No part of this publication may be reproduced, copied, stored in a retrieval system, translated into any language or transmitted in any form or by any means, electronic, mechanical, photocopying, or otherwise, without the prior written consent of IBASE Technology, Inc. (hereinafter referred to as "IBASE").

Disclaimer

IBASE reserves the right to make changes and improvements to the products described in this document without prior notice. Every effort has been made to ensure the information in the document is correct; however, IBASE does not guarantee this document is error-free. IBASE assumes no liability for incidental or consequential damages arising from misapplication or inability to use the product or the information contained herein, nor for any infringements of rights of third parties, which may result from its use.

Trademarks

All the trademarks, registrations and brands mentioned herein are used for identification purposes only and may be trademarks and/or registered trademarks of their respective owners.

Compliance

CE

This product has passed CE tests for environmental specifications and limits. This product is in accordance with the directives of the Union European (EU). If users modify and/or install other devices in this equipment, the CE conformity declaration may no longer apply.

FCC

This product has been tested and found to comply with the limits for a Class B device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with manufacturer's instructions, may cause harmful interference to radio communications.

WEEE

This product must not be disposed of as normal household waste, in accordance with the EU directive of for waste electrical and electronic equipment (WEEE - 2012/19/EU). Instead, it should be disposed of by returning it to a municipal recycling collection point. Check local regulations for disposal of electronic products.

Green IBASE

This product is compliant with the current RoHS restrictions and prohibits use of the following substances in concentrations exceeding 0.1% by weight (1000 ppm) except for cadmium, limited to 0.01% by weight (100 ppm).

- Lead (Pb)
- Mercury (Hg)
- Cadmium (Cd)
- Hexavalent chromium (Cr6+)
- Polybrominated biphenyls (PBB)
- Polybrominated diphenyl ether (PBDE)

Important Safety Information

Carefully read the precautions before using the device.

Environmental conditions:

- Lay the device horizontally on a stable and solid surface in case the device may fall, causing serious damage.
- Make sure you leave plenty of space around the device for ventilation.
- Use this product in environments with ambient temperatures $-20^{\circ}\text{C} \sim 70^{\circ}\text{C}$.
- Do not leave this device in an environment where the storage temperature may go below -40°C or above 85°C . This could damage the device. The device must be used in a controlled environment.

Care for your IBASE products:

- Before cleaning the device, turn it off and unplug all cables such as power in case a small amount of electrical current may still flow.
- Use neutral cleaning agents or diluted alcohol to clean the device chassis with a cloth. Then wipe the chassis with a dry cloth.
- Vacuum the dust with a computer vacuum cleaner to prevent the air vent or slots from being clogged.

WARNING

Attention during use:

- Do not use this product near water.
- Do not spill water or any other liquids on your device.
- Do not place heavy objects on the top of the device.
- Operate this device from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your distributor or local power company.
- Ensure that you apply correctly the power supply voltage.
- Do not walk on the power cord or allow anything to rest on it.
- If you use an extension cord, make sure that the total ampere rating of the product plugged into the extension cord does not exceed its limits.

Avoid Disassembly

You are not suggested to disassemble, repair or make any modification to the device. Disassembly, modification, or any attempt at repair could generate hazards and cause damage to the device, even bodily injury or property damage, and will void any warranty.

CAUTION

Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions.

Warranty Policy

- **IBASE standard products:**

24-month (2-year) warranty from the date of shipment. If the date of shipment cannot be ascertained, the product serial numbers can be used to determine the approximate shipping date.
- **3rd-party parts:**

12-month (1-year) warranty from delivery for the 3rd-party parts that are not manufactured by IBASE, such as CPU, memory, storage device, power adapter, panel and touchscreen.
- * PRODUCTS, HOWEVER, THAT FAILS DUE TO MISUSE, ACCIDENT, IMPROPER INSTALLATION OR UNAUTHORIZED REPAIR SHALL BE TREATED AS OUT OF WARRANTY AND CUSTOMERS SHALL BE BILLED FOR REPAIR AND SHIPPING CHARGES.

Technical Support & Services

1. Visit the IBASE website at www.ibase.com.tw to find the latest information about the product.
2. If you need any further assistance from your distributor or sales representative, prepare the following information of your product and elaborate upon the problem.
 - Product model name
 - Product serial number
 - Detailed description of the problem
 - The error messages in text or in screenshots if there is any
 - The arrangement of the peripherals
 - Software in use (such as OS and application software, including the version numbers)
3. If repair service is required, please log in to the RMA system of the website or contact your distributor or sales representative for assistance.

Chapter 1

General Information

The information provided in this chapter includes:

- Features
- Packing List
- Optional Accessories
- Specifications
- Product View
- Dimensions

1.1 Introduction

The AGS103T embedded computer is an ultra-compact fanless system AGS103T integrating the Intel Atom® x6000E Series processors (code-named Elkhart Lake) that deliver up to 4 cores with 40% increase in CPU performance and improved graphics when compared with previous versions. Based on the economical 10nm technology, the low-power platform is suitable for embedded applications in factory automation, IoT gateway, and automatic control systems.

AGS103T

1.2 Features

- Ultra-Compact, rugged and fanless system with Intel® Atom™ x6414RE / x6212RE series processor
- Over/Under/Reverse voltage protection
- 9V~36V DC wide-range power input
- Display output through HDMI and DVI-I
- DIN-rail mount & Wall mount compatibility
- GPIO 4-in & 4-out with isolation function
- 3 x 2.5 Gigabit Ethernet
- 3 x full-size Mini PCI-E sockets, 1x 3052 M.2 B-Key,
- TPM 2.0

1.3 Packing List

Your product package should include the items listed below. If any of the items below is missing, contact the distributor or the dealer from whom you purchased the product.

- | | |
|---|-----|
| • AGS103T / AGS103TS | x 1 |
| • Wall Mount Kit | x 1 |
| • Round Head Screw (for Wall Mount Kit) | x 4 |
| • Thermal Pad | |
| 19 x 19 x 2 mm | x 1 |
| 28 x 18 x 2 mm | x 1 |
| • DIN Rail Bracket | x 1 |

1.4 Optional Accessories

IBASE provide optional accessories as follows. Please contact us or your dealer if you need any.

- DC-In Power Adapter
- Power Cord
- WiFi Antenna Kit
- 4G/LTE or GPS Antenna Kit

1.5 Specifications

Product Name	AGS103T	AGS103TS
System		
Motherboard	IB803	
Carrier Board	IP802	
Operating System	- Windows10 (64-bit) - Linux Ubuntu	
CPU	Intel® Atom™ x6414RE Intel® Atom™ x6212RE	
CPU Speed	Up to 1.5 GHz	
Memory	1 x DDR4-3200 SO-DIMM, expandable to 16 GB (Non-ECC)	
Storage	1 slot for mSATA SSD	1 slot for mSATA SSD 1 slot for 2.5" SSD (for AGS103TS only)
Super I/O	Fintek F81964D-I	
Audio Codec	Realtek ALC888S	
Network	3 x Intel® I226IT GbE LAN	
Power Supply	DC-In 9V ~ 36V (3-pin terminal block)	
BIOS	AMI BIOS	
Watchdog	Watchdog Timer 256 segments, 0, 1, 2...255 sec/min	
TPM	2.0	
Chassis	Aluminum & steel, silver	
Mounting	- Desktop mount / Wall mount (wall mount kit included) - DIN rail mount	
Dimensions (W x H x D)	190 x 52 x 110 mm	190 x 68 x 110 mm
Weight	1.1 kg	1.25 kg
Certificate	CE / LVD / FCC Class B (pre-scan)	

I/O Ports	
Left External I/O	• 2 x RS232/422/485 port: COM1 & COM2, select from BIOS • 1 x Antenna hole for WLAN module • 1 x Speaker-out / Mic-in connector
Right External I/O	• 1x Antenna hole for WLAN module • 2x Nano SIM card slots • *The socket signal from 1xMini-PCle (SIM2), 1x M.2 slot (SIM1)
Rear External I/O	• 1 x DVI-I • 1 x HDMI • 2 x USB 3.1 • 2 x USB 2.0 • 3 x RJ45 2.5GbE LAN port • 4 x LED indicators (WLAN, WWAN, Heartbeat, Power/troubleshooting) • 1 x power button • 1 x 3-pin DC-in terminal block type for 9V-36V • 2 x Antenna hole for WLAN module • 2 x RS-232/422/485 port: COM3 & COM4 • 1 x Isolated 4-In & 4-Out GPIO connector
Expansion slots	• 1x full-size Mini-PCle socket with USB 2.0 • 1x full-size Mini-PCle socket with USB 2.0 & PCIe • 1 x full-size Mini-PCle socket with USB 2.0, PCIe & SATA for SSD • 1x M.2 B3052 socket with USB 3.0 & PCIe for 4G/5G module • 1 x 2.5" SSD slot (for AGS103TS only)
Environment	
Temperature	• Operating: -20°C ~ 70°C (-4°F ~ 158°F) • Storage: -40°C ~ 85°C (-40°F ~ 185°F)
Relative Humidity	5 ~ 90% at 45°C (non-condensing)
Vibration	With IEC 60068-2-64 • Operating: 2 Grms / 5 ~ 500 Hz (Random operation) • Non-operating: 3 Grms / 5 ~ 500Hz (Random operation)
Shock	With MIL-STD-810G • Operating: 30 g / 11 ms duration • Non-operating: 40 g / 11 ms duration

All specifications are subject to change without prior notice.

1.6 Product View – AGS103T

Front View

No.	Name	No.	Name
1	CN1: DVI-I Port	6	DC In
2	CN2: HDMI Port	7	DC In Power Input
3	Gigabit LAN Ports	8	Antenna Holes
4	CN5: USB 3.1 Ports	9	COM3/COM4 Ports
5	CN6: USB 2.0 Ports	10	Digital I/O

Oblique View

Remarks: Two Nano SIM card slots are located on the right side.

Side View

Remarks: Aside from the antenna hole, the picture above shows the following:

CN7 : 2 in 1 Audio Jack (Line-out/Line-in)

CN8 : COM1 Connector

CN10 : COM2 Connector

Bottom View

Remarks: For AGS103TS, the bottom has a compartment for a 2.5" SSD slot.

AGS103TS with Wall Mount Brackets

AGS103TS with DIN Rail Mount (Optional)

1.7 Dimensions –AGS103T

Unit: mm

1.8 Dimensions –AGS103TS

Unit: mm

Chapter 2

Hardware Configuration

The information provided in this chapter includes:

- Installations
- Information and locations of connectors

2.1 Installations

Turn your product upside down and take away the device bottom cover by removing 6 screws as indicated below for the installation or replacement of the memory module, mSATA SSD or WLAN card. After installations, secure the device bottom cover back.

2.1.1 Memory Installation / Replacement

If you need to install or replace a memory module, follow the instructions below for installation after you disassemble the device cover.

1. Align the key of the memory module with that on the memory slot and insert the module slantwise.
2. Gently push the module in an upright position until the clips of the slot close to hold the module in place when the module touches the bottom of the slot.

To remove the module, press the clips outwards with both hands, and the module will pop-up.

2.1.2 Mini-PCle & M.2 Cards Installation / Replacement

After removing the bottom cover, follow the instructions below.

1. Locate the mini-PCle or M.2 slot, align the key of the card to the interface, and insert the card slantwise.

Mini-PCle card:

M.2 card:

2. Push the card down and fix it with the supplied 2 flat head screws for the mini-PCle card and with one screw for M.2 card.

Mini-PCle card:

M.2 card:

2.1.3 WiFi / 3G / 4G Antenna Installation

Thread the WiFi / 3G / 4G antenna extension cable through an antenna hole of the front I/O cover and fasten the antenna as shown below. Then apply adhesive to the edge of the hex nut behind the front I/O cover to prevent the extension cable from falling if the cable becomes loose.

1. Thread and fasten the hex nut and the washer. Then install the antenna.

2. Apply adhesive around here.

Info: The diameter of the nut is around 6.35 mm (0.25"-36UNC).

2.1.4 Mounting Installation

Requirements

Before mounting the system, ensure that you have enough room for power and signal cable routing, and have good ventilation for the power adaptor. The method of mounting must be able to support the weight of the device plus the weight of the suspending cables to be attached to the system. Use the following methods for mounting your system:

2.1.4.1. Wall-Mounting Installation

1. Turn your product upside down to attach the mounting brackets to your product and secure with the supplied 4 screws.

2. Prepare at least 4 screws (M3) to install the device on wall.

2.1.4.2. DIN Rail Mounting Installation (Optional)

1. Attach the DIN rail mounting bracket to your product, and secure with the supplied 2 screws.

2. Hook the DIN rail mounting bracket over the top of the DIN rail, and then press the lower section of the bracket towards the DIN rail to clip the bracket onto it.

2.1.5 HDD Module Installation

2.1.6 SIM Card Installation

1. The SIM card socket design is push-in/push-out type. To install or remove a SIM card, remove the SIM card cover, as shown in the picture below, by releasing the M3 screw. After insertion/removal of the SIM card, replace the SIM card cover and lock it back into place.

2.1.7 Pinout for COM Ports, DC-In Power & Line-Out Jack

COM1 & COM2 RS232/422/485 Ports

COM1 and COM2 ports are jumper-less and configurable in BIOS.

Pin	Assignment		
	RS-232	RS-422	RS-485
1	DCD, Data carrier detect	TX-	DATA-
2	RXD, Receive data	TX+	DATA+
3	TXD, Transmit data	RX+	NC
4	DTR, Data terminal ready	RX-	NC
5	Ground	Ground	Ground
6	DSR, Data set ready	NC	NC
7	RTS, Request to send	NC	NC
8	CTS, Clear to send	NC	NC
9	RI, Ring indicator	NC	NC

RS-232 COM3 & COM4 Ports

Pin	Assignment		
	RS-232	RS-422	RS-485
1	DCD, Data carrier detect	TX-	DATA-
2	RXD, Receive data	TX+	DATA+
3	TXD, Transmit data	RX+	NC
4	DTR, Data terminal ready	RX-	NC
5	Ground	Ground	Ground
6	DSR, Data set ready	NC	NC
7	RTS, Request to send	NC	NC
8	CTS, Clear to send	NC	NC
9	RI, Ring indicator	NC	NC

J2 DC-In Power Connector (3-pin terminal block)

Pin	Assignment
1	Power Ground
2	Case Ground
3	9V ~ 36V

Isolated 4-In & 4-Out GPIO Connector (10-pin terminal block)

Pin	Assignment	Pin	Assignment
1	Isolation +5V	6	OUT0
2	IN0	7	OUT1
3	IN1	8	OUT2
4	IN3	9	OUT3
5	IN4	10	Isolation Ground

Line-Out / Line-In Jack

This connector supports Line-in and Line-out.
Line-out supports a 2W speaker. Please see diagram below.

2.2 Setting the Jumpers

Set up and configure your device by using jumpers for various settings and features according to your needs and applications. Contact your supplier if you have doubts about the best configuration for your use.

2.2.1 How to Set Jumpers

Jumpers are short-length conductors consisting of several metal pins with a non-conductive base mounted on the circuit board. Jumper caps are used to have the functions and features enabled or disabled. If a jumper has 3 pins, you can connect either PIN1 to PIN2 or PIN2 to PIN3 by shorting.

Refer to the illustration below to set jumpers.

Pin closed	Oblique view	Illustration in the manual
Open		
1-2		
2-3		

When two pins of a jumper are encased in a jumper cap, this jumper is **closed**, i.e. turned **On**.

When a jumper cap is removed from two jumper pins, this jumper is **open**, i.e. turned **Off**.

Chapter 3

Driver Installation

The information provided in this chapter includes:

- Intel® Chipset Software Installation Utility
- Graphics Driver Installation
- HD Audio Driver Installation
- Intel® Management Engine Drivers Installation
- LAN Driver Installation

3.1 Introduction

This section describes the installation procedures for software drivers.

Note: After installing your Windows operating system, you must install the Intel® Chipset Software Installation Utility first before proceeding with the drivers installation.

3.2 Intel® Chipset Software Installation Utility

The Intel® Chipset drivers should be installed first before the software drivers to install INF files for Plug & Play function for the chipset components. Follow the instructions below to complete the installation.

1. Go to the download page of the product. Copy the compressed drivers file to your computer. Double click the file to decompress it. Run “CDGuide” to go to the main drivers page as shown. Click **Intel** on the left pane and then **Intel(R) Elkhartlake Chipset Drivers** on the right pane.

- Click **Intel(R) Chipset Software Installation Utility**.

- When the *Welcome* screen to the Intel® Chipset Device Software appears, click **Next** to continue.
- Accept the software license agreement and proceed with the installation process.
- On the *Readme File Information* screen, click **Install** for installation.
- After the installation, press **Finish** to complete the setup process.

3.3 Graphics Driver Installation

1. Click **Intel** on the left pane and then **Intel(R) Elkhartlake Chipset Drivers** on the right pane.
2. Click **Intel(R) Elkhartlake Graphics Driver**.

3. When the *Welcome* screen appears, click **Next** to continue.

- Click **Yes** to accept the license agreement and click **Next** in The Readme File Information screen. Click **Next** in the Setup Progress screen.

- Restart the computer when prompted. Click **Finish**, then remove any installation media from the drives.

3.4 HD Audio Driver Installation

1. Click Intel on the left pane and then **Intel(R) Elkhartlake Chipset Drivers** on the right pane.
2. Click **Realtek High Definition Audio Driver**.

3. On the Welcome screen, click **Next** to continue.

4. When the InstallShield Wizard has successfully installed the Realtek Audio Driver, restart the computer. Click **Finish** to complete the setup.

3.5 Intel® ME Drivers Installation

1. Click Intel on the left pane and then **Intel(R) ME Drivers**.

2. The welcome screen to the Intel® Management Engine Components appears. Click **Next** to continue.

3. Accept the license agreement and click Next.

4. On the *Setup's Destination Folder* screen, click **Next** to continue.

5. After the Intel® components have been completely installed, click **Finish**.

3.6 LAN Driver Installation

1. Click **LAN Card** on the left pane and then **Intel LAN Controller Drivers** on the right pane.

2. Choose **Intel(R) I21x Gigabit Network Drivers**.

3. In the welcome screen to the install wizard for Intel(R) Network Connections, click **Next**.
4. On the next screen, accept the terms in the license agreement and click **Next**.

5. In the *Setup Options* screen, click **Next**.

6. Click **install** to begin the installation.

7. Click **Finish** when Install wizard has completed.

Chapter 4

BIOS Setup

This chapter describes the different settings available in the AMI BIOS that comes with the board. The topics covered in this chapter are as follows:

- Main Settings
- Advanced Settings

4.1 Introduction

The BIOS (Basic Input/Output System) installed in the ROM of your computer system supports Intel® processors. The BIOS provides critical low-level support for standard devices such as disk drives, serial ports and parallel ports. It also provides password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

4.2 BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Press the key immediately allows you to enter the Setup utility. If you are a little bit late pressing the key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup.

If you still need to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again.

The following message will appear on the screen:

```
Press <DEL> to Enter Setup
```

In general, press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help, and <Esc> to quit.

When you enter the BIOS Setup utility, the *Main Menu* screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

Warning: It is strongly recommended that you avoid making any changes to the chipset defaults.

These defaults have been carefully chosen by both AMI and your system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could make the system unstable and crash in some cases.

4.3 Main Settings

BIOS Setting	Description
System Date	Sets the date. Use the <Tab> key to switch between the date elements.
System Time	Set the time. Use the <Tab> key to switch between the time elements.

4.4 Advanced Settings

This section allows you to configure, improve your system and allows you to set up some system features according to your preference.

BIOS Setting	Description
CPU Configuration	Displays CPU configuration parameters.
PCH-FW Configuration	Configure Management Engine Technology Parameters.
Trusted Computing	Configure security device parameters.
ACPI Settings	Displays system ACPI parameters.
Fintek Super IO Configuration	Displays super IO chip parameters.
Fintek Hardware Monitor	Shows super IO monitor hardware status.
USB Configuration	Displays USB configuration parameters.
Network Stack Configuration	Enables / Disables UEFI Network Stack.

4.4.1 CPU Configuration

BIOS Setting	Description
Intel (VMX) Virtualization Technology	When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology.

4.4.2 PCH-FW Configuration

BIOS Setting	Description
ME State	When disabled, ME will be put into ME temporarily Disabled Mode.

4.4.3 Trusted Computing

BIOS Setting	Description
Security Device Support	Enables / Disables BIOS support for security device. OS will not show security device. TCG EFI protocol and INT1A interface will not be available.
SHA-1 PCR Bank	Enables / Disables SHA-1 PCR Bank.
SHA256 PCR Bank	Enables / Disables SHA256 PCR Bank.
Pending operation	Schedule an operation for the security device. Note: Your computer will reboot during restart in order to change state of security device.
Platform Hierarchy	Enables / Disables platform hierarchy.
Storage Hierarchy	Enables / Disables storage hierarchy.
Endorsement Hierarchy	Enables / Disables endorsement hierarchy.
TPM2.0 UEFI Spec Version	Selects the supported TCG version based on your OS. • TCG_1_2: supports Windows 8 /10. • TCG_2: supports new TCG2 protocol and event format for Windows 10 or later.
Physical Presence Spec Version	Selects to show the PPI Spec Version (1.2 or 1.3) that the OS supports. Note: Some HCK tests might not support 1.3.
Device Select	• TPM 1.2 will restrict support to TPM 1.2 devices only. • TPM 2.0 will restrict support to TPM 2.0 devices only. • Auto will support both with the default being set to TPM 2.0 devices if not found, and TPM 1.2 device will be enumerated.

4.4.4 ACPI Settings

BIOS Setting	Description
Enable Hibernation	Enables / Disables the system ability to hibernate (OS/S4 Sleep State). This option may be not effective with some OS.
ACPI Sleep State	Selects an ACPI sleep state (Suspend Disabled or S3) where the system will enter when the Suspend button is pressed.

4.4.5 Fintek Super IO Configuration

BIOS Setting	Description
Power Failure	Options: Always on, Always off
Serial Ports Configuration	Sets parameters of serial ports. Enables / Disables the serial port and select an optimal setting for the Super IO device.

4.4.6 Fintek Hardware Monitor

BIOS Setting	Description
Temperatures / Voltages	These fields are the parameters of the hardware monitoring function feature of the motherboard. The values are read-only as monitored by the system and showing the PC health status

4.4.7 USB Configuration

BIOS Setting	Description
Legacy USB Support	Enables / Disables Legacy USB support. Auto disables legacy support if there is no USB device connected. Disable keeps USB devices available only for EFI applications.
XHCI Hand-pff	This is a workaround for OSES without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.
USB Mass Storage Driver Support	Enables / Disables USB mass storage driver support.
USB Transfer time-out	Sets the time-out value 1, 5, 10 or 20 sec(s) for Control, Bulk, and Interrupt transfers.
Device reset time-out	Sets the seconds (10, 20, 30, 40 secs) of delaying execution of start unit command to USB mass storage device.
Device power-up delay	The maximum time the device will take before it properly reports itself to the Host Controller. Auto uses default value. For a Root port, it is 100 ms. For a Hub port, the delay is taken from Hub descriptor.
Generic Ultra MS-COMBO	Mas storage device emulation type. 'AUTO' enumerates devices according to their media format. Optical drives are emulated as 'CDROM' drives with no media will be emulated according to a drive type

4.4.8 Network Stack Configuration

BIOS Setting	Description
Network Stack	Enables / Disables UEFI Network Stack.

4.5 Chipset Settings

4.5.1 System Agent (SA) Configuration

BIOS Setting	Description
Primary display	Select which of IGFX/PEG/PCI Graphics device should be Primary Display or select HG for Hybrid Gfx
Internal Graphics	Keep IGFX enabled based on the setup options
GTT Size	Options: 2MB, 4MB, 8MB
Aperture Size	Select the Aperture Size. Note: Above 4GB MMIO BIOS assignment is automatically enabled when selecting 2048MB aperture. To use this feature, please disable CSM Support

4.5.2 PCH-IO Configuration

BIOS Setting	Description
SATA Controller(s)	Enables / Disables the Serial ATA.
SATA Mode Selection	Determines how SATA controller(s) operate.
Serial ATA Port 0~1	Enables / Disables Serial Port 0~1.
SATA Ports Hot Plug	Enables / Disables SATA Ports HotPlug.

BIOS Setting	Description
M.2 USB Configuration	M.2 USB Configuration Settings
M.2 USB 3.0 Support	Enable/Disable this USB Physical Connector (physical port). Once disabled, any USB devices plugged into the connector will not be detected by BIOS or OS.

4.6 Security Settings

BIOS Setting	Description
Setup Administrator Password	Sets an administrator password for the setup utility.
User Password	Sets a user password.

4.7 Boot Settings

BIOS Setting	Description
Setup Prompt Timeout	Number of seconds to wait for setup activation key. 65535 (0xFFFF) means indefinite waiting.
Bootup NumLock State	Turns on/off the keyboard NumLock state.
Quiet Boot	Enables / Disables Quiet Boot option.
Fixed Boot Order Priorities	Sets the system boot order.
UEFI Hard Disk Drive BBS Priorities	Specifies the boot device priority sequence from available UEFI hard disk drives.

4.8 Save & Exit Settings

BIOS Setting	Description
Save Changes and Exit	Exits system setup after saving the changes.
Discard Changes and Exit	Exits system setup without saving any changes.
Save Changes and Reset	Resets the system after saving the changes.
Discard Changes and Reset	Resets system setup without saving any changes.
Save Changes	Saves changes done so far to any of the setup options.
Discard Changes	Discards changes done so far to any of the setup options.
Restore Defaults	Restores / Loads defaults values for all the setup options.
Save as User Defaults	Saves the changes done so far as user defaults.
Restore User Defaults	Restores the user defaults to all the setup options.

Appendix

This section provides the mapping addresses of peripheral devices and the sample code of watchdog timer configuration.

- I/O Port Address Map
- Interrupt Request Lines (IRQ)
- Watchdog Timer Configuration

0x00006090-0x00006097	Standard SATA AHCI Controller
0x0000EFA0-0x0000EFBF	Intel(R) SMBus Controller - 4B23

B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ 0	System timer
IRQ 3	Communications Port (COM2)
IRQ 4	Communications Port (COM1)
IRQ 5	Communications Port (COM3)
IRQ 10	Communications Port (COM4)
IRQ 16	High Definition Audio Controller
IRQ 55 ~ IRQ 204	Microsoft ACPI-Compliant System
IRQ 256 ~ IRQ 511	Microsoft ACPI-Compliant System
IRQ 4294967273	Intel(R) Management Engine Interface
IRQ 4294967274~79	Intel I226 Gigabit Network Connection #5
IRQ 4294967280~85	Intel I226 Gigabit Network Connection #6
IRQ 4294967286~91	Intel I226 Gigabit Network Connection #4
IRQ 4294967292	Intel(R) UHD Graphics
IRQ 4294967293	Intel(R) USB 3.10 eXtensible Host Controller - 1.20 (Microsoft)
IRQ 4294967294	Standard SATA AHCI Controller

C. Watchdog Timer Configuration

The Watchdog Timer (WDT) is used to generate a variety of output signals after a user programmable count. The WDT is suitable for the use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven.

Under normal circumstance, you will need to restart the WDT at regular intervals before the timer counts to zero.
