	Enables / Disables KT device.
IDER Device	Enables / Disables IDER device.
End of Post Message	Enables / Disables end of Post message sent to ME.
DOI3 Setting for HECI Disable	Disables setting DOI3 bit for all HECI devices.

#### 4.4.4 Trusted Computing

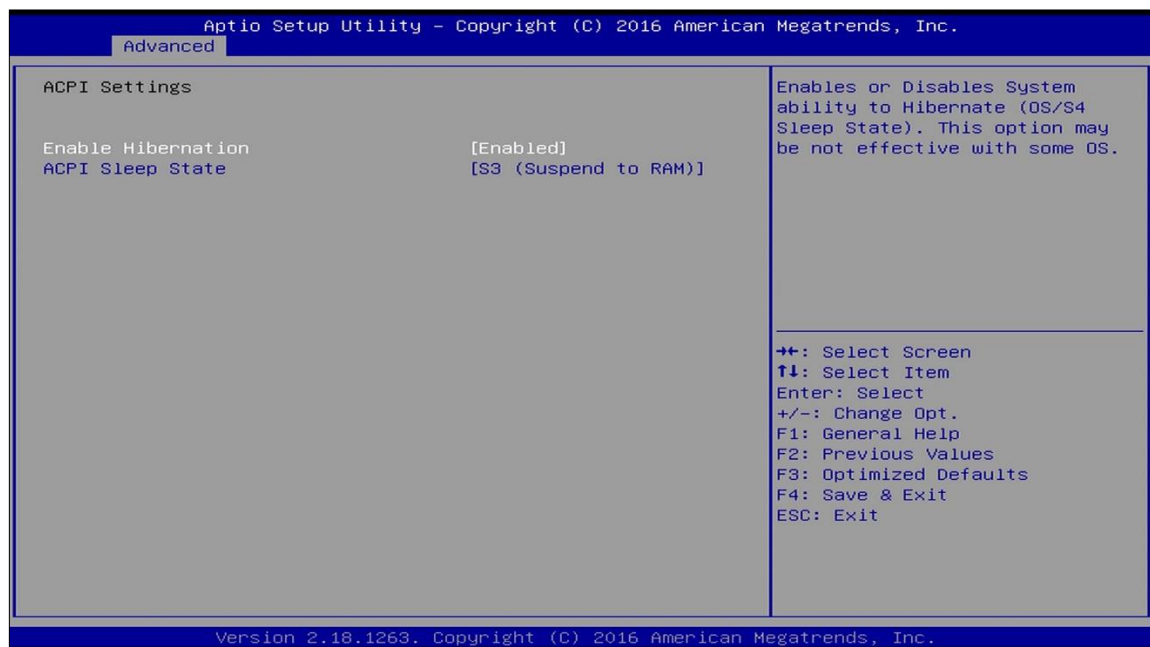

BIOS Setting	Description
Security Device Support	Enables / Disables BIOS support for security device. OS will not show security device. TCG EFI protocol and INT1A interface will not be available.
SHA-1 PCR Bank	Enables / Disables SHA-1 PCR Bank.
SHA256 PCR Bank	Enables / Disables SHA256 PCR Bank.
Pending operation	Schedule an operation for the security device. Note: Your computer will reboot during restart in order to change state of security device.
Platform Hierarchy	Enables / Disables platform hierarchy.
Storage Hierarchy	Enables / Disables storage hierarchy.
Endorsement Hierarchy	Enables / Disables endorsement hierarchy.
TPM2.0 UEFI Spec Version	Selects the supported TCG version based on your OS. <ul style="list-style-type: none"> <li>• <b>TCG_1_2</b>: supports Windows 8 /10.</li> <li>• <b>TCG_2</b>: supports new TCG2 protocol and event format for Windows 10 or later.</li> </ul>

BIOS Setting	Description
Physical Presence Spec Version	Selects to show the PPI Spec Version (1.2 or 1.3) that the OS supports. <b>Note:</b> Some HCK tests might not support 1.3.
Device Select	<ul style="list-style-type: none"> <li>• <b>TPM 1.2</b> will restrict support to TPM 1.2 devices only.</li> <li>• <b>TPM 2.0</b> will restrict support to TPM 2.0 devices only.</li> <li>• <b>Auto</b> will support both with the default being set to TPM 2.0 devices if not found, and TPM 1.2 device will be enumerated.</li> </ul>

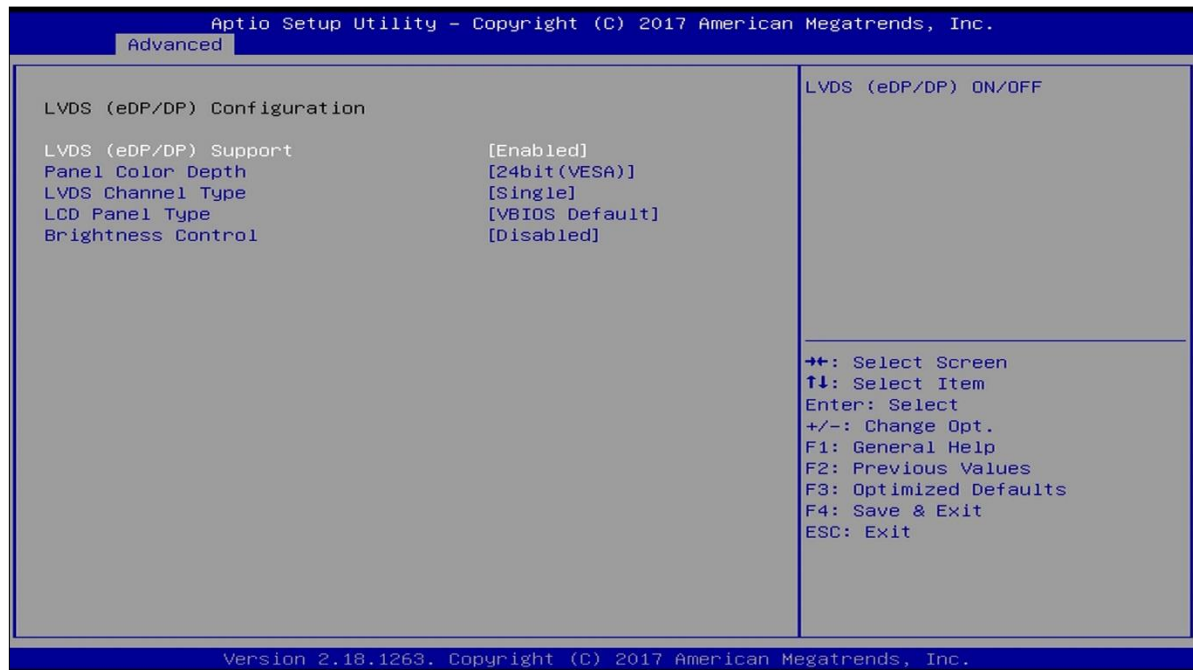

#### 4.4.5 ACPI Settings

BIOS Setting	Description
Enable Hibernation	Enables / Disables the system ability to hibernate (OS/S4 Sleep State). This option may be not effective with some OS.
ACPI Sleep State	Selects an ACPI sleep state (Suspend Disabled or S3) where the system will enter when the Suspend button is pressed.

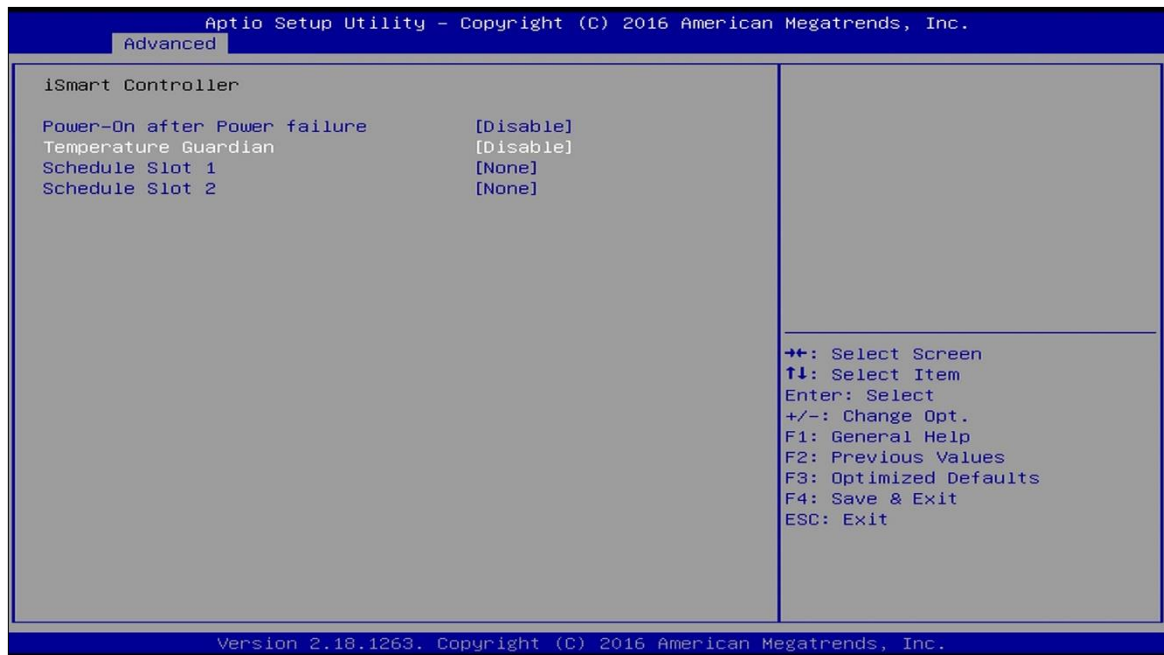

#### 4.4.6 LVDS (eDP/DP) Configuration

##### 3.3.1 Noticed: please do not change LVDS setting under UPC-7210

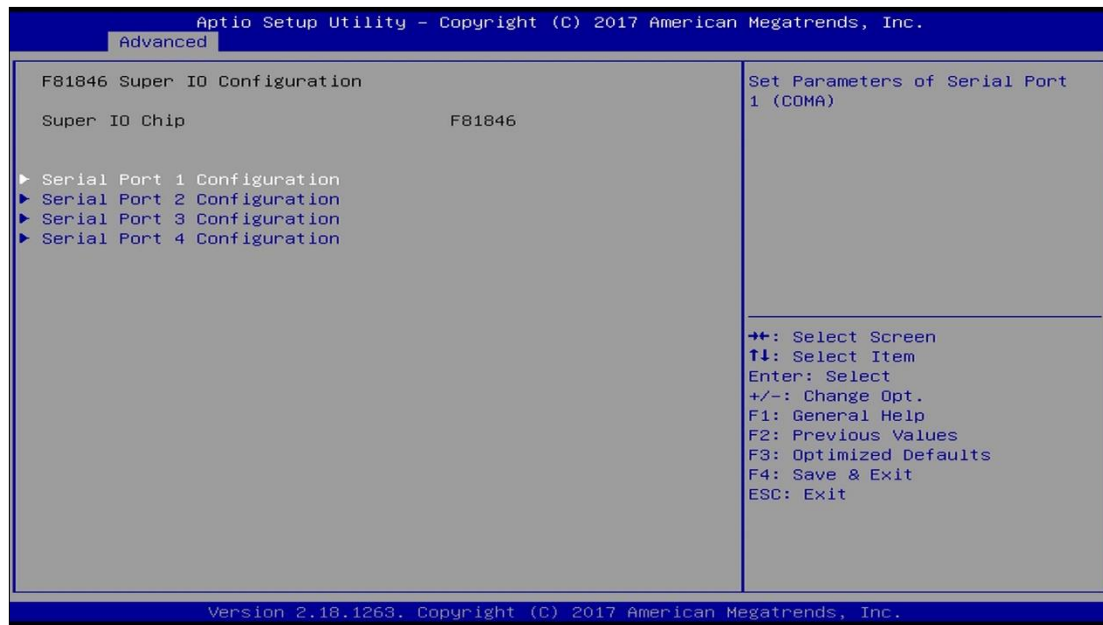

BIOS Setting	Description
LVDS (eDP/DP) Support	Enables / Disables LVDS (eDP/DP).
Panel Color Depth	Selects the panel collor depth. Options: 18 bit, 24 Bit (VESA), 24 bit (JEIDA)
LVDS Channel Type	Chooses the LVDS as single or dual channel.
LCD Panel Type	Selects LCD panel used by Intel Graphics Device by selecting the appropriate setup item. Resolution Options: VBIOS Default, 640 x 480, 800 x 600, 1024 x 768, 1280 x 1024, 1400 x 1050, 1366 x 768, 1600 x 1200, 1680 x 1050, 1920 x 1200, 1440 x 900, 1600 x 900, 1280 x 800, 1920 x 1080, 2048 x 1536
Brightness Control	Enables / Disables the brightness control.

#### 4.4.7 iSMART Controller

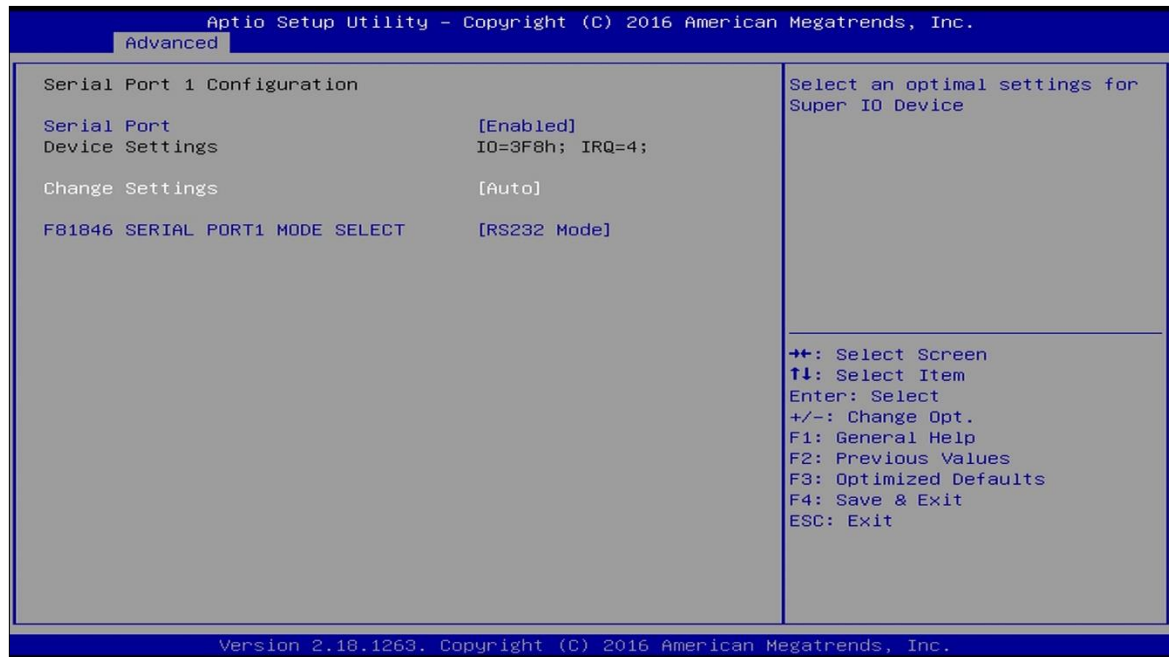

BIOS Setting	Description
Power-On after Power failure	Enables / Disables the system to be turned on automatically after a power failure.
Temperature Guardian	Generate the reset signal when system hands up on POST.
Schedule Slots	Sets up the hour / minute / day for the power-on schedule for the system. Options: <ul style="list-style-type: none"> <li>• None</li> <li>• Power On</li> <li>• Power On / Off</li> </ul>

#### 4.4.8 F81846 Super IO Configuration

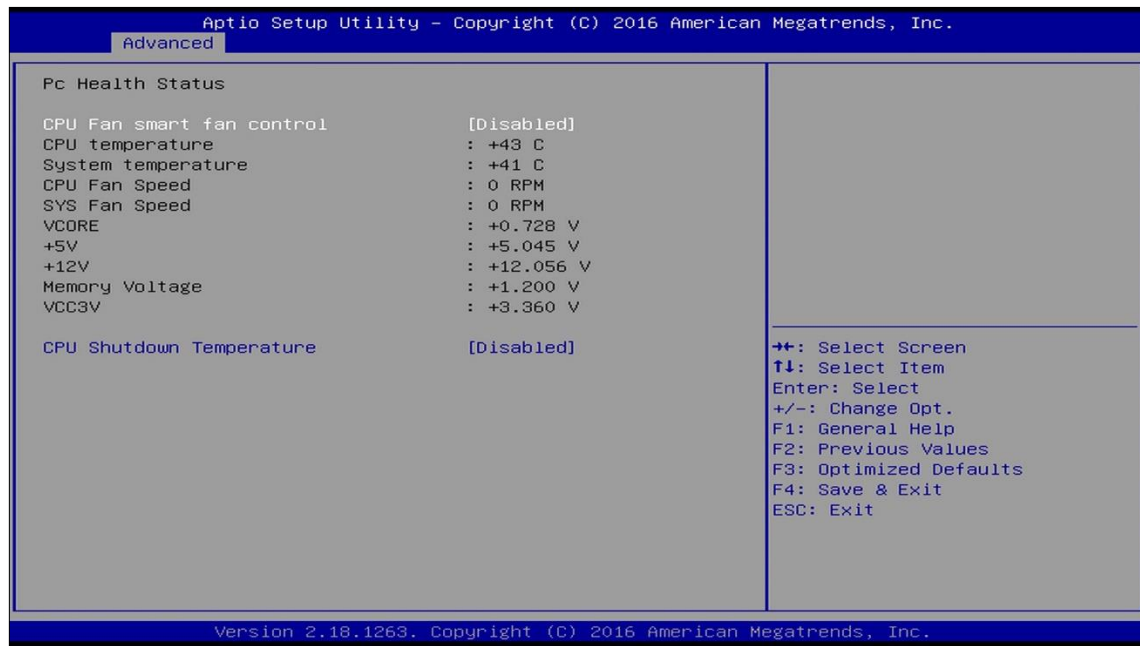

BIOS Setting	Description
Serial Ports Configuration	Sets parameters of serial ports. Enables / Disables the serial port and select an optimal setting for the Super IO device.

#### 4.4.8.1. Serial Port 1 Configuration

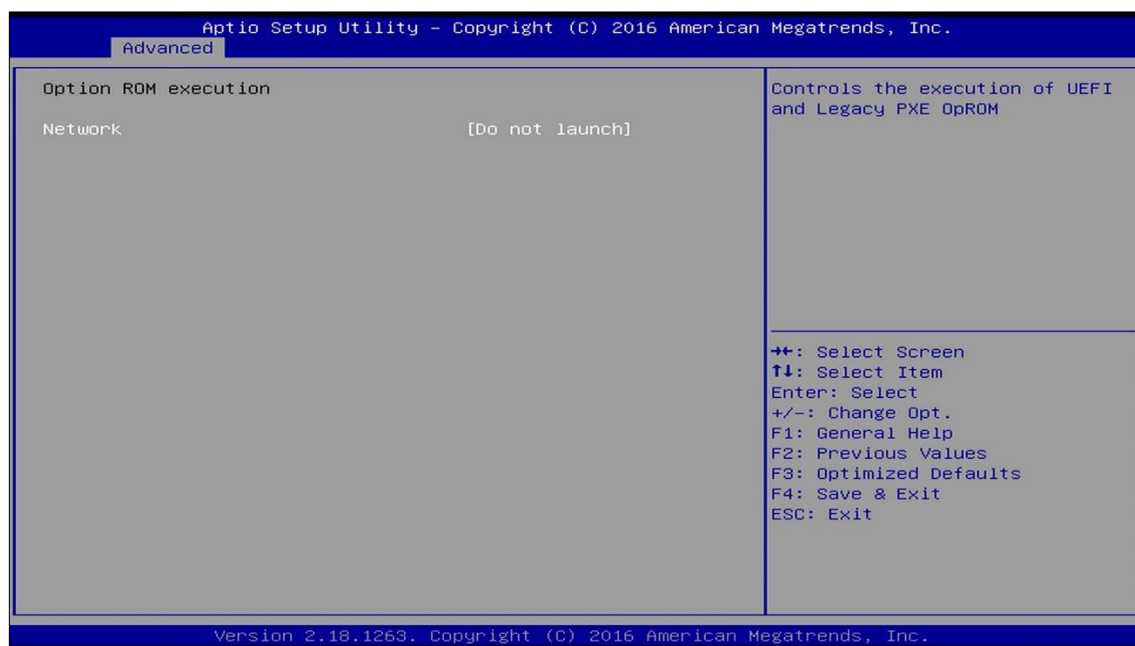

BIOS Setting	Description
Serial Port	Enables / Disables the serial port.
Change Settings	<p>Selects an optimal settings for Super I/O device.</p> <p>Options:</p> <ul style="list-style-type: none"> <li>• Auto</li> <li>• IO = 3F8h; IRQ = 4</li> <li>• IO = 3F8h; IRQ = 3, 4, 5, 6, 7, 9, 10, 11, 12</li> <li>• IO = 2F8h; IRQ = 3, 4, 5, 6, 7, 9, 10, 11, 12</li> <li>• IO = 3E8h; IRQ = 3, 4, 5, 6, 7, 9, 10, 11, 12</li> <li>• IO = 2E8h; IRQ = 3, 4, 5, 6, 7, 9, 10, 11, 12</li> </ul>
F81846 Serial Port 1 Mode Select	Changes the serial port mode to RS-232 / 422 / 485.

#### 4.4.9 Hardware Monitor

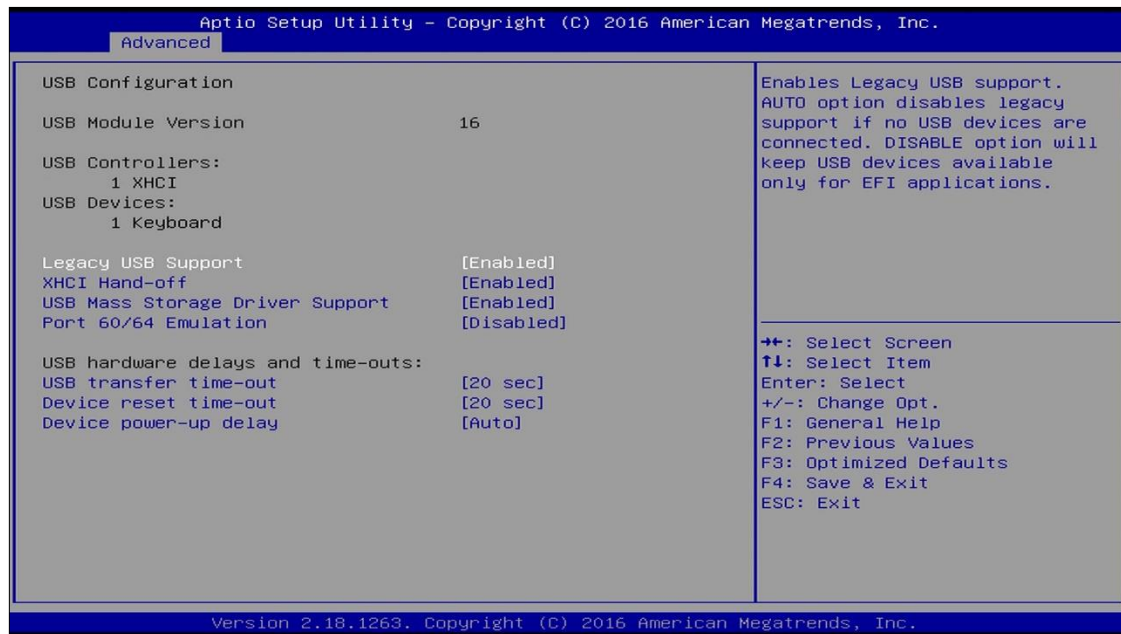

BIOS Setting	Description
CPU Fan smart fan control	Enables / Disables smart fan control.
Temperatures / Voltages	These fields are the parameters of the hardware monitoring function feature of the motherboard. The values are read-only values as monitored by the system and show the PC health status.
CPU Shutdown Temperature	Sets a threshold of temperature to shut down if CPU goes overheated. Options: Disabled / 70 °C / 75 °C / 80 °C / 85 °C / 90 °C / 95 °C

#### 4.4.10 CSM Configuration

BIOS Setting	Description
Network	Controls the execution of UEFI and Legacy PXE OpROM.

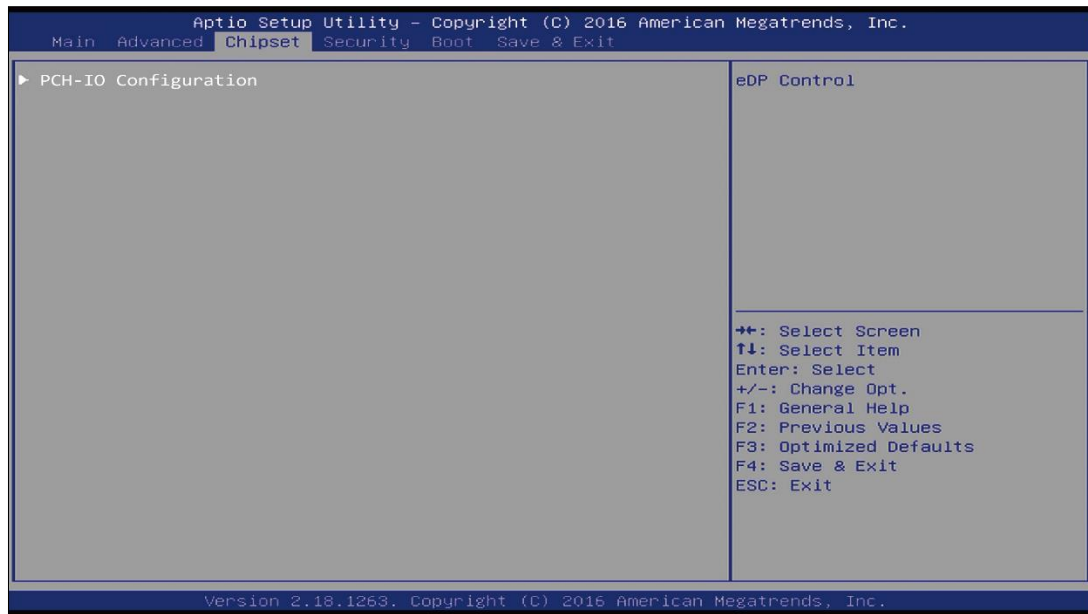

#### 4.4.11 USB Configuration

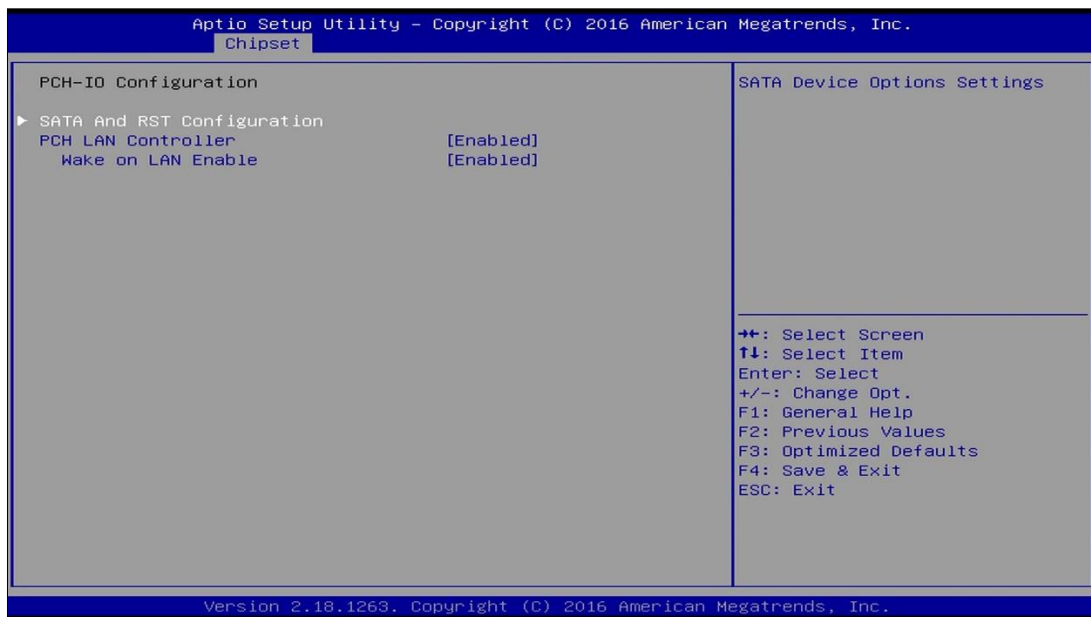

BIOS Setting	Description
Legacy USB Support	<ul style="list-style-type: none"> <li>• <b>Enabled</b> enables Legacy USB support.</li> <li>• <b>Auto</b> disables legacy support if there is no USB device connected.</li> <li>• <b>Disabled</b> keeps USB devices available only for EFI applications.</li> </ul>
XHCI Hand-off	This is a workaround for OSES without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.
USB Mass Storage Driver Support	Enables / Disables the support for USB mass storage driver.
Port 60/64 Emulation	Enables / Disables the support for I/O port 60h / 64h emulation. This should be enabled for the complete USB keyboard legacy support for non-USB aware OSES.
USB Transfer time-out	The time-out value (1 / 5 10 / 20 secs) for Control, Bulk, and Interrupt transfers.
Device reset time-out	Gives seconds (10 / 20 / 30 / 40 secs) to delay execution of Start Unit command to USB mass storage device.
Device power-up delay	<p>The maximum time the device will take before it properly reports itself to the Host Controller.</p> <p><b>Auto</b> uses default value for a Root port it is 100ms. But for a Hub port, the delay is taken from Hub descriptor.</p>

## 4.5 Chipset Settings

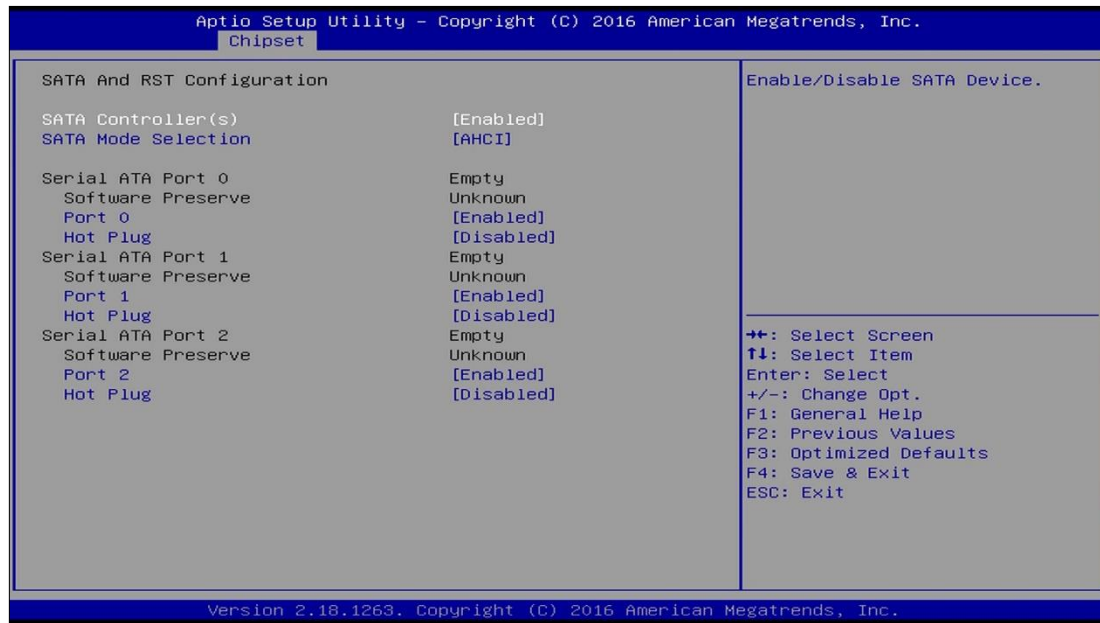

### 4.5.1 PCH-IO Configuration

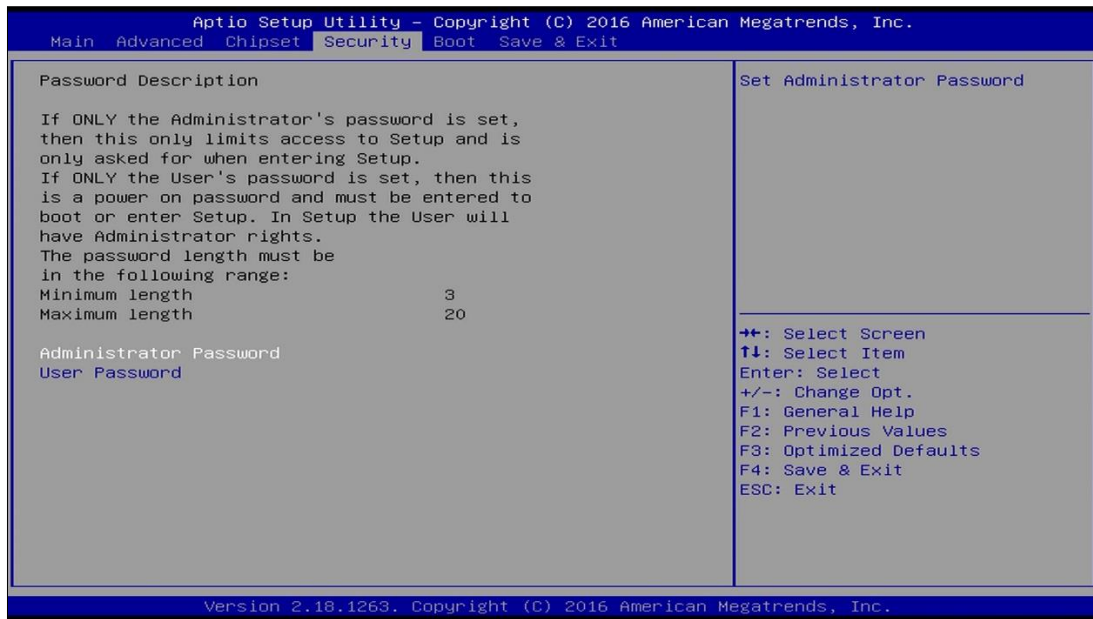

BIOS Setting	Description
SATA and RST Configuration	SATA device options and settings
PCH LAN Controller	Enables / Disables onboard NIC.
Wake on LAN Enable	Enables / Disables integrated LAN to wake the system.

#### 4.5.1.1. SATA and RST Configuration:

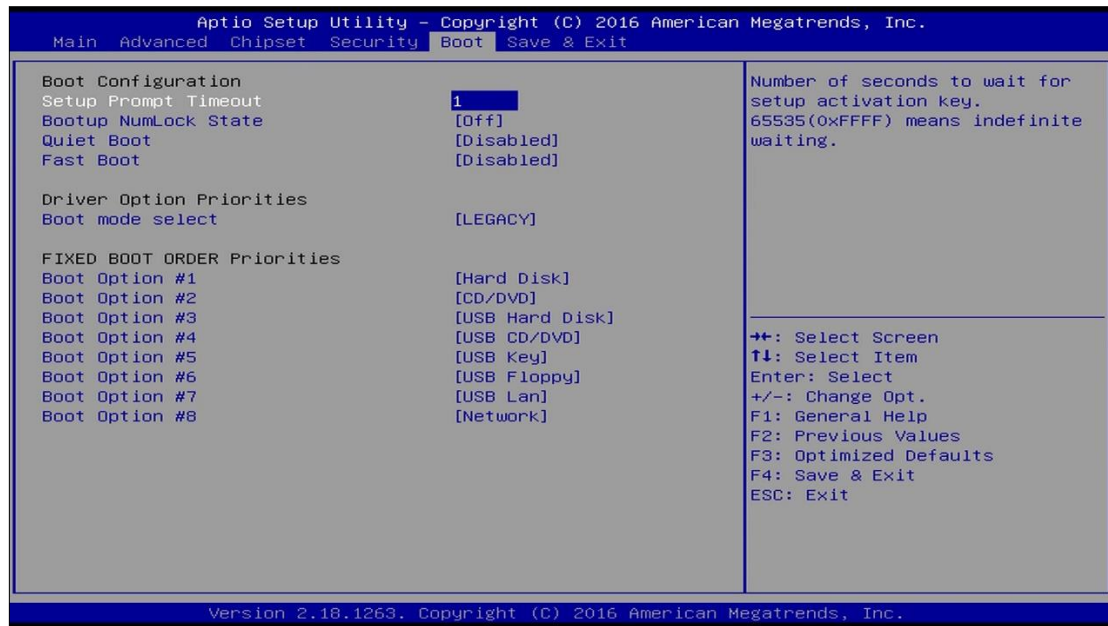

BIOS Setting	Description
SATA Controller(s)	Enables / Disables the Serial ATA.
SATA Mode Selection	Selects IDE or AHCI Mode.
Serial ATA Port 0~2	Enables / Disables Serial Port 0 ~ 2.
SATA Ports Hot Plug	Enables / Disables SATA Ports HotPlug.

## 4.6 Security Settings

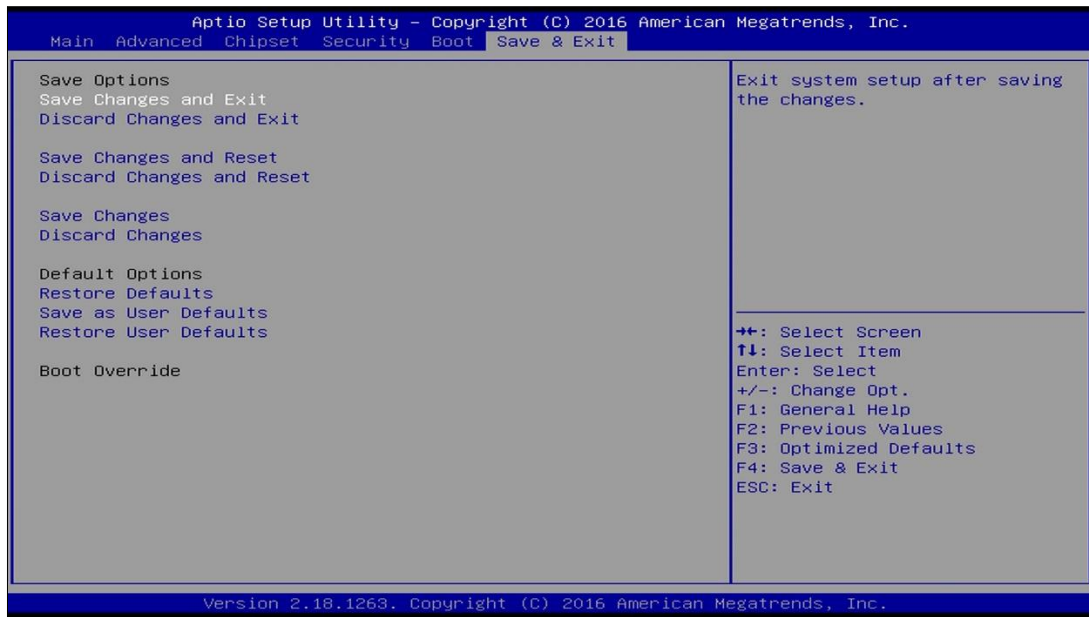

BIOS Setting	Description
Setup Administrator Password	Sets an administrator password for the setup utility.
User Password	Sets a user password.

## 4.7 Boot Settings

BIOS Setting	Description
Setup Prompt Timeout	Number of seconds to wait for setup activation key. 65535 (0xFFFF) means indefinite waiting.
Bootup NumLock State	Selects the keyboard NumLock state.
Quiet Boot	Enables / Disables Quiet Boot option.
Fast Boot	Enables / Disables boot with initialization of a minimal set of devices required to launch the active boot option. Has no effect for BBS boot options.
Boot mode select	Selects a Boot mode, Legacy / UEFI / Dual.
Boot Option Priorities	Sets the system boot order priorities for hard disk, CD/DVD, USB, Network.

## 4.8 Save & Exit Settings

BIOS Setting	Description
Save Changes and Exit	Exits system setup after saving the changes.
Discard Changes and Exit	Exits system setup without saving any changes.
Save Changes and Reset	Resets the system after saving the changes.
Discard Changes and Reset	Resets system setup without saving any changes.
Save Changes	Saves changes done so far to any of the setup options.
Discard Changes	Discards changes done so far to any of the setup options.
Restore Defaults	Restores / Loads defaults values for all the setup options.
Save as User Defaults	Saves the changes done so far as User Defaults.
Restore User Defaults	Restores the user defaults to all the setup options.

## Appendix

This section provides the mapping addresses of peripheral devices and the sample code of watchdog timer configuration.

- I/O Port Address Map
- Interrupt Request Lines (IRQ)
- Watchdog Timer Configuration

## A. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
0x00000020-0x00000021	Programmable interrupt controller
0x00000024-0x00000025	Programmable interrupt controller
0x00000028-0x00000029	Programmable interrupt controller
0x0000002C-0x0000002D	Programmable interrupt controller
0x00000030-0x00000031	Programmable interrupt controller
0x00000034-0x00000035	Programmable interrupt controller
0x00000038-0x00000039	Programmable interrupt controller
0x0000003C-0x0000003D	Programmable interrupt controller
0x000000A0-0x000000A1	Programmable interrupt controller
0x000000A4-0x000000A5	Programmable interrupt controller
0x000000A8-0x000000A9	Programmable interrupt controller
0x000000AC-0x000000AD	Programmable interrupt controller
0x000000B0-0x000000B1	Programmable interrupt controller
0x000000B4-0x000000B5	Programmable interrupt controller
0x000000B8-0x000000B9	Programmable interrupt controller
0x000000BC-0x000000BD	Programmable interrupt controller
0x000000D0-0x000000D1	Programmable interrupt controller
0x000000A00-0x000000A0F	Motherboard resources
0x000000A10-0x000000A1F	Motherboard resources
0x000000A10-0x000000A1F	Motherboard resources
0x00000002E-0x00000002F	Motherboard resources
0x00000004E-0x00000004F	Motherboard resources
0x000000061-0x000000061	Motherboard resources

Address	Device Description
0x00000063-0x00000063	Motherboard resources
0x00000065-0x00000065	Motherboard resources
0x00000067-0x00000067	Motherboard resources
0x00000070-0x00000070	Motherboard resources
0x00000070-0x00000070	System CMOS/real time clock
0x00000080-0x00000080	Motherboard resources
0x00000092-0x00000092	Motherboard resources
0x000000B2-0x000000B3	Motherboard resources
0x00000680-0x0000069F	Motherboard resources
0x0000FFFF-0x0000FFFF	Motherboard resources
0x0000FFFF-0x0000FFFF	Motherboard resources
0x0000FFFF-0x0000FFFF	Motherboard resources
0x00001800-0x000018FE	Motherboard resources
0x0000164E-0x0000164F	Motherboard resources
0x00001854-0x00001857	Motherboard resources
0x000003F8-0x000003FF	Communications Port (COM1)
0x000002F8-0x000002FF	Communications Port (COM2)
0x000003E8-0x000003EF	Communications Port (COM3)
0x000002E8-0x000002EF	Communications Port (COM4)
0x00000000-0x000000CF7	PCI Express Root Complex
0x00000D00-0x0000FFFF	PCI Express Root Complex
0x00000040-0x00000043	System timer
0x00000050-0x00000053	System timer
0x0000E000-0x0000EFFF	Mobile 6th/7th Generation Intel(R) Processor Family I/O PCI Express Root Port #11 - 9D1A
0x0000F040-0x0000F05F	Mobile 6th/7th Generation Intel(R) Processor Family I/O SMBUS - 9D23
0x0000FF00-0x0000FFFE	Motherboard resources
0x00000060-0x00000060	Standard PS/2 Keyboard
0x00000064-0x00000064	Standard PS/2 Keyboard
0x0000F090-0x0000F097	Standard SATA AHCI Controller
0x0000F080-0x0000F083	Standard SATA AHCI Controller
0x0000F060-0x0000F07F	Standard SATA AHCI Controller
0x0000F000-0x0000F03F	Intel(R) HD Graphics 620
0x000003B0-0x000003BB	Intel(R) HD Graphics 620
0x000003C0-0x000003DF	Intel(R) HD Graphics 620

## B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ 0	System timer
IRQ 1	Standard PS/2 Keyboard
IRQ 3	Communications Port (COM2)
IRQ 4	Communications Port (COM1)
IRQ 5	Communications Port (COM3)
IRQ 7	Communications Port (COM4)
IRQ 8	System CMOS/real time clock
IRQ 11	Mobile 6th/7th Generation Intel(R) Processor Family I/O SMBUS - 9D23
IRQ 11	Mobile 6th/7th Generation Intel(R) Processor Family I/O Thermal subsystem - 9D31
IRQ 12	Microsoft PS/2 Mouse
IRQ 14	Motherboard resources
IRQ 16	High Definition Audio Controller
IRQ 54 ~ IRQ 204	Microsoft ACPI-Compliant System
IRQ 256 ~ IRQ 511	Microsoft ACPI-Compliant System
IRQ 4294967285	Intel(R) Management Engine Interface
IRQ 4294967286	Intel(R) I211 Gigabit Network Connection
IRQ 4294967287	Intel(R) I211 Gigabit Network Connection
IRQ 4294967288	Intel(R) I211 Gigabit Network Connection
IRQ 4294967289	Intel(R) I211 Gigabit Network Connection
IRQ 4294967290	Intel(R) USB 3.0 eXtensible Host Controller - 1.0 (Microsoft)
IRQ 4294967291	Intel(R) HD Graphics 620
IRQ 4294967292	Intel(R) Ethernet Connection I219-V
IRQ 4294967293	Standard SATA AHCI Controller
IRQ 4294967294	Mobile 6th/7th Generation Intel(R) Processor Family I/O PCI Express Root Port #11 - 9D1A

## C. Watchdog Timer Configuration

The Watchdog Timer (WDT) is used to generate a variety of output signals after a user programmable count. The WDT is suitable for use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven.

Under normal circumstance, you will need to restart the WDT at regular intervals before the timer counts to zero.

## D. Onboard Connector Reference Types

Function	Connector Name	Onboard Type	Compatible Mating Type
Audio Connector	J1	Hao Guo Xing Ye DF11-12S-PA66H	Hirose DF11-12DS-2C
SATA HDD Power Connector	J5	E-call 0110-071-040	JST XHP-4
Front Panel Setting Connector	J6	Dupon 2.54 mm-pitch pin header (Male)	Dupon 2.54 mm-pitch (Female)
USB 2.0 Connector	J7	Hao Guo Xing Ye DF11-8S-PA66H	Hirose DF11-8DS-2C
Battery Connector	J10	Molex 53047-0210	Molex 51021-0200
COM 2, COM3, COM4 RS-232 Ports	J15, J12, J11	Hao Guo Xing Ye DF11-10S-PA66H	Hirose DF11-10DS-2C
DC Power Input Connector	J13	Hao Guo Xing Ye WAFER396-2S-WV	JST VHR-2N
Digital I/O Connector	J16	Dupon 2.00 mm-pitch pin header (Male)	Dupon 2.00 mm-pitch (Female)
LCD Backlight Connector	J19	E-CALL 0110-161-040	JST PHR-4.
LVDS Connectors	J17 (1st channel), J18 (2nd channel)	Hirose DF20G-20DP-1V	Hirose DF20A-20DS-1C
