# Introduction

MI889 MINI ITX MOTHERBOARD

MI889 EDGE CONNECTORS

## **Checklist**

---

Your MI889 package should include the items listed below.

- The MI889 Intel® Atom Mini-ITX motherboard
- This User's Manual
- 1 CD containing chipset drivers and flash memory utility
- Cables (IDE cable, Serial ATA cable)

## MI889 Specifications

<b>Product Name</b>	<b>MI889-D5 (main item) / MI889</b>
<b>Form Factor</b>	MiniITX
<b>CPU Type</b>	Intel® Pineview-M SC / Pineview-D DC Processor
<b>CPU Speed</b>	Intel® Atom™ Single Core N450 / 1.66GHz/ 512 KB L2 cache(5.5W) [MI889] Intel® Atom™ Dual Core D510 / 1.66GHz/ 1MB L2 cache(13W) [MI889-D5]
<b>BIOS</b>	AMI BIOS, support ACPI Function
<b>Chipset</b>	ICH8M: 31mm x 31mm, 676-pin T-PBGA (2.4W)
<b>Memory</b>	DDR2 667MHz SO-DIMM x 1 (w/o ECC), Max. 2GB , Single channel
<b>VGA</b>	Intel® Integrated Graphics Controller (GMA3150) Luna Pier supports DirectX 9 Graphic (200MHz) Luna Pier Refresh supports DirectX 9 Graphic (400MHz) OpenGL 1.4
<b>LVDS</b>	18-bit one channels LVDS interface w/DF13 socket x1
<b>LAN</b>	Realtek 8111DL x 2
<b>USB</b>	ICH8M built-in USB 2.0 host controller, support 8 ports
<b>Serial ATA Ports</b>	ICH8M built-in SATA controller, supports 2 ports
<b>Parallel IDE</b>	ICH8M built-in one channel Ultra DMA 33/66/100, for IDE x 1
<b>Audio</b>	Intel ICH8M built-in audio controller w/ Realtek ALC662 Codec Supports 5.1 CH audio (Line-out, Line-in & MIC )
<b>LPC I/O</b>	Winbond W83627UHG : COM1 (RS232/422/485), COM2~4 (RS232 only) Hardware monitor (2 thermal inputs, 4 voltage monitor inputs, VIDO-4 & 1 x Fan Header)
<b>Digital IO</b>	4 in & 4 out
<b>Keyboard/Mouse Connector</b>	Yes
<b>Expansion Slots</b>	PCI-Express (x8) slot x1 [(x4) Link]
<b>Edge Connector</b>	PS/2 KBMS connector x 1 DB15 + DB9 Stack connector x1 for VGA+COM 1 Dual DB9 Stack connector x 1 for COM2,3 RJ45 + Dual USB stack connector x 1 for LAN 1 + USB 1, 2 RJ45 + Dual USB stack connector x 1 for LAN 1 + USB 3, 4 Audio 3-port connector x 1 (Line-out, Line-in, MIC)
<b>Onboard Header/ Connector</b>	8-pin header x2 for 4 USB ports DF13 connector x1 for LVDS DF11 10-pin connector x 1 for COM4 12-pin box header x1 for front audio 40-pin box header x1 for IDE 10-pin header x1 for Digital I/O 10-pin header x1 for LPC [debug purpose]
<b>Watchdog Timer</b>	Yes (256 segments, 0, 1, 2...255 sec/min)
<b>Power Connector</b>	ATX (20-pins)
<b>Board Size</b>	170mm x 170mm

# Board Dimensions

## Installations

This section provides information on how to use the jumpers and connectors on the MI889 in order to set up a workable system. The topics covered are:

Installing the Memory .....	6
Setting the Jumpers.....	7
Connectors on MI889 .....	11

## Installing the Memory

---

---

The MI889 board supports one DDR667 DDR2 memory.

### Remarks:

N450 supports SO-DIMM x 1 (w/o ECC), Max. 1GB , Single channel

D510 supports SO-DIMM x 1 (w/o ECC), Max. 2GB , Single channel

### Installing and Removing Memory Modules

To install the DDR2 modules, locate the memory slot on the board and perform the following steps:

1. Hold the DDR2 module so that the key of the DDR2 module aligns with that on the memory slot. Insert the module into the socket at a slight angle (approximately 30 degrees). Note that the socket and module are both keyed, which means that the module can be installed only in one direction.
2. To seat the memory module into the socket, apply firm and even pressure to each end of the module until you feel it slip down into the socket.
3. With the module properly seated in the socket, rotate the module downward. Continue pressing downward until the clips at each end lock into position.
4. To remove the DDR2 module, press the clips with both hands.

## Setting the Jumpers

---

Jumpers are used on MI889 to select various settings and features according to your needs and applications. Contact your supplier if you have doubts about the best configuration for your needs. The following lists the connectors on MI889 and their respective functions.

Jumper Locations on MI889.....	8
JP1: LCD Panel Power Selection .....	9
JP3, JP4, JP5: RS232/422/485 (COM1) Selection .....	9
JP6: COM1 RS232 RI/+5V/+12V Power Setting .....	9
JP8: COM4 RS232 RI/+5V/+12V Power Setting .....	9
JP9: COM3 RS232 RI/+5V/+12V Power Setting .....	10

## Connectors on MI889

---

The connectors on MI889 allows you to connect external devices such as keyboard, floppy disk drives, hard disk drives, printers, etc. The following table lists the connectors on MI889 and their respective functions.

Connector Locations on MI889 .....	12
CN8: PS/2 Keyboard and PS/2 Mouse Connectors .....	13
CN2: COM1 RS232/RS422/RS485 and VGA Connector .....	13
CN3: COM2/RS232 and COM3/RS232 Connector .....	14
CN6: 10/100/1000 RJ-45 and USB3/4 Ports .....	14
CN9:10/100/1000 RJ-45 and USB5/6 Ports .....	14
CN7: Line-in, Line-out & Microphone Connector .....	14
ATX1: ATX Power Supply Connector .....	15

### J7: COM4/RS232 Serial Port

Signal Name	Pin #	Pin #	Signal Name
DCD, Data carrier detect	1	6	DSR, Data set ready
RXD, Receive data	2	7	RTS, Request to send
TXD, Transmit data	3	8	CTS, Clear to send
DTR, Data terminal ready	4	9	RI, Ring indicator
GND, ground	5	10	Not Used

### J8: Power LED

The power LED indicates the status of the main power switch.

Pin #	Signal Name
1	Power LED
2	No connect
3	Ground

**J9: System Function Connector****ATX Power ON Switch: Pins 1 and 2**

This 2-pin connector is an “ATX Power Supply On/Off Switch” on the system that connects to the power switch on the case. When pressed, the power switch will force the system to power on. When pressed again, it will force the system to power off.

**Hard Disk Drive LED Connector: Pins 3 and 4**

This connector connects to the hard drive activity LED on control panel. This LED will flash when the HDD is being accessed.

Pin #	Signal Name
4	HDD Active
3	5V

**Reset Switch: Pins 5 and 6**

The reset switch allows the user to reset the system without turning the main power switch off and then on again. Orientation is not required when making a connection to this header.

**+5V and 5VSB Signals: Pins 7 and 8**

Pin #	Signal Name
7	+5V
8	+5VSB

**J10: SPI Flash Connector (factory use only)****J12: USB5/USB6 Connector**

Signal Name	Pin	Pin	Signal Name
Vcc	1	2	Ground
D-	3	4	D+
D+	5	6	D-
Ground	7	8	Vcc

**J13: USB7/USB8 Connector**

Signal Name	Pin	Pin	Signal Name
Vcc	1	2	Ground
D-	3	4	D+
D+	5	6	D-
Ground	7	8	Vcc

**IDE1: 40-pin IDE Connectors**

Signal Name	Pin #	Pin #	Signal Name
Reset IDE	1	2	Ground
Host data 7	3	4	Host data 8
Host data 6	5	6	Host data 9
Host data 5	7	8	Host data 10
Host data 4	9	10	Host data 11
Host data 3	11	12	Host data 12
Host data 2	13	14	Host data 13
Host data 1	15	16	Host data 14
Host data 0	17	18	Host data 15
Ground	19	20	Protect pin
DRQ0	21	22	Ground
Host IOW	23	24	Ground
Host IOR	25	26	Ground
IOCHRDY	27	28	Host ALE
DACK0	29	30	Ground
IRQ14	31	32	No connect
Address 1	33	34	No connect
Address 0	35	36	Address 2
Chip select 0	37	38	Chip select 1
Activity	39	40	Ground

**J15: Audio Connector (DF11 Connector)**

Signal Name	Pin #	Pin #	Signal Name
LINEOUT R	2	1	LINEOUT L
Ground	4	3	JD FRONT
LINEIN R	6	5	LINEIN L
Ground	8	7	JD LINEIN
MIC-In	10	9	MIC L
Ground	12	11	JD MIC1

**J16: LPC Debug Purpose (factory use only)**

**PCIE1: PCIE X8 Slot (supports PCIE X4)**

**CN4, CN5: SATA Connectors****FAN1: CPU Fan Power Connector**

This is a 3-pin header for system fans. The fan must be a 12V (500mA).

Pin #	Signal Name
1	Ground
2	+12V
3	Rotation detection

This page is intentionally left blank.

## BIOS SETUP

This chapter describes the different settings available in the AMI (American Megatrends, Inc.) BIOS that comes with the board. The topics covered in this chapter are as follows:

BIOS Introduction .....	22
BIOS Setup .....	22
Main BIOS Setup .....	23
Advanced Settings .....	24
PCIPnP Settings .....	32
Boot Settings .....	33
Security Settings .....	35
Advanced Chipset Settings .....	36
Configure DRAM Timing by SPD .....	36
Exit Setup .....	39
Save Changes and Exit .....	39
Discard Changes and Exit .....	39
Discard Changes .....	39
Load Optimal Defaults .....	39
Load Failsafe Defaults .....	39

## BIOS Introduction

The BIOS (Basic Input/Output System) installed in your computer system's ROM supports Intel processors. The BIOS provides critical low-level support for a standard device such as disk drives, serial ports and parallel ports. It also adds virus and password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

## BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Pressing the <Del> key immediately allows you to enter the Setup utility. If you are a little bit late pressing the <Del> key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup. If you still wish to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again. The following message will appear on the screen:

```
Press <DEL> to Enter Setup
```

In general, you press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help and <Esc> to quit.

When you enter the Setup utility, the Main Menu screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

## Main BIOS Setup

This setup allows you to record some basic hardware configurations in your computer system and set the system clock.

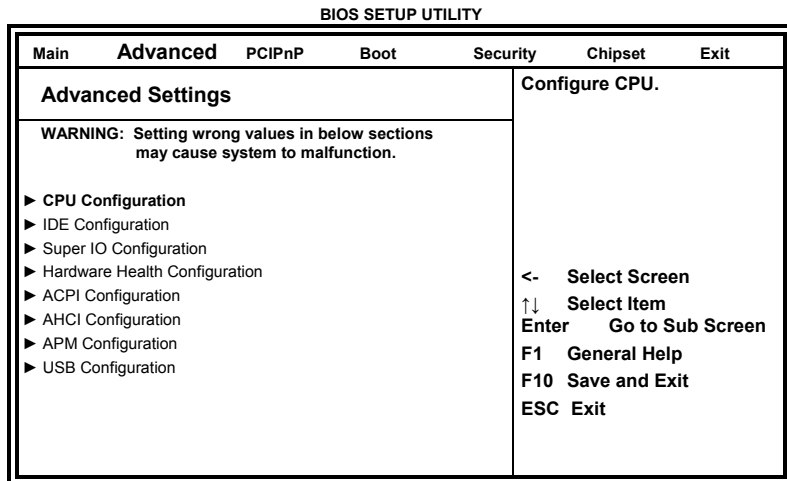

BIOS SETUP UTILITY						
Main	Advanced	PCIPnP	Boot	Security	Chipset	Exit
<b>System Overview</b>				Use[ENTER], [TAB] or [SHIFT-TAB] to select a field.		
<b>Processor</b>				Use [+] or [-] to configure system Time.		
Intel(R) Atom (TM) CPU D510		@ 1.66GHz

Count : 1						
<b>System Memory</b>				<- Select Screen		
Size : 2038MB				↑↓ Select Item		
<b>System Time</b>				+- Change Field		
System Date		[17:00:00]		Tab Select Field		
		[Tue 05/25/2010]		F1 General Help		
				F10 Save and Exit		
				ESC Exit		

**Note:** *If the system cannot boot after making and saving system changes with Setup, the AMI BIOS supports an override to the CMOS settings that resets your system to its default.*

**Warning:** *It is strongly recommended that you avoid making any changes to the chipset defaults. These defaults have been carefully chosen by both AMI and your system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could cause the system to become unstable and crash in some cases.*

## Advanced Settings

This section allows you to configure and improve your system and allows you to set up some system features according to your preference.

The Advanced BIOS Settings contains the following sections:

- ▶ CPU Configurations
- ▶ IDE Configuration
- ▶ Super IO Configuration
- ▶ Hardware Health Configuration
- ▶ ACPI Configuration
- ▶ AHCI Configuration
- ▶ APM Configuration
- ▶ USB Configuration

The fields in each section are shown in the following pages, as seen in the computer screen. Please note that setting the wrong values may cause the system to malfunction. If unsure, please contact technical support of your supplier.

## BIOS SETUP UTILITY

Advanced	
<b>Configure advanced CPU settings</b>	
Module Version:3F.18	
Manufacturer: Intel	
Intel(R) Atom (TM) CPU D510	@ 1.66GHz
Frequency	: 1.66GHz
FSB Speed	: 666MHz
Cache L1	: 48KB
Cache L2	: 1024KB
Ratio Actual Value	: 10
<b>Max CPUID Value Limit</b>	[Disabled]
Execute-Disable Bit Capability	[Enabled]
Hyper Threading Technology	[Enabled]
Disabled for WindowsXP  <- Select Screen ↑↓ Select Item +- Change Option F1 General Help F10 Save and Exit ESC Exit	

The CPU Configuration menu shows the following CPU details: Manufacturer: the name of the CPU manufacturer

Brand String: the brand name of the CPU being used

Frequency: the CPU processing speed

FSB Speed: the FSB speed

Cache L1: the CPU L1 cache size

Cache L2: the CPU L2 cache

### Max CPUID Value Limit

Disabled for WindowsXP.

### Execute-Disable Bit Capability

XD can prevent certain classes of malicious buffer overflow attacks when combined with a supporting OS.

### Hyper Threading Technology

Enabled for Windows XP and Linux (OS optimized for Hyper-Threading Technology) and Disabled for other OS (OS not optimized for Hyper-Threading Technology). When Disabled, only one thread per enabled core is enabled.

BIOS SETUP UTILITY

Advanced		Options
<b>IDE Configuration</b>		<b>Disabled</b> <b>Compatible</b> <b>Enhanced</b>  <- <b>Select Screen</b> ↑↓ <b>Select Item</b> +- <b>Change Option</b> <b>F1 General Help</b> <b>F10 Save and Exit</b> <b>ESC Exit</b>

### **Power Management/APM**

By default, this field is set to *Enabled*.

### **Power Button Mode**

Go into On/Off, or Suspend when power button is pressed.

### **Resume on Ring**

This option is used to enable activity on the RI (ring in) modem line to wake up the system from a suspend or standby state. That is, the system will be awakened by an incoming call on a modem.

### **Resume on PME#**

This option is used enable activity on the PCI PME (power management event) controller to wake up the system from a suspend or standby state

### **Resume On RTC Alarm**

This option is used to specify the time the system should be awakened from a suspended state

## BIOS SETUP UTILITY

Advanced	
<b>USB Configuration</b>	Enables support for legacy USB. AUTO option disables legacy support if no USB devices are connected.  <- Select Screen ↑↓ Select Item +- Change Option F1 General Help F10 Save and Exit ESC Exit
USB Devices Enabled: None  Legacy USB Support [Enabled] USB 2.0 Controller Mode [HiSpeed] BIOS EHCI Hand-Off [Enabled] Legacy USB1.1 HC Support [Enabled]	

The USB Configuration menu is used to read USB configuration information and configure the USB settings.

### Legacy USB Support

Enables support for legacy USB. AUTO option disables legacy support if no USB devices are connected.

### USB 2.0 Controller Mode

Configures the USB 2.0 controller in HiSpeed (480Mbps) or FullSpeed (12Mbps). This option is enabled by HiSpeed.

### BIOS EHCI Hand-Off

Enabled/Disabled. This is a workaround for Oses without EHCI hand-off support. The EHCI ownership change should be claimed by EHCI driver.

### Legacy USB1.1 HC Support

Support USB1.1 HC.

## PCIPnP Settings

This option configures the PCI/PnP settings.

BIOS SETUP UTILITY			
Main	Advanced	PCIPnP	Boot Security Chipset Exit
<b>Advanced PCI/PnP Settings</b>			
<b>WARNING: Setting wrong values in below sections may cause system to malfunction.</b>			
<b>Plug &amp; Play O/S</b>		[No]	
Allocate IRQ to PCI VGA		[Yes]	
IRQ3		[Available]	
IRQ4		[Available]	
IRQ5		[Available]	
IRQ7		[Available]

		NO: lets the BIOS Configure all the Devices in the system. YES: lets the operating system configure Plug and Play (PnP) devices not required for boot if your system has a Plug and Play operating system.	
		<- Select Screen ↑↓ Select Item +- Change Option F1 General Help F10 Save and Exit ESC Exit	

### Plug & Play O/S

This lets BIOS configure all devices in the system or lets the OS configure PnP devices not required for boot if your system has a Plug and Play OS.

### Allocate IRQ to PCI VGA

This assigns IRQ to PCI VGA card if card requests IRQ or doesn't assign IRQ to PCI VGA card even if card requests an IRQ.

### IRQ#

Use the IRQ# address to specify what IRQs can be assigned to a particular peripheral device.

## Boot Settings

BIOS SETUP UTILITY						
Main	Advanced	PCI/PnP	Boot	Security	Chipset	Exit
<b>Boot Settings</b>			Configure Settings during System Boot.			
▶ Boot Settings Configuration			<- Select Screen ↑↓ Select Item Enter Go to Sub Screen F1 General Help F10 Save and Exit ESC Exit			

BIOS SETUP UTILITY		
Boot		
<b>Boot Settings Configuration</b>		Allows BIOS to skip certain tests while booting. This will decrease the time needed to boot the system.
<b>Quick Boot</b> [Enabled] Quiet Boot [Disabled] AddOn ROM Display Mode [Force BIOS] Bootup Num-Lock [On] PS/2 Mouse Support [Auto] Wait for 'F1' If Error [Enabled] Hit 'DEL' Message Display [Enabled] Interrupt 19 Capture [Disabled]	<- Select Screen ↑↓ Select Item +- Change Option F1 General Help F10 Save and Exit ESC Exit	

### Quick Boot

This allows BIOS to skip certain tests while booting. This will decrease the time needed to boot the system.

### Quiet Boot

When disabled, this displays normal POST messages. When enabled, this displays OEM Logo instead of POST messages.

### AddOn ROM Display Mode

This allows user to force BIOS/Option ROM of add-on cards to be displayed during quiet boot.

### Bootup Num-Lock

This select the power-on state for numlock.

### **PS/2 Mouse Support**

This select support for PS/2 mouse.

### **Wait for 'F1' If Error**

When set to Enabled, the system waits for the F1 key to be pressed when error occurs. This allows option ROM to trap interrupt 19.

### **Hit <DEL> Message Display**

This displays "Press <DEL> to run Setup" in POST.

### **Interrupt 19 Capture**

This allows option ROMs to trap interrupt 19.

## Security Settings

This setting comes with two options set the system password. Supervisor Password sets a password that will be used to protect the system and Setup utility. User Password sets a password that will be used exclusively on the system. To specify a password, highlight the type you want and press <Enter>. The Enter Password: message prompts on the screen. Type the password and press <Enter>. The system confirms your password by asking you to type it again. After setting a password, the screen automatically returns to the main screen.

To disable a password, just press the <Enter> key when you are prompted to enter the password. A message will confirm the password to be disabled. Once the password is disabled, the system will boot and you can enter Setup freely.

**USB Function**

This option enables the number of USB ports desired or disables the USB function.

**USB 2.0 Controller**

This option is disabled by default.

**HDA Controller**

This option is used to enable the Southbridge high definition audio controller.

**SMBUS Controller**

This option is enabled by default.

**Clock-Gen Spectrum**

This option is disabled by default.

**Enable Onboard PCI option ROM**

This option is disabled by default.

## Exit Setup

The exit setup has the following settings which are:

BIOS SETUP UTILITY						
Main	Advanced	PCI/PnP	Boot	Security	Chipset	Exit
<b>Exit Options</b>					Exit system setup after saving the changes.	
<b>Save Changes and Exit</b> Discard Changes and Exit Discard Changes  Load Optimal Defaults Load Failsafe Defaults					<b>F10 key can be used for this operation</b>  <b>&lt;- Select Screen</b> <b>↑↓ Select Item</b> <b>Enter Go to Sub Screen</b> <b>F1 General Help</b> <b>F10 Save and Exit</b> <b>ESC Exit</b>	

### Save Changes and Exit

This option allows you to determine whether or not to accept the modifications and save all changes into the CMOS memory before exit.

### Discard Changes and Exit

This option allows you to exit the Setup utility without saving the changes you have made in this session.

### Discard Changes

This option allows you to discard all the changes that you have made in this session.

### Load Optimal Defaults

This option allows you to load the default values to your system configuration. These default settings are optimal and enable all high performance features.

### Load Failsafe Defaults

This option allows you to load the troubleshooting default values permanently stored in the BIOS ROM. These default settings are non-optimal and disable all high-performance features.

This page is intentionally left blank.

## Drivers Installation

This section describes the installation procedures for software and drivers under the Windows XP, Windows Vista and Windows 7. The software and drivers are included with the motherboard. If you find the items missing, please contact the vendor where you made the purchase. The contents of this section include the following:

Intel Chipset Software Installation Utility .....	42
Intel Pineview Chipset Family Graphics Driver Installation .....	44
Realtek High Definition Codec Audio Driver Installation .....	46
Realtek RTL8111DL LAN Drivers Installation .....	47

### **IMPORTANT NOTE:**

After installing your Windows operating system (Windows XP/ Vista/ 7), you must install first the Intel Chipset Software Installation Utility before proceeding with the drivers installation.

## Intel Chipset Software Installation Utility

The Intel Chipset Drivers should be installed first before the software drivers to enable Plug & Play INF support for Intel chipset components. Follow the instructions below to complete the installation under Windows XP/Vista/7.

1. Insert the drivers DVD into the DVD drive. Click **Intel** and then **Intel(R) Pineview Chipset Drivers**. Click **Intel(R) Chipset Software Installation Utility**.

2. When the welcome screen to the Intel(R) Chipset Software Installation Utility appears, click **Next** to continue.

3. Click **Yes** to accept the software license agreement and proceed with the installation process.
4. On the Readme Information screen, click **Next** to continue. When the Setup Progress screen appears, click **Next** to continue.

5. The Setup process is now complete. Click **Finish** to restart the computer and for changes to take effect.

## Intel Pineview Chipset Family Graphics Driver Installation

To install the VGA drivers, follow the steps below to proceed with the installation.

1. Insert the drivers DVD into the DVD drive. Click **Intel** and then **Intel(R) Pineview Chipset Drivers**. Click **Intel(R) Pineview Chipset Family Graphics Driver**.

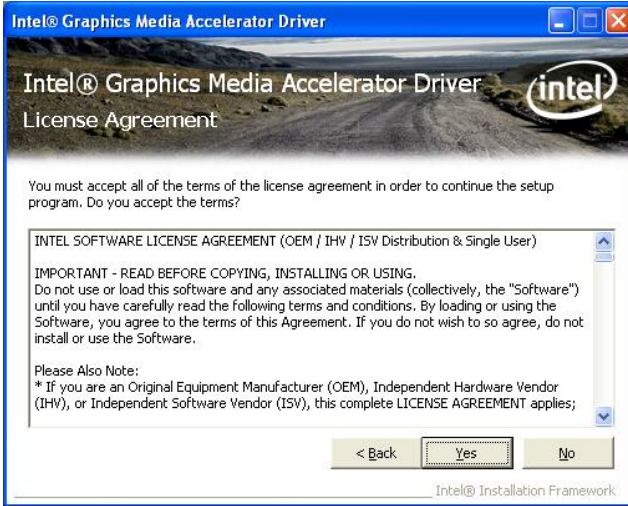

2. When the welcome screen of the Intel(R) Graphics Media Accelerator Driver appears, click **Next** to continue.

3. Click **Yes** to agree with the license agreement and continue the installation.

4. Click **Next** in the Readme File Information window.

5. Click **Next** in the Setup Progress window.

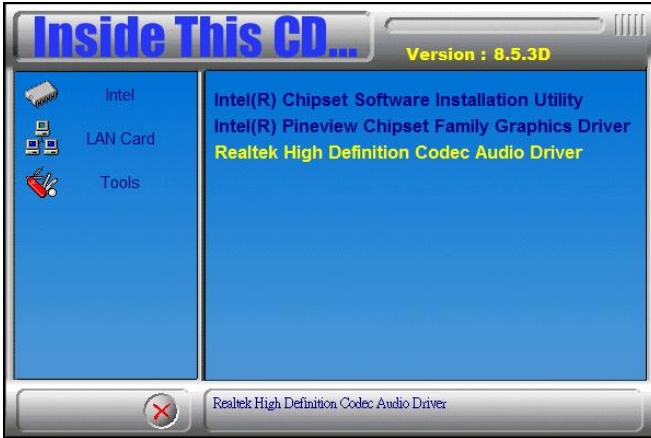

6. Setup is now complete. Click **Finish** to restart the computer and for changes to take effect.

## Realtek High Definition Codec Audio Driver Installation

---

Follow the steps below to install the Realtek HD Codec Audio Drivers.

1. Insert the drivers DVD into the DVD drive. Click **Intel** and then **Intel(R) Pineview Chipset Drivers**. Click **Realtek High Definition Codec Audio Driver**.

2. When the welcome screen to InstallShield Wizard for **Realtek High Definition Audio Driver** appears, click **Next** to start the installation.

3. When the InstallShield Wizard has finished performing maintenance operations on Realtek High Definition Codec Audio Driver, click **Finish** to restart the computer.

---

## Realtek RTL811DL LAN Drivers Installation

---

Follow the steps below to install Realtek RTL811DL LAN Drivers.

1. Insert the drivers DVD into the DVD drive. Click **LAN Card** and then **Realtek LAN Controller Drivers**. Click **Realtek RTL811DL LAN Drivers**.

2. In the welcome screen of the InstallShield Wizard for REALTEK GbE & FE Ethernet PCI-E NIC Driver, click **Next**.

3. In the InstallShield Wizard screen, click **Install** to begin the installation.

4. InstallShield Wizard completed. Click **Finish** to exit the Wizard.

This page is intentionally left blank.

# Appendix

## A. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses that also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
0000h-0CF7h	PCI bus
0000h-0CF7h	Direct memory access controller
0010h-001Fh	Motherboard resources
0020h-0021h	Programmable interrupt controller
0022h-003Fh	Motherboard resources
0040h-0043h	System timer
0044h-005Fh	Motherboard resources
0060h-0060h	Motherboard resources
0061h-0061h	System speaker
0062h-0063h	Motherboard resources
0064h-0064h	Motherboard resources
0065h-006Fh	Motherboard resources
0070h-0071h	System CMOS/real time clock
0072h-007Fh	Motherboard resources
0080h-0080h	Motherboard resources
0081h-0083h	Direct memory access controller
0084h-0086h	Motherboard resources
0087h-0087h	Direct memory access controller
0088h-0088h	Motherboard resources
0089h-008Bh	Direct memory access controller
008Ch-008Eh	Motherboard resources
008Fh-008Fh	Direct memory access controller
0090h-009Fh	Motherboard resources
00A0h-00A1h	Programmable interrupt controller
00A2h-00BFh	Motherboard resources
00C0h-00DFh	Direct memory access controller
00E0h-00EFh	Motherboard resources
00F0h-00FFh	Numeric data processor
01F0h-01F7h	Primary IDE Channel
0274h-0277h	ISAPNP Read Data Port
0279h-0279h	ISAPNP Read Data Port

Address	Device Description
02E8h-02EFh	Communications Port (COM4)
02F8h-02FFh	Communications Port (COM2)
03B0h-03BBh	Intel(R) Graphics Media Accelerator 3150
03C0h-03DFh	Intel(R) Graphics Media Accelerator 3150
03E8h-03EFh	Communications Port (COM3)
03F6h-03F6h	Primary IDE Channel
03F8h-03FFh	Communications Port (COM1)
0400h-041Fh	Intel(R) ICH8 Family SMBus Controller - 283E
04D0h-04D1h	Motherboard resources
0500h-053Fh	Motherboard resources
0800h-087Fh	Motherboard resources
0A00h-0A0Fh	Motherboard resources
0A10h-0A1Fh	Motherboard resources
0A79h-0A79h	ISAPNP Read Data Port
0D00h-FFFFh	PCI bus
B480h-B48Fh	Intel(R) ICH8M 3 port Serial ATA Storage Controller - 2828
B800h-B80Fh	Intel(R) ICH8M 3 port Serial ATA Storage Controller - 2828
B880h-B883h	Intel(R) ICH8M 3 port Serial ATA Storage Controller - 2828
BC00h-BC07h	Intel(R) ICH8M 3 port Serial ATA Storage Controller - 2828
C000h-C003h	Intel(R) ICH8M 3 port Serial ATA Storage Controller - 2828
C080h-C087h	Intel(R) ICH8M 3 port Serial ATA Storage Controller - 2828
C400h-C41Fh	Standard Universal PCI to USB Host Controller
C480h-C49Fh	Intel(R) ICH8 Family USB Universal Host Controller - 2832
C800h-C81Fh	Intel(R) ICH8 Family USB Universal Host Controller - 2831
C880h-C89Fh	Intel(R) ICH8 Family USB Universal Host Controller - 2830

---

Address	Device Description
CC00h-CC07h	Intel(R) Graphics Media Accelerator 3150
D000h-DFFFh	Intel(R) ICH8 Family PCI Express Root Port 5 - 2847
D800h-D8FFh	Realtek PCIe GBE Family Controller
E000h-EFFFh	Intel(R) ICH8 Family PCI Express Root Port 6 - 2849
E800h-E8FFh	Realtek PCIe GBE Family Controller #2
FFA0h-FFAFh	Intel(R) ICH8M Ultra ATA Storage Controllers - 2850

## B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ0	System timer
IRQ1	PS/2 Keyboard
IRQ3	Communications Port (COM2)
IRQ4	Communications Port (COM1)
IRQ5	Intel(R) ICH8 Family SMBus Controller - 283E
IRQ8	System CMOS/real time clock
IRQ9	Microsoft ACPI-Compliant System
IRQ10	Communications Port (COM4)
IRQ11	Communications Port (COM3)
IRQ12	PS/2 Mouse
IRQ13	Numeric data processor
IRQ14	Primary IDE Channel
IRQ16	Intel(R) Graphics Media Accelerator 3150
IRQ16	Realtek PCIe GBE Family Controller
IRQ16	Standard Universal PCI to USB Host Controller
IRQ17	Realtek PCIe GBE Family Controller #2
IRQ18	Intel(R) ICH8 Family USB Universal Host Controller - 2832
IRQ18	Intel(R) ICH8M 3 port Serial ATA Storage Controller - 2828
IRQ19	Intel(R) ICH8 Family USB Universal Host Controller - 2831
IRQ21	Microsoft UAA Bus Driver for High Definition Audio
IRQ22	Intel(R) ICH8 Family PCI Express Root Port 1 - 283F
IRQ22	Intel(R) ICH8 Family PCI Express Root Port 5 - 2847
IRQ23	Intel(R) ICH8 Family PCI Express Root Port 6 - 2849
IRQ23	Intel(R) ICH8 Family USB Universal Host Controller - 2830
IRQ23	Intel(R) ICH8 Family USB2 Enhanced Host Controller - 2836

## C. Watchdog Timer Configuration

The WDT is used to generate a variety of output signals after a user programmable count. The WDT is suitable for use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven. Under normal circumstance, the user will restart the WDT at regular intervals before the timer counts to zero.
